Chinese Economists on Economic Reform – Collected Works of Chen Xiwen Chen Xiwen, 2013-12-04 This book is part of a series which makes available to English speaking audiences the work of the individual Chinese economists who were the architects of China's economic reform. The series provides an inside view of China's economic reform revealing the thinking of the reformers themselves unlike many other books on China's economic reform which are written by outside observers. Chen Xiwen 1950 has made major contributions to economic policy making on agricultural development and the rural economy. Although born in Shanghai he was one of the young people sent down to the countryside in the late 1960s to work in a production and construction corps. He has held a number of government and academic positions notably director of the Rural Economy Research Department of the State Council and Vice President of the Development Research Centre of the State Council. The book is published in association with China Development Research Foundation one of the leading economic and social think tanks in China where many of the theoretical foundations and policy details of economic reform were formulated

Economic Development and Inequality in China Hong Yu, 2017-09-29 The conventional belief that all regions have equally benefited from China's remarkable development over the last three decades is subjected to criticism in this book as Hong Yu systematically analyses the issue of regional inequality during the post 1978 period using the case of Guangdong. Guangdong is one of the key industrial centres and economic powerhouses in China and as a pioneer province instigating economic reform as China opened up to the world it offers an ideal focus upon which to question and enrich the Western theories of economic geography and regional disparity. Based on field research analysis of geographic characteristics and regression models this book illustrates how Guangdong's impressive development record has been marred by its rising regional disparity. It investigates the main causes of this disparity and draws conclusions regarding the lessons China can learn from it. *Economic Development and Inequality in China* will be of interest to students and scholars of Chinese economics, Chinese regional studies, economic geography and China Studies. Hong Yu is a Visiting Research Fellow at the National University of Singapore. His research interests lie in the field of regional economy. He is the author of a chapter on China's two delta regions in the book *China and The Global Economic Crisis*
