Statistical Dynamics of Sampled Data Systems Petr D. Krut'ko,1969 Statistical Dynamics of Sampled Data Systems ,1969 **Statistical Dynamics of Sampled Data Systems** P. D. Krut'ko,1969 Statistical dynamics of sampled data systems, tr Petr Dmitrievich Krut'ko, **NASA Technical Translation** ,1969 **Statistical Dynamics of Linear Automatic Control Systems** Vladimir Viktorovich Solodovnikov,1965 **Time Series in Psychology** R. A.M. Gregson,2014-05-22 First published in 1983 Psychological data are segments of life histories as such they are ordered sequences of observations and by definition time series Yet they are often anything but well behaved what regularities and invariances they have are buried from all but the most persistent investigator The most common methods of representing quantitative results in psychology are frozen outside time thus they deliberately average out much of the sequential structure that holds any sparse clues to the nature of processes within the organism This review whose simple aim is to bring together in an illuminating juxtaposition on basic results in both time series analysis and in experimental psychology thus cuts across traditions within psychology **n-Dimensional Nonlinear Psychophysics** Robert A. M. Gregson,2021-09-30 Originally published in 1992 this work compliments and extends the theory and results of nonlinear psychophysics an original approach created by the author It breaks with the traditional mathematics used in the experimental psychology of sensation and draws on what is popularly known as chaos theory and its extension into neural networks Topical and innovative in its approach it integrates a diversity of topics previously treated separately into one framework The properties of the mathematics used are illustrated in the context of substantive problems in psychophysics thus it builds strong new bridges between the dynamics of mass action in psychophysical processes and the broader phenomena of sensation No other treatments of the topic take quite this approach the use of systems theory rather than traditional equations of psychophysics dating from the mid nineteenth century offers a striking contrast in both theory construction and data analysis *Canadian Mathematical Bulletin* ,1972-06

Time Sequence Analysis in Geophysics: Third Edition E. R. Kanasewich,1981 Time sequence analysis is the study of relations between a sequence of data points or sequence of signals in order to determine the physical properties of the earth Providing an up to date treatment on time series and time sequence this book is intended for senior or graduate students in seismology geomagnetism and exploratory geophysics **Scientific and Technical Aerospace Reports** ,1990 U.S. Government Research & Development Reports ,1970 *Methods for the Control of Satellites and Space Vehicles: Control system mechanization and analysis* Systems Corporation of America, Los Angeles,1960 *NASA Scientific and Technical Reports* United States. A Selected Listing of NASA Scientific and Technical Reports for ... United States. National Aeronautics and Space Administration. Scientific and Technical Information Division,1966 *Computers and Data Processing Systems* ,1962

WADC Technical Report United States. Wright Air Development Division,1960 Informative Psychometric Filters

Robert A. M. Gregson,2006-08-01 This book is a series of case studies with a common theme Some refer closely to previous work by the author but contrast with how they have been treated before and some are new Comparisons are drawn using various sorts of psychological and psychophysiological data that characteristically are particularly nonlinear non stationary far from equilibrium and even chaotic exhibiting abrupt transitions that are both reversible and irreversible and failing to meet metric properties A core idea is that both the human organism and the data analysis procedures used are filters that may variously preserve transform distort or even destroy information of significance **Automatic Flight Control Theory**
