The Idea Of China Myth And Theory In Geographic Thought:

The Idea of China Andrew L. March, 1974 *China, an Analytical Survey of Literature* United States. Department of the Army, 1978 The Buddha Party John Powers, 2017 The Buddha Party tells the story of how the People's Republic of China employs propaganda to define Tibetan Buddhist belief and sway opinion within the country and abroad The narrative they create is at odds with historical facts and deliberately misleading but John Powers argues it is widely believed by Han Chinese Most of China's leaders appear to deeply believe the official line regarding Tibet which resonates with Han notions of themselves as China's most advanced nationality and as a benevolent race that liberates and culturally uplifts minority peoples This in turn profoundly affects how the leadership interacts with their counterparts in other countries Powers's study focuses in particular on the government's patriotic education campaign an initiative that forces monks and nuns to participate in propaganda sessions and repeat official dogma Powers contextualizes this within a larger campaign to transform China's religions into patriotic systems that endorse Communist Party policies This book offers a powerful comprehensive examination of this ongoing phenomenon how it works and how Tibetans resist it **From War to Nationalism** Arthur Waldron, 2003-10-16 This book investigates the warlord period in China focusing on the pivotal year 1924 **"Race," Rights and the Law in the Supreme Court of Canada** James W. St.G. Walker, 2006-01-01 Four cases in which the legal issue was race that of a Chinese restaurant owner who was fined for employing a white woman a black man who was refused service in a bar a Jew who wanted to buy a cottage but was prevented by the property owners association and a Trinidadian of East Indian descent who was acceptable to the Canadian army but was rejected for immigration on grounds of race drawn from the period between 1914 and 1955 are intimately examined to explore the role of the Supreme Court of Canada and the law in the racialization of Canadian society With painstaking research into contemporary attitudes and practices Walker demonstrates that Supreme Court Justices were expressing the prevailing common sense about race in their legal decisions He shows that injustice on the grounds of race has been chronic in Canadian history and that the law itself was once instrumental in creating these circumstances The book concludes with a controversial discussion of current directions in Canadian law and their potential impact on Canada's future as a multicultural society **Oil and Water** Tom Cliff, 2016-06-10 Xinjiang is like Tibet one of China's autonomous regions Despite the overwhelming attention scholars and activists have given to Tibet Xinjiang has garnered relatively little attention Never a quiescent place however it has seen one uprising after another most recently in violent flare ups over the cultural repression and economic exclusion of the local Muslim Uyghurs Oil and Water by anthropologist and photographer Tom Cliff is the first book to turn the lens onto Han Chinese settlers Using ethnographic vignettes life histories and arresting photographs Cliff shows how large scale social and institutional structures historical narratives and national political imperatives have shaped the lives of ordinary Han settlers in Xinjiang The book weaves together the individual threads of life histories to show what it means to be Han in this frontier

zone Along the way Cliff makes a number of surprising points for example that the Communist Party is in fact more concerned with stability among the Han in frontier regions than Uyghur cooperation itself or that the frontier is simultaneously seen as backward and ahead in that it is the testing ground for policies and practices that may later be put to use in the core Most important by shifting the focus away from often studied state actions and Uyghur reactions and onto the daily experience of diverse Han settlers Oil and Water provides the first behind the scenes look into the colonial enterprise that China has tried to hide from the world since it took power sixty years ago

Passport to Peking Patrick Wright, 2010-10-28 This delightfully eclectic book part comedy part travelogue and part cultural history uncovers the story of the British delegations that were invited to China in 1954 a full eighteen years before President Nixon's more famous 1972 mission

Fateful Ties Gordon H. Chang, 2015-04-13 Americans look to China with fascination and fear unsure whether the rising Asian power is friend or foe but certain it will play a crucial role in America's future This is nothing new Gordon Chang says For centuries Americans have been convinced of China's importance to their own national destiny Fateful Ties draws on literature art biography popular culture and politics to trace America's long and varied preoccupation with China China has held a special place in the American imagination from colonial times when Jamestown settlers pursued a passage to the Pacific and Asia In the eighteenth and nineteenth centuries Americans plied a profitable trade in Chinese wares sought Chinese laborers to build the West and prized China's art and decor China was revered for its ancient culture but also drew Christian missionaries intent on saving souls in a heathen land Its vast markets beckoned expansionists even as its migrants were seen as a yellow peril that prompted the earliest immigration restrictions A staunch ally during World War II China was a dangerous adversary in the Cold War that followed In the post Mao era Americans again embraced China as a land of inexhaustible opportunity playing a central role in its economic rise Through portraits of entrepreneurs missionaries academics artists diplomats and activists Chang demonstrates how ideas about China have long been embedded in America's conception of itself and its own fate Fateful Ties provides valuable perspective on this complex international and intercultural relationship as America navigates an uncertain new era

Vancouver's Chinatown Kay J. Anderson, 1991-11-04 Anderson charts the construction of Chinatown in the minds and streets of the white community of Vancouver over a hundred year period She shows that Chinatown from the negative stereotyping of the late nineteenth and early twentieth centuries to its current status as an ethnic neighbourhood has been stamped by changing European ideologies of race and the hegemonic policies those ideas have shaped The very existence of the district is the result of a regime of cultural domination that continues to exist today Anderson clearly rejects the concept of race as a means of distinguishing between groups of human beings She points out that because the implicit acceptance of public beliefs about race affects the types of questions asked by researchers the issue of the ontological status of race is as critical for commentators on society as it is for scientists studying human variation Anderson applies this fresh approach toward the concept of race to a critical examination of popular media

and academic treatments of the Chinatown in Vancouver *Problems of Communism* ,1977 *Somewhere in Asia* Prue Torney-Parlicki,2000 From 1941 to 1975 as a series of military conflicts gripped Asia and the Pacific Australian journalism was dominated by war reporting from the region Torney Parlicki history U of Melbourne argues that the reporting went beyond the usual discussion of military strategy and in an important way *Beyond the Century of the Child* Willem Koops,Michael Zuckerman,2012-10-30 In 1900 Ellen Key wrote the international bestseller *The Century of the Child* In this enormously influential book she proposed that the world's children should be the central work of society during the twentieth century Although she never thought that her century of the child would become a reality in fact it had much more resonance than she could have imagined The idea of the child as a product of a protective and coddling society has given rise to major theories and arguments since Key's time For the past half century the study of the child has been dominated by two towering figures the psychologist Jean Piaget and the historian Philippe Ariès Interest in the subject has been driven in large measure by Ariès's argument that adults failed even to have a concept of childhood before the thirteenth century and that from the thirteenth century to the seventeenth there was an increasing childishness in the representations of children and an increasing separation between the adult world and that of the child Piaget proposed that children's logic and modes of thinking are entirely different from those of adults In the twentieth century this distance between the spheres of children and adults made possible the distinctive study of child development and also specific legislation to protect children from exploitation abuse and neglect Recent students of childhood have challenged the ideas those titans promoted they ask whether the distancing process has gone too far and has begun to reverse itself In a series of essays *Beyond the Century of the Child* considers the history of childhood from the Middle Ages to modern times from America and Europe to China and Japan bringing together leading psychologists and historians to question whether we unnecessarily infantilized children and unwittingly created a detrimental wall between the worlds of children and adults Together these scholars address the question whether a hundred years after Ellen Key wrote her international sensation the century of the child has in fact come to an end **Dynasties** Jeroen Duindam,2016 A vibrant and broad ranging study of dynastic power in the late medieval and early modern world *The Problem of a Chinese Aesthetic* Haun Saussy,1995-01-01 *The Problem of a Chinese Aesthetic* calls for and applies a new model of comparative literature one that instead of taking for granted the commensurability of traditions and texts gives incompatibility and contradiction their due Exposing contemporary literary theory to the risks of ancient Chinese literature and vice versa this book considers a linked series of case studies To what degree does the translation between languages and texts that we call comparative literature depend on allegory or translation within a single text or language The author offers an important new perspective on the reading of the *Shih ching* or *Book of Odes* and the question of allegory and metaphor in the Chinese poetic tradition *"Dividing the Realm in Order to Govern"* Ruth Mostern,2020-10-26 States are inherently and fundamentally geographical Sovereignty is based on control of territory This

book uses Song China to explain how a pre industrial regime organized itself spatially in order to exercise authority On more than a thousand occasions the Song court founded abolished promoted demoted and reordered jurisdictions in an attempt to maximize the effectiveness of limited resources in a climate of shifting priorities to placate competing constituencies and to address military and economic crises Spatial transformations in the Song field administration changed the geography of commerce taxation revenue accumulation warfare foreign relations and social organization and even determined the terms of debates about imperial power The chronology of tenth century imperial consolidation eleventh century political reform and twelfth century localism traced in this book is a familiar one But by detailing the relationship between the court and local administration this book complicates the received paradigm of Song centralization and decentralization Song frontier policies formed a coherent imperial approach to administering peripheral regions with inaccessible resources and limited infrastructure And the well known events of the Song wars and reforms were often responses to long term spatial and demographic change

History As Propaganda John Powers, 2004-10-14 Despite Chinese efforts to stop foreign countries from granting him visas the Dalai Lama has become one of the most recognizable and best loved people on the planet drawing enormous crowds wherever he goes By contrast China's charismatically challenged leaders attract crowds of protestors waving Tibetan flags and shouting Free Tibet whenever they visit foreign countries By now most Westerners probably think they understand the political situation in Tibet But John Powers argues most Western scholars of Tibet evince a bias in favor of one side or the other in this continuing struggle Some of the most emotionally charged rhetoric says Powers is found in studies of Tibetan history narratives
