**Ranch Life and the Hunting-Trail (Classic Reprint)** Theodore Roosevelt, 2017-11-23 Excerpt from Ranch Life and the Hunting Trail The country throughout this great Upper Missouri basin has a wonderful sameness of character and the rest of the arid belt lying to the southward is closely akin to it in its main features A traveler seeing it for the first time is especially struck by its look of parched barren desolation he can with difficulty believe that it will support cattle at all It is a region of light rainfall the grass is short and comparatively scanty there is no timber except along the beds of the streams and in many places there are alkali deserts where nothing grows but sage brush and cactus Now the land stretches out into level seemingly endless plains or into rolling prairies again it is broken by abrupt hills and deep winding valleys or else it is crossed by chains of buttes usually bare but often clad with a dense growth of dwarfed pines or gnarled stunted cedars The muddy rivers run in broad shallow beds which after heavy rainfalls are filled to the brim by the swollen torrents while in droughts the larger streams dwindle into sluggish trickles of clearer water and the smaller ones dry up entirely save in occasional deep pools All through the region except on the great Indian reservations there has been a scanty

and sparse settlement quite peculiar in its character In the forest the woodchopper comes first on the fertile prairies the granger is the pioneer but on the long stretching uplands Of the far West it is the men who guard and follow the horned herds that prepare the way for the settlers who come after The high plains of the Upper Missouri and its tributary rivers were first Opened and are still held by the stockmen and the whole civilization of the region has received the stamp of their marked and individual characteristics They were from the South not from the East although many men from the latter region came out along the great transcontinental railway lines and joined them in their northern migration About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
