slavery was against the law But while Augustus and his family were free they were poor and they depended on their garden and their chickens for food Augustus enjoyed helping his mom prepare meals for their family He dreamed of becoming a professional cook and when his mom suggested he may be able to make meals for the president one day Augustus didn't waste any time in making that dream a reality In 1820 when he was only twelve years old he set off for Washington DC He applied to work in the White House where the head cook offered him a job as a kitchen helper After five years of working hard Augustus or Gus was promoted to cook He went on to serve presidents James Monroe John Quincy Adams and Andrew Jackson During his time at the White House Augustus became an expert at making a popular egg based dessert He soon made an eggless version known to us today as ice cream and left the White House determined to make and sell the frozen treat to everyone not just the wealthy Gus headed back home to Philadelphia and in 1830 he opened his very own ice cream parlor He devised a way to keep the ice cream frozen so that it could be shipped and sold to other businesses Gus also began adding rock salt to the ice that he used to make his ice cream which made the mixture freeze more quickly This allowed him to speed up his production process He created more ice cream with new flavors and soon he was shipping product via train to places like New York City which was 100 miles away Gus's dream had come true and better yet he had brought smiles to many faces Shining a light on a little known visionary this inspiring picture book biography includes an afterword a list of sources and an easy to follow recipe so readers can make their own delicious ice cream

Developmental Perspectives on Metaphor Ellen Winner, 2017-09-05 Research on the development of metaphor abilities in children can be dated back as far as 1960 with Asch and Nerlove's pioneering study which concluded that children were unable to understand metaphors until middle or even late childhood However the study of metaphor in children did not take off until the 1970s research continued to show metaphor as a relatively late developing skill based on children's inability to paraphrase correctly metaphoric sentences presented out of any situational or narrative context In the past decade research into the development of figurative language has broadened considerably in scope Efforts have been underway to demonstrate the cognitive underpinnings of the ability to make sense of figurative language and to demonstrate the role of metaphor and its cousin analogy in the development of cognition Metaphor is now considered to be a central aspect of language and thought and thus a crucial variable in cognitive development The articles in this issue support the claim that no longer can any theory of language acquisition afford to ignore how children are able to recognize the distinction between what is said and what is meant and how they are able to grasp what is meant when people say things they do not mean
