Cybersecurity Discourse in the United States Sean T. Lawson, 2019-12-05 This book examines the role of cyber doom rhetoric in the U S cybersecurity debate For more than two decades fear of cyber doom scenarios i.e. cyberattacks against critical infrastructure resulting in catastrophic physical social and economic impacts has been a persistent feature of the U S cybersecurity debate This is despite the fact that no cyberattack has come close to realizing such impacts This book argues that such scenarios are part of a broader rhetoric of cyber doom within the U S cybersecurity debate and takes a multidisciplinary approach that draws on research in history sociology communication psychology and political science It identifies a number of variations of cyber doom rhetoric then places them into a larger historical context assesses how realistic the fears expressed in such rhetoric are and finally draws out the policy implications of relying on these fears to structure our response to cybersecurity challenges The United States faces very real cybersecurity challenges that are nonetheless much less dramatic than what is implied in the rhetoric This book argues that relying on cyber doom rhetoric to frame our thinking about such threats is counterproductive and encourages us to develop ways of thinking and speaking about cybersecurity beyond cyber doom This book will be of much interest to students of cybersecurity foreign policy public administration national security and international relations in general

US Narratives of Nuclear Terrorism Since 9/11

David Seed,2019-04-06 This study examines the US fiction and related films which makes a series of interventions in the cultural debate over the threat of nuclear terrorism It traces the beginnings of this anxiety from the 1970s which increased during the 1990s after the collapse of the Soviet Union The traumatic events of 9 11 became a major reference point for this fiction which expressed the fear that of a second and worse 9 11 The study examines narratives of conspiracies which are detected and forestalled and of others which lead to the worst of all outcomes nuclear detonations sometimes delivered by suitcase nukes In some of these narratives the very fate of the nation hangs in the balance in the face of nuclear apocalypse The discussion considers cases of attacks by electromagnetic pulse EMP cyberterrorism and even bioterrorism Some of the authors examined are present or former politicians members of the CIA and former president Bill Clinton

The Future of War Lawrence Freedman,2017-10-10 An award winning military historian professor and political adviser delivers the definitive story of warfare in all its guises and applications showing what has driven and continues to drive this uniquely human form of political violence Questions about the future of war are a regular feature of political debate strategic analysis and popular fiction Where should we look for new dangers What cunning plans might an aggressor have in mind What are the best forms of defense How might peace be preserved or conflict resolved From the French rout at Sedan in 1870 to the relentless contemporary insurgencies in Iraq and Afghanistan Lawrence Freedman a world renowned military thinker reveals how most claims from the military futurists are wrong But they remain influential nonetheless Freedman shows how those who have imagined future war have often had an idealized notion of it as confined brief and decisive and have regularly taken insufficient account of the possibility of long wars hence the stubborn persistence of the idea of a knockout blow whether through a dashing land offensive nuclear first strike or cyberattack He also notes the lack of attention paid to civil wars until the West began to intervene in them during the 1990s and how the boundaries between peace and war between the military the civilian and the criminal are becoming increasingly blurred Freedman s account of a century and a half of warfare and the often misconceived thinking that precedes war is a challenge to hawks and doves alike and puts current strategic thinking into a bracing historical perspective
