## **The Innovation Ethic:**

*Innovation Ethics* Roger Hunt, 2024-02-09 While entrepreneurship characterizes an ideal form of self sufficiency in practice entrepreneurs find themselves subject to a complex network of support systems which in effect exploit their talents resources and passion for structural risk mitigation This dynamic infrastructure composed of founders investors and service providers is not a necessary institution but rather the result of intersectional incentive structures managed by the professionalization of a process which is supposed to be anti professional This paradox should be addressed at a structural level if we hope to preserve the ideal of entrepreneurship Innovation Ethics proposes a solution where we reframe a regulatory metric away from optimization towards innovation through the redistribution of risk across the entrepreneurial ecosystem This solution finds support in a model of innovation ethics which we have designed to correct the over reliance on naturalistic models by stimulating a debate over how and even if innovation should proceed **The Innovation Ethic**

**Business Ethics of Innovation** Gerd Hanekamp, 2007-05-06 Firms that operate in a market economy often depend upon innovations in order to achieve competitive advantages that sustainably secure their survival Business ethics is thus largely concerned with questions about the decisional freedoms involved in innovation processes Innovations oftentimes raise novel questions about the role of the state or the structure of society Business ethics needs to provide a framework for balancing the different perspectives values and interests at stake This balance must be achieved at the level of the firm in order to facilitate adequate long term decisions but it should also be sought at higher including regulatory levels Achieving this balance will require an ethical framework for entrepreneurial action The particular disciplines engaged in generating innovations as well as all relevant fields of applied ethics should be involved in the balancing process Business Ethics of Innovation is thus necessarily an interdisciplinary endeavour This volume assesses general questions of how business ethics can help to structure innovations and specifically discusses pharmaceutical innovations as well as innovations in the IT sector
