Boulding,2003-01-01 Boulding discusses the image as the key to understanding society and human behavior *The Power of Self* LeNora Millen,2012-01-18 The Power of Self once natural and intimate to man speaks of the internal flame burning with the intensity of a time when humankind embraced power with a force that speaks to God and nature It was natural for man to breathe the energy of the gods into the lungs as the evolving of thought manifested upon man's entire existence Also bestowed upon man was enlightenment which on occasion was re-ignited to conquer and consume darkness of thought In the midst of standing within the shadows of doubt and fear the light that resonated inward was set free upon the soil from which thought springs forth Within the vastness of the universe nature taunts man to reconnect to a forgotten power as the

fluttering wings of the butterfly soaring above the winds of change is likened to the phoenix rising from the ashes only to emerge with renewed spirit and hope Whispers of generations past tap into the conscious of a people connected to all that is in the stillness of the moment they await another sign Foretelling of things to come within the skies the rainforest echoes the cries of the ancestors warnings They communicate telepathically no words spoken the energy spoke for them instead Connecting with nature while giving homage to the trees firmly rooted within the earth's surface the spark within man began to dim the I am would venture deep within the psyche of man Why and how did man lose touch with the essence of such a powerful inner strength Is it possible to transform thinking to connect to the I am The Power of Self is not just a book about transforming and evolving this book is about intimacy with self far beyond merely knowing self which is key to becoming more aware and self empowered

Social Imaginary and the Metaphysical Discourse Christoforos Bouzanis, 2023-05-05 This book departs from approaches to truth in social science and ideas in philosophy that connect truth to the ability of language to fulfil certain real world conditions of objectivity Pointing to an extra linguistic level in our cognition at which scientific creativity occurs it highlights the manner in which epistemic communities share work on and modify not only the world imaginaries that they endorse but also those world views that they reject or which partially overlap with their own Through the concept of the social imaginary the author explores the theoretical interrelations among various metaphysical world imageries by which we organise our scientific understanding of the world and our expectations of experience thus shedding

light on the manner in which social ontology can inform our practices of sharing belief A study at the intersection of metaphysics and social theory The Fundamental Predicament of Contemporary Philosophy and the Social Sciences will appeal to scholars of sociology and philosophy with interests in questions of ontology and epistemology **Curriculum Windows Redux** Thomas S. Poetter,Kelly Waldrop,Syed Hassan Raza,2022-08-01 Curriculum Windows Redux What Curriculum Theorists Can Teach Us about Schools and Society Today is an effort by students of curriculum studies along with their professor to interpret and understand curriculum texts and theorists in contemporary terms The authors explore how key books authors from the curriculum field illuminate new possibilities forward for us as scholar educators today How might the theories practices and ideas wrapped up in these curriculum texts still resonate with us allow us to see backward in time and forward in time all at the same time How might these figurative windows of insight thought ideas fantasy and fancy make us think differently about curriculum teaching learning students education leadership and schools Further how might they help us see more clearly even perhaps put us on a path to correct the mistakes and missteps of intervening decades and of today The authors complete the Curriculum Windows series with this 7th book Redux providing a scholarly view of 33 books that should have been treated in the first 6 books based on the decades of the 1950s 2000s The book s Foreword is by renowned curriculum theorist William H Schubert **Bulletin** United States. and presents a model of the browsing process **The Sociological Inheritance of the 1960s** Jiří Šubrt, 2023-11-27 The 1960s saw pioneering changes in the realms of international politics science culture and art Turning this historical lens onto the study of sociology this book reveals both the continuities and the departures the field has seen in its core principles and approaches over the past several decades **Communication at A Distance** David S. Kaufer, Kathleen M. Carley, 2012-10-12 This book bridges an important gap between two major approaches to mass communication historical and social scientific To do so it employs a theory of communication that unifies social cultural and technological concerns into a systematic and formal framework that is then used to examine the impact of print within the larger socio cultural context and across multiple historical contexts The authors integrate historical studies and more abstract formal representations achieving a set of logically coherent and well delimited hypotheses that invite further exploration both historically and experimentally A second gap that the book addresses is in the area of formal models of communication and diffusion Such models typically assume a homogeneous population and a communication whose message is abstracted from the complexities of language processing In contrast the model presented in this book treats the population as heterogeneous and communications as potentially variable in their content as they move across speakers or readers Written to address and overcome many of the disciplinary divisions that have prevented the study of print from being approached from the perspective of a unified theory this book employs a focused interdisciplinary position that encompasses several domains It shows the underlying compatibility between cognitive and social theory between the study of language and cognition and the study of technology between the postmodern interest in the instability of meaning and the social science interest in the diffusion of information between the effects of technology and issues of cultural homogeneity and heterogeneity Overall this book reveals how small relatively non interactive disciplinary specific conversations about print are usefully conceived of as part of a larger interdisciplinary inquiry
