This key work in the field draws on a broad spectrum of molecular biologic biochemical and immunogenetic approaches in combination with human and murine in vitro cell culture and in vivo model systems to address questions in mucosal immunity Humans produce more immunoglobulin A IgA than all other antibody isotypes combined This book is designed to serve as a concise reference of the present knowledge of the biology of IgA Suppressor Cells and Their Factors Randall S.

Krakauer, 2018-01-18 It has only been a short time since the existence of suppressor cells was demonstrated yet in this period

of time a great deal of information has been compiled concerning their basic science and their functions or disordered functions in human disease This volume is an attempt to clarify the immune mechanisms through which these cells act their normal functions and how their functions are disordered in certain disease states In this volume some rational approaches are proposed to therapy of diseases perceived at least partially due to disordered immune regulation Particular focus is on the recently emerging field of soluble suppressor factors as a means of providing adoptive immunotherapy in certain situations I hope that future work in this field will justify the confidence in this approach
