New Age Materials and Construction

TENSILE STRUCTURES

- The term tensile structures describes the category of buildings in which the **load bearing capacity is achieved through tension stress** in the majority of the components, such as cables, technical fabrics or foils.
- It can also be defined as a structure where the **exterior shell is a fabric material spread over a framework**. The fabric is maintained in tension in all directions to provide stability.
- The only exception is represented by rigid boundaries and structural members which are generally subjected to

Optimization of Finite Dimensional Structures Makoto Ohsaki,2016-04-19 Originally developed for mechanical and aeronautical engineering structural optimization is not so easily applied to civil and architectural engineering as structures in these fields are not mass products but more often unique structures planned in accordance with specific design requirements The shape and geometry of such structures are determined by the design process Building Knowledge, Constructing Histories, volume 2 Ine Wouters,Stephanie Voorde,Inge Bertels,Bernard Espion,Krista Jonge,Denis Zastavni,2018-07-11 Building Knowledge Constructing Histories brings together the papers presented at the Sixth International Congress on Construction History 6ICCH Brussels Belgium 9 13 July 2018 The contributions present the latest research in the field of construction history covering themes such as Building actors Building materials The process of building Structural theory and analysis Building services and techniques Socio cultural aspects Knowledge transfer The discipline of Construction History The papers cover various types of buildings and structures from ancient times to the 21st century from all over the world In addition thematic papers address specific themes and highlight new directions in construction history research fostering transnational and interdisciplinary collaboration Building Knowledge Constructing Histories is a must have for academics scientists building conservators architects historians engineers designers contractors and other professionals involved or interested in the field of construction history This is volume 2 of the book set **Tensile Structures; Design, Structure, and Calculation of**

Buildings of Cables, Nets, and Membranes Frei Otto,1973 *Tension Structures* Wanda J. Lewis,2003 The tension structures discussed in this book are predominantly roofing forms created from pre stressed cable nets cable trusses and continuous membranes fabric structures A unique feature in their design is form finding an interactive process of defining the shape of a structure under tension The book discusses the role of stable minimal surfaces minimum energy forms occurring in natural objects such as soap films in finding optimal shapes of membrane and cable structures The discussion of

form finding is extended to structural forms whose shape is supposedly known such as suspension bridge cables Tensile Structures; Design, Structure, and Calculation of Buildings of Cables, Nets, and Membranes: Otto, F.
