**The Praeger Handbook of Faith-Based Schools in the United States, K-12** Thomas C. Hunt, James C.

Carper, 2012-08-06 Exploring a subject that is as important as it is divisive this two volume work offers the first current definitive work on the intricacies and issues relative to America's faith based schools The Praeger Handbook of Faith Based Schools in the United States K 12 is an indispensable study at a time when American education is increasingly considered through the lenses of race ethnicity gender and social class With contributions from an impressive array of experts the two volume work provides a historical overview of faith based schooling in the United States as well as a comprehensive treatment of each current faith based school tradition in the nation The first volume examines three types of faith based schools Protestant schools Jewish schools and Evangelical Protestant homeschooling The second volume focuses on Catholic Muslim and Orthodox schools and addresses critical issues common to faith based schools among them state and federal regulation and school choice as well as ethnic cultural confessional and practical factors Perhaps most importantly for those concerned with the questions and controversies that abound in U S education the handbook grapples with outcomes of faith based schooling and with the choices parents face as they consider educational options for their children **Religious**

Hunt, James Carper, 2017-12-15 First published in 1993 this volume is an extension and revision of the 1986 book entitled Religious Schools in America A Selected Bibliography This new version contains additional annotated bibliographies of the various denominational schools as well as discussing governmental relation to each setting in the years from 1985 to 1992 This version also covers Greek Orthodox and Muslim schools that were not part of the previous volume and includes a chapter on the growth of home schooling which is often influenced by religion Finally unlike the previous edition this book only considers religious schools rather than the religious aspect or function of public schooling Each section includes a short chapter followed by an extensive annotated bibliography making it a useful source for anyone looking for information in the area **Education for Hope** John E Hull, 2023-01-28 This book

traces the little known history of an alternative school system erected in Canada by post WWII Dutch Neo Calvinist immigrants In less than four decades this community established a kindergarten to university education system that extended from Ottawa Ontario to Victoria BC This remarkable tradition of education imagines the school as a dissident and transformational social institution While this book offers the narrative of faith based tradition of education the author makes a strong case that educators from diverse ideological backgrounds can learn important lessons from it about the implementation of an alternative educational vision teacher led curriculum reform and a self formative pedagogy To supplement this narrative the author also provides a separate set of theoretical discussions on key issues in school reform as well as his memoir as an educator and curriculum designer within this tradition [German Influences on Education in the United States to 1917](#) Henry Geitz, Jürgen Heideking, Jürgen Herbst, 1995-03-31 This volume summarizes recent scholarship

on German American relations in the field of education until World War I The articles prove the various influences of German scholarship and institutions on the development of the American system of education from kindergarten to university The book provides an overview for the benefit of scholars students and the interested general reader As a cooperative effort of German and American scholars the volume is intended to stimulate further exploration of these themes on both continents

*Educating Christian Teachers for Responsive Discipleship* Peter P. DeBoer, 1993 Five members of the Calvin College Center for Christian Scholarship 1991 1992 team present some creative and constructive proposals for changes that could occur in the teacher education programs of hundreds of church related colleges Theoretically committed to a biblical vision of responsive discipleship the authors sketch out 1 a curricular theory that encourages many sided encounters with created reality which stimulate varieties of student responses that should arise ultimately from a commitment of the heart 2 a collaborative model of teacher education that urges congruent values to be held by the local school school district and the teacher education college and 3 a curriculum that arises in part out of the laboratory of the classroom through the interaction of teacher and student in a school organized to develop collegiality among teachers and students where through the use of evaluative portfolios student teachers learn to be reflective practitioners of the art and craft of teaching Co published with the Institute for Christian Studies

Detwiler,1999     *Metaphors We Teach* By Dr. Ken Badley,Harro Walter Van Brummelen,2012-06-01 *Metaphors We Teach* By helps teachers reflect on how the metaphors they use to think about education shape what happens in their classrooms and in their schools Teaching and learning will differ in classrooms whose teachers think of students as plants to be nurtured from those who consider them as clay to be molded Students will be assessed differently if teachers think of assessment as a blessing and as justice instead of as measurement This volume examines dozens of such metaphors related to teaching and teachers learning and learners curriculum assessment gender and matters of spirituality and faith The book challenges teachers to embrace metaphors that fit their worldview and will improve teaching and learning in their classrooms     **Digital Life Together** David I. Smith,Kara Sevensma,Marjorie Terpstra,Steven McMullen,2020-05-05 Digital technologies loom large in the experience of today s students However parents teachers and school leaders have only started to take stock of the ramifications for teaching learning and faith Based on a three year in depth study of Christian schools *Digital Life Together* walks educators school leaders and parents through some of the big ideas that are hidden in our technology habits going beyond general arguments for or against digital devices to address the nuanced realities of Christian education in a twenty first century context

Pilgrims in Lotus Land Robert K. Burkinshaw,1995-05-05 Burkinshaw traces the growth of conservative Protestantism in British Columbia from its clashes with liberal Protestants in the early twentieth century through the post World War II years when a bewildering variety of smaller groups including Baptist and Pentecostal denominations as well as Mennonite Reformed and Evangelical Free churches became important to the 1970s when the majority of worshipping Protestants belonged to evangelical groups He examines the factors that made evangelicalism more adaptable to changes in the geographic ethnic and social distribution of the province s population and argues that while the evangelical movement in BC was influenced by American fundamentalism it was not simply an extension of the American campaign He also examines the impact of evangelicals on provincial politics most particularly their role in the rise of the Social Credit Party Burkinshaw provides a wealth of new information on the phenomenon of twentieth century evangelicalism and challenges us to rethink the nature of religious conservatism     Journal of Presbyterian History ,1999     **Standing on the Premises of God** Fritz Detwiler,1999-12 The Christian Right is arguably the most significant social movement in the United States today In recent years these religious conservatives have loudly protested a public education system they believe no longer represents their interests or values Educators often dismiss critiques based on religious values as irrational or flimsy failing to appreciate the coherence of these criticisms from the Christian Right s own perspective While the Christian Right has become ever more sophisticated in its lobbying and powerful in its influence educators and parents find themselves lacking the background

knowledge necessary to respond effectively to its efforts Standing on the Premises of God speaks directly to this dilemma explaining current incarnations of the Christian Right its leadership its intellectual and theological foundations and its tactics so that those interested in the debates over education will be better prepared to engage them constructively Taking the novel approach of framing the Christian Right as a revitalization movement Detwiler shows how it seeks to effect cultural transformation in order to bring public education and our society more generally in line with its worldview His theoretical model provides insights into why education is so pivotal to the Christian Right and also assesses the religious viability of the Christian Right as a social movement

*What Teachers Need to Know* Matthew Bruce Etherington, 2017-03-31 Every generation has sought to make teaching and learning more inclusive and equitable but pesky questions always remain such as how can teaching and learning be conducted in ways that satisfies and respects everyone What are the parameters of an inclusive pedagogy Who defines its principles How should these principles be taught and by whom And by what authority shall they be grounded These types of thorny questions occupy the essence of educators and the authors of this book This book is about teachers educators and topics related to inclusion Teachers and educators have a lot to know therefore the topics are broad and relevant to the times What should teachers know about special needs religion and spirituality Aboriginality the environment tolerance and school choice Although teachers have knowledge of their subject matter knowledge alone is not sufficient They must know and understand how people learn A teacher must also care deeply about who they teach And this teacher knowledge grows and changes over time as teachers become more experienced informed skilled and wiser At the same time no teacher preparation will be sufficient because there will always be discussions that were never had and knowledge that was never shared Time has its costs and there is only so much a formal education can prepare someone This book helps to satisfy a cavity in learning for teachers and educators in general
