futures management and organization scholars are exposed to two dangers The first is the exaggeration of continuities and anachronism about the past The second is the projection of present ordinariness into the future So how can we describe long term processes of entrepreneurship accounting marketing finance information systems or innovation This edited volume gathers a team of leading interdisciplinary scholars inspired by process philosophy phenomenologies and critical schools After presenting issues debates and perspectives likely to inspire and guide historical description several examples of historical work in entrepreneurship accounting and organization studies are used to show situations in which researchers have had to tackle this resonance between ontology and methodology in their historiography It will be of great interest to scholars and students of management and organization studies
