Wong,1999 This book examines the fundamental role of politics in funding our public schools and fills a conceptual imbalance in the current literature in school finance and educational policy Unlike those who are primarily concerned about cost efficiency Kenneth Wong specifies how resources are allocated for what purposes at different levels of the government In contrast to those who focus on litigation as a way to reduce funding gaps he underscores institutional stalemate and the lack of political will to act as important factors that affect legislative deadlock in school finance reform Wong defines how politics has sustained various types of rules that affect the allocation of resources at the federal state and local level While these rules have been remarkably stable over the past twenty to thirty years they have often worked at cross purposes by fragmenting policy and constraining the education process at schools with the greatest needs Wong s examination is shaped by several questions How do these rules come about What role does politics play in retention of the rules Do the federal state and local governments espouse different policies In what ways do these policies operate at cross purposes How do they affect educational opportunities Do the policies cohere in ways that promote better and more equitable student outcomes Wong concludes that the five types of entrenched rules for resource allocation are rooted in existing governance arrangements and seemingly impervious to partisan shifts interest group pressures and constitutional challenge And because these rules foster policy fragmentation and embody initiatives out of step with the performance based reform agenda of the 1990s the outlook for positive change in public education is uncertain unless fairly radical approaches are employed Wong also analyzes four allocative reform models two based on the assumption that existing political structures are unlikely to change and two that seek to empower actors at the school level The two models for systemwide restructuring aimed at intergovernmental coordination and or integrated governance would seek to clarify responsibilities for public education among federal state and local authorities above all integrating political and educational accountability The other two models identified by Wong shift control from state and district to the school one based on local leadership and the other based on market forces In discussing the guiding principles

of the four models Wong takes care to identify both the potential and limitations of each Written with a broad policy audience in mind Wong s book should appeal to professionals interested in the politics of educational reform and to teachers of courses dealing with educational policy and administration and intergovernmental relations Direct Democracy and the Courts
Kenneth P. Miller, 2009-08-31 Who should have the last word on fundamental policy issues This book analyzes the rise of two contenders the people through direct democracy and the courts Now available in nearly half the states direct democracy has surged in recent decades Through ballot measures voters have slashed taxes mandated government spending imposed term limits on elected officials enacted campaign finance reform barred affirmative action banned same sex marriage and adopted many other controversial laws In several states citizens now bypass legislatures to make the most important policy decisions However the people s rule is not absolute This book demonstrates that courts have used an expanding power of judicial review to invalidate citizen enacted laws at remarkably high rates The resulting conflict between the people and the courts threatens to produce a popular backlash against judges and raises profound questions about the proper scope of popular sovereignty and judicial power in a constitutional system Chicago Bar Record ,1970
