lives of this important growing population Fractured Generations Allan C. Carlson, 2018-01-18 Fifty years ago the phrase family policy was rarely heard in America Individual states maintained laws governing marriage divorce education inheritance and child protection which regulated the formation childrearing practices and dissolution of families However these scattered policy issues were not seen as closely related Until the 1960s the nuclear family was an institution that was part of the natural life course expected of most adults Family meant marriage children the establishment of a home care of the elderly but perhaps most of all bonding of the generations As early as the 1840s certain elements of states policies hinted at a weakening family structure but not until the 1960s was the family openly attacked Feminists objected to a male oriented home economy demographers encouraged negative population growth the sexual revolution was on the rise and religiously grounded morality in public life was challenged in the federal courts Married couples with children had to shoulder a larger tax burden further discouraging people from building and maintaining families Perhaps because family was so central to the founders lives they found no need to mention it in the Constitution But today generational bonds have fractured while family policy is a paramount public concern As Allan Carlson makes clear no nation can progress or even survive without a durable family system Contemporary family policy represents an attempt to counter the negative forces of the last four decades so as to restore the natural family to its necessary place in American life Fractured Generations chapters follow the life course of the human family marriage the birth of children infant and toddler care schooling building a home crafting a durable family economy and elder care This is a passionate and well reasoned appeal for a return to the institution that is the last best hope for America s future the family *Special Problems in Long-term Care* United States. sector is much debated More fundamentally one might ask exactly what is regulation why is it needed how is it formulated and how is it enforced These questions are especially relevant at a time in United States history when federal involvement in spheres traditionally left to individuals is being widely debated on all sides of the political spectrum
