Collins, 2009-09-14 The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology chemistry and medicine assembled to present papers and discuss results The Novartis Foundation originally known as the Ciba Foundation is well known to scientists and clinicians around the world

Individual Learners W. Ray Crozier, 2013-04-03 No two learners are the same They take different approaches to learning tasks and they respond to formal education in different ways Yet the current emphasis in education is on what is common to learners from a common curriculum to a common teaching method Individual Learners reviews and discusses recent research that shows that differences in personality contribute significantly to children's and adults' experiences of success and failure in education Individual Learners considers fundamental issues in the study of personality and provides an up to date review and evaluation of the continuing nature nurture debate It then examines five traits that can have an impact upon learning aggressiveness anxiety achievement motivation self confidence and shyness The book provides an accessible account of the recent research into the links between personality and education and its implications for educational practice It will be invaluable to anyone with an interest in education whether students teachers or lecturers

The Study of Temperament Robert Plomin, Judy Dunn, 2013-08-21 First Published in 1986 The modern history of temperament research began in the late 1950s with the New York Longitudinal Study Twenty five years later temperament has become a major focus of research on early developing emotional and social traits The impetus for this growth in temperament research stems from the merging of several shifts in child development research from a view of the child as passive to a model of the child as an active transacting partner with the environment increasing interest in individual differences in development an expansion of research on emotional and social development and a clear change from an exclusive reliance on environmental explanations of developmental differences to a more balanced perspective that recognizes the possibility of biological as well as environmental influences Most stimulating is the multidisciplinary flavor of temperament research clinicians infancy researchers cultural anthropologists and behavioral geneticists have each for their own reasons been drawn to the study of temperament Each of these fields is represented in the present volume which provides the first overview of the growing field of temperament

Early Influences Shaping The Individual Spyros Doxiadis, 2013-03-09 Temperament in Clinical Practice Stella Chess, 1995-05-01 This book offers a realistic and eminently practical understanding of the role temperament plays in development The combination of wisdom common sense and concrete clinical strategies found in these pages will prove invaluable to psychiatric and health professionals teachers and special educators It also serves as a benchmark text for advanced courses in child psychology and psychiatry *Family Matters* Peter Reder, Mike McClure, Anthony Jolley, 2005-08-19 Family Matters focuses on research and clinical material which bridges the traditional gap between child

and adult mental health Rather than considering child and adult problems separately the authors address the often complex interactions between the two covering such topics as The implications of childhood trauma in later life The impact of parental mental health problems on children How interactions within a family can affect the mental health of all individuals within the family The authors review existing research and cover their own recent studies and practical experience and put forward new theoretical models to underpin their recommendations for changes in practice such as liaison initiatives between child and adult services and specialised services to treat adolescents parenting breakdown and perinatal psychiatric illness The findings and recommendations in Family Matters have important implications for the organisation and funding of mental health and related services and staff training and should be read by all those in professions concerned with child and adult mental health including psychiatrists family therapists psychotherapists nurses health visitors and social workers and health service managers

Handbook of Clinical Assessment of Children and Adolescents Clarice Kestenbaum, Daniel T. Williams, 1992-05 This essential reference book is must reading for mental health professionals who assess and treat children and adolescents Comprehensive detailed clearly written and innovative it presents the approaches of the leading clinicians in their fields

Galen's Prophecy Jerome Kagan, 2018-10-08 Nearly two thousand years ago a physician named Galen of Pergamon suggested that much of the variation in human behavior could be explained by an individual's temperament Since that time inborn dispositions have fallen in and out of favor Based on fifteen years of research Galen's Prophecy now provides fresh insights into these complex questions offering startling new evidence to support Galen's ancient classification of melancholic and sanguine adults Integrating evidence and ideas from biology philosophy and psychology Jerome Kagan examines the implications of the idea of temperament for aggressive behavior conscience psychopathology and the degree to which each of us can be expected to control our deepest emotions

Assessment of Young Developmentally Disabled Children Theodore D. Wachs, Robert Sheehan, 2013-06-29 Our knowledge of the cognitive and social emotional functioning of developmentally disabled infants and preschoolers derives in large part from our assessment of such children This book has been developed to familiarize readers with the characteristics of developmentally disabled children and to introduce to readers aspects of measurement that are of relevance to the assessment of atypical infants and preschoolers The book has been developed with clinicians and prospective clinicians in mind These are individuals who are committed to the care and education of developmentally disabled infants and preschoolers and the families of those children The book has thus been written to provide support for the use of assessment data in planning early intervention programs Of special note in the development of this edited book is that it is divided into four major parts with interrelated chapters in each part The authors of chapters in Parts II and III had access to the chapters in Part I before writing their chapters The summary chapters found in Part IV were similarly written by authors having access to all chapters in Parts I-III This approach to the development of an edited book was chosen as a way of ensuring an integration of major concepts throughout the book This process is also a

reflection of our belief that assessment is an interdisciplinary process involving the synthesis of a number of diverse interests

Parents, Children, and Adolescents Anne Marie Ambert, 2020-12-18 *Parents Children and Adolescents* presents an integrative perspective of the parent child relationship within several contexts You can expand your empirical and theoretical knowledge of the parent child relationship and child development through the book's unusually holistic theoretical perspective that integrates three main frameworks interactional theories on parents children and development contextual ecological models and behavior genetics This insightful book's empirical scope is broader than that of most books in that it considers the parent child relationship throughout the life course as well as within a great variety of contexts including interactions with sibling and peers at school in their neighborhoods and with professionals You'll gain immeasurable knowledge about parents child rearing styles and how they are affected by environmental variables the interaction between parents and children and between their personalities behavior genetics as one of the explanatory frameworks for the role of genetics and environment negative child outcomes emotional problems conduct disorders and delinquency poverty and other stressors affecting parents and children problematic abusive emotionally disturbed alcoholic parents siblings and peers as contexts for the parent child dyad the effect of the school system on the family with a focus on minority families family structure divorce remarriage and families headed by never married mothers adolescent mothers and their own mothers the psychogenetic limitations on parental influence and cultural roadblocks to parental moral authority Complete with an Instructor's Manual *Parents Children and Adolescents* is ideal for advanced undergraduate and graduate classes in family studies and human development sociology of the family interdisciplinary developmental psychology and social work classes that need a thorough perspective on the parent child relationship Professionals and scholars in these fields seeking an interdisciplinary framework as well as research suggestions and incisive critiques of traditional perspectives will also find this innovative book a valuable addition to their reading lists

Origins and Evolution of

Behavior Disorders Stella Chess, Alexander Thomas, 1987 Beginning in 1956 Stella Chess and Alexander Thomas tracked the lives of 133 children from infancy to young adulthood examining in detail their psychological development over a twenty five year period The result was the groundbreaking New York Longitudinal Study This book first published in 1984 presents a complete report of the study including analyses of the data and exploration of such fundamental questions as gender differences antecedents of adult behavior patterns and factors that contribute to depression and other disorders Special emphasis is given to the clinical evaluation and treatment of patients with behavioral abnormalities The authors discuss key findings the important role of parental guidance the continuities and discontinuities across developmental stages the crucial effects of temperament on psychological development and the usefulness of a goodness of fit model for understanding the relationship between person and environment and for describing the evolution of behavior disorders
