Architecture in the Age of Pornography Nadir Lahiji, 2021-09-30 Architecture and its pedagogy in the academy is dominated by the technology of image production that veils the naked power behind its operation It conforms to the principles of cultural logic of the society of the spectacle consistent with neoliberal capitalism The problem with this dominant pedagogy is that it violates the fundamental ethical imperative putting architecture in direct contradiction with the common good In addition it has let architecture enter the brothel of pornographic capitalism which turns every object into an object of obscene gratification of the senses In this book Nadir Lahiji adopts Alain Badiou's thesis from *The Pornographic Age* to demonstrate that contemporary architecture is in absolute complicity with the pornographic present The traits that Badiou identifies in this age are manifestly visible in architectural surfaces which are subordinated to the same regime of images Similarly to Badiou's political indictments of the society which has given rise to the pornographic present the book condemns the architecture that has lent its service to the same society with a license to consummate its transgression to better cater to the imperative of the regime of images Transposing the conceptual categories in Badiou's analysis to the critique of architecture

s pornographic turn in contemporary society the book constructs a conceptual framework by which to demonstrate the specific manifestations of pornography in building The book is aimed at architecture students at higher graduate and post graduate levels

Climate Change in the Age of Artificial Intelligence Alexandru Balasescu, 2025-06-14 This book invites the reader to follow seemingly unrelated paths towards the same goal making sense of what it means to be human in a world that casually blends discourses on nature technology and biology with ideas of progress optimization and their capitalization at the centre The author critically analyses current thinking which often looks at technological solutions to the challenges posed by climate change and where artificial intelligence is instrumental in fulfilling the promise of ecological capitalism He instead advocates that we take a closer look at the politics of optimization within and outside managerial perspectives which could reveal that one of the main sources of our repeated failures related to governance and climate change lies not intrinsically in the qualities of the tools we use but in the underlying assumptions with which we design and in the scope of their use Therefore the book looks at possible solutions for humanity that may lie between the rock of technology and the hard place of nature That is it asks for a revision in our implicit assumptions for building our tools critiques the thinking about our relationships with them and re assesses their use Richly documented imaginatively argued and captivatingly written this book explores unexpected entanglements of nature culture and technology that emerge in A I s unruly and unforeseen trajectories George Paul Meiu Professor of Anthropology University of Basel Balasescu develops wide ranging thick descriptions that provocatively draw together lotus flowers and data banks snakes and algorithms to delve into how bodies cultures and power are invisibly ensconced in every aspect of the digital realm Susan Ossman Distinguished Professor of Anthropology University of California Riverside This important work traces the evolution and development of the

Stove, Stove was undoubtedly the most stylish and witty writer of all philosophers of the last one hundred years if not of all time When it comes to attacking the absurdities of twentieth century intellectual movements no one else came close and certainly no one else was as funny The greatest iconoclast of the twentieth century we can now see in retrospect was not any of the European avant garde most of whom in fact epitomized the spirit of the century perfectly but this no nonsense Australian His greatest contributions were in the philosophy of science in particular in his defense of inductive reasoning and in his attack on the sort of irrationalism manifested by his four horsemen Popper Kuhn Lakatos and Feyerabend The Review of Metaphysics A self proclaimed neo positivist and a brilliant truculent cantankerous essayist Stove attacks everything from contemporary philosophy of science and evolutionary theory to religious belief and intellectual equality of women The Weekly Standard What separates Stove from your average angry eyed reactionary is the startling brilliant way that he argues combining plain horse sense with the most nimble and skillful philosophical reasoning this side of Hume along with a breathtaking wit Partisan Review An early fearless sometimes reckless combatant in the science and culture wars Stove fought wittily and two fistedly on the side of empirical realism Choice Little known outside his native Australia David Stove was one of the most illuminating and brilliant philosophical essayists of the postwar era A fearless attacker of intellectual and cultural orthodoxies Stove left powerful critiques of scientific irrationalism Darwinian theories of human behavior and philosophical idealism Stove's writing is both rigorous and immensely readable It is in the words of Roger Kimball an invigorating blend of analytic lucidity mordant humor and an amount of common sense too great to be called common Whether the subject is race feminism the Enlightenment or the demand for non coercive philosophy Stove is on the mark with a battery of impressive arguments expressed in sharp uncompromising prose *Against the Idols of the Age* concludes with a generous sampling of his blistering attacks on Darwinism David Stove 1927 1994 taught philosophy at the University of New South Wales and until his retirement in 1988 at the University of Sydney He was the author of numerous essays articles and several books including *Anything Goes* *Origins of the Cult of Scientific Irrationalism* *The Plato Cult and Other Intellectual Follies* and two posthumously published volumes *Darwinian Fairytales* and *Cricket versus Republicanism* Roger Kimball is managing editor of the *New Criterion* and an art critic for the *London Spectator* He is author of *Tenured Radicals* newly revised and expanded *The Long March* *How the Cultural Revolution of the 1960s Changed America* and most recently *Experiments Against Reality* *The Fate of Culture in the Postmodern Age* **Railway Age**, 1954 *The Age of Spectacular Death* Michael Hviid Jacobsen, 2020-09-08 This book explores death in contemporary society or more precisely in the
