Why Men Won't Ask for Directions Richard C. Francis, 2013-12-03 Much of the evolutionary biology that has grabbed headlines in recent years has sprung from the efforts of sociobiologists and evolutionary psychologists to explain sexual features and behavior even differences between how men and women think as evolutionary adaptations They have looked to the forces of natural selection to explain everything from the mimicry of male mockingbirds to female orgasms among humans In this

controversial book Richard Francis argues that the utility of this approach is greatly exaggerated. He proposes instead a powerful alternative rooted in the latest findings in evolutionary biology as well as research on the workings of our brains, genes, and hormones. Exploring various sexual phenomena, Francis exposes fundamental defects in sociobiology and evolutionary psychology which he traces to their misguided emphasis on why questions at the expense of how questions. Francis contends that this preoccupation with why questions such as 'Why won't men ask for directions?' results in a paranoid mindset and distorted evolutionary explanations. His alternative framework entails a broader conception of what constitutes an evolutionary explanation, one in which both evolutionary history as embodied in the tree of life and developmental processes are brought to the foreground. This alternative framework is also better grounded in basic biology. Deeply learned, consistently persuasive, and always engaging, this book is a welcome antidote to simplistic sociobiological exegeses of animal and human behavior.

Adaptive Mechanisms in the Ecology of Vision S. Archer, M.B. Djamgoz, E. Loew, J.C. Partridge, S. Vallerga, 2013-04-17 John Lythgoe was one of the pioneers of the Ecology of Vision, a subject that he ably delineated in his classic and inspirational book published some 20 years ago. 1. At heart, the original book aimed generally to identify interrelationships between vision, animal behaviour, and the environment. John Lythgoe excelled at identifying the interesting questions in the ecology of an animal that fitted the answers presented by an analysis of the visual system. Over the last twenty years, however, since Lythgoe's landmark publication, much progress has been made, and the field has broadened considerably. In particular, our understanding of the adaptive mechanisms underlying the ecology of vision has reached considerable depths, extending to the molecular dimension, partly as a result of development and application of new techniques. This complements the advances made in parallel in clinically oriented vision research. 2. The current book endeavours to review the progress made in the ecology of vision field by bringing together many of the major researchers presently active in the expanded subject area. The contents deal with theoretical and physical considerations of light and photoreception, present examples of visual system structure and function, and delve into aspects of visual behaviour and communication. Throughout the book, we have tried to emphasise one of the major themes to emerge within the ecology of vision: the high degree of adaptability that visual mechanisms are capable of undergoing in response to diverse and dynamic environments and behaviours.

Fatal Error F. Paul Wilson, 2010-10-12 Repairman Jack is one of my favorite characters. I'm full of happy anticipation every time I hold a new RJ novel in my hands. Charlaine Harris, creator of True Blood, The End of the World is at hand. Munir Habib's life has become a nightmare. His tormentor has warned Munir not to report the kidnapping of his family or else they will pay a terrible price. A friend realizes something is terribly wrong and tells Munir he doesn't have to go to the cops. There's a guy who fixes situations like this. Repairman Jack. Jack is backed into helping Munir despite his ongoing involvement in the cosmic shadow war between the Ally and the Otherness. Or perhaps because of it. He's chafing at being forced into the defensive role of protecting the Lady, the physical embodiment of the consciousness of the planet Earth. Meanwhile the Septimus Order and the Kickers are seemingly working in concert on a plot to extinguish the Lady and open the way for the Otherness to take over our reality. To top it all off Dawn Pickering finally goes into labor and delivers a baby she only glimpses as it's whisked away and is terrified by what she sees. Later she's told the baby died but she doesn't believe it. Neither does Weezy. Neither does Jack. All these interlocking plots mean doom for humanity. But Jack never gives up or gives in.
