McKeon,2017-02-09 As a philosopher Richard McKeon spent his career developing Pragmatism in a new key specifically by tracing the ways in which philosophic problems arise in fields other than philosophy across the natural and social sciences and aesthetics and showed the ways in which any problem pushed back to its beginning or taken to its end is a philosophic problem The roots of this book *On Knowing The Social Sciences* are traced to McKeon s classes where he blended philosophy with physics ethics politics history and aesthetics This volume the second in a series leaves behind natural science themes to embrace freedom power and history which McKeon argues lay out the whole field of human action The authors McKeon considers Hobbes Machiavelli Spinoza Kant and J S Mill show brilliantly how philosophic methods work in action via analyses that do not merely reduce or deconstruct meaning but enhance those texts by reconnecting them to the active history of philosophy and to problems of ethics politics and history The waves of modernism and post modernism are receding Philosophic pluralism is now available fully formulated in McKeon s work spreading from the humanities to the social sciences      **A History of Science Technology and Philosophy in the 18th Century** Abraham Wolf,2019-04-23 Published in 1938 The new volume presents a full and profusely illustrated account of progress made during the eighteenth century in Mathematics Mechanics Astronomy Physics Meteorology Geography Chemistry Biology Medicine Psychology Demography Economics Philosophy and Technology      **The Christian Science Journal** ,1917      [Paperbound Books in Print](#) ,1992      *Christian Science Sentinel* ,1906      **The Categorical Imperative of a Confucian Evil Demon in America** Jonathan L. imperative is the particular way this moral law is addressed to finite rational beings Kant and the Foundations of Morality provides new perspective on the philosopher's thought to benefit studies of eighteenth century philosophy epistemology modern philosophy moral theory moral philosophy and ethics **The Foundations of Philosophy** Michael Pol Macneil, 2025-06-03 This work is about philosophy and what makes a philosophy distinctively Christian in character arguing that it is indeed possible for philosophy to be conceived of as first Christian and not just philosophy done by people that happen to be Christians Christian philosophy is epistemologically self-conscious philosophy conducted in a manner honoring to the revelation of the Hebrew and Christian scriptures It is argued that philosophy should be transformative rather than just therapeutic or elucidatory The author examines competing philosophical and scientific accounts from both the empiricist and rationalist schools arguing they are coherent and successful only to the degree that they have imported consciously or unconsciously Christian transcendentals He then applies this insight to explore the character and practice of a Christian political philosophy **A Criticism of Some Deterministic Systems in Their Relation to Practical Problems ...** Jesse Herrmann, 1914 **Kant and the Systematicity of the Sciences** Gabriele Gava, Thomas Sturm, Achim Vesper, 2025-04-29 This book provides the first comprehensive discussion regarding the role that Kant ascribes to systematicity in the sciences It considers not only what Kant has to say on systematicity in general but also how the systematicity requirement for science is specified in different fields of knowledge The chapters are divided into three thematic sections Part I is devoted to historical context The chapters explore precursors of Kant's account of the systematicity of the sciences Part II addresses the application of systematicity to the special sciences cosmology physics chemistry logic mathematics the life sciences and history Finally Part III explores the systematicity of philosophy Kant and the Systematicity of the Sciences will be of interest to scholars and advanced students working on Kant and the history and philosophy of science **The Public Realm** Reiner Schurmann, 1988-12-08 This book offers a collection of essays in contemporary political philosophy from a wide range of Continental viewpoints The authors include some of the most prominent European and European-oriented philosophers and political thinkers of our day Two sections out of four focus on the debate between prescriptive and descriptive types of political thinking On the prescriptive or normative side Karl Otto Apel Robert Paul Wolff Robert Spaemann Hans Jonas and Jean-François Lyotard discuss current forms of legitimating political life via some ultimate grounding On the descriptive or phenomenological side Bernhard Waldenfels Michel Henry William J. Richardson Jürgen Link and Vincent Descombes argue that an understanding of praxis is always implied as one reaches insights into the life-world there is no need to either construe or set normative standards for action The remaining two sections deal with transcendental and institutional types of political philosophy respectively Manfred Riedel Stanley Rosen Thomas Seeböhm and Ludwig Siep develop Kant's search for a priori conditions in the public realm explicitly or implicitly they confront the ancient Greek with the modern Enlightenment conceptions of life in public Lastly Agnes Heller Alain Touraine Reinhart Koselleck and Bertram Schefold put to work many

ways of looking at the life of our institutions      **Kant's 'Critique of Pure Reason'** James Luchte, 2007-05-24 Continuum's Reader's Guides are clear, concise, and accessible introductions to classic works of philosophy.
