The Hundredfold Problem John Grant, 2003-03-01 The story begins several million years ago when sentient machines from an alien civilization build a Dyson Sphere around the sun's Red Dwarf companion star which is why we've never seen it and seed the Sphere with Neanderthals Or maybe it begins in the future after terrestrial humanity has discovered the Sphere now called the Big Dunkin Donut colonized it and enslaved the natives Whatever the Donut is in peril Atheist fundamentalist preachers Rev Rick The Man Hamfist and Rev Bo No Messin Fingers inspired by dastardly Dennis the Complete Bloody Sadist are waging an evangelical war there with the aim of destroying the local very real goddess Korax Using a matter transmitter Earth sends holochips of two plucky adventurers to sort this out heavy weapons toting xeno anthropologist and scantily clad babe Petula McTavish and by the rules supercop Dave Knuckle But Knuckle's holochip is accidentally shattered on arrival into one hundred fragments which are reconstituted to form one hundred lethally diverse partial versions of the supercop McTavish now has a one hundredfold problem to solve Actually a hundred and one but that wouldn't have made as good a title And that's before she falls in love The Hundredfold Problem is that rarest of things a gloriously funny romp populated by outrageous larger than life characters that's also an extremely imaginative challenging sf novel [The Savage Amusement](#) David Bishop, 2015-08-12 It's election day in Mega City One and Judge Death is leading the polls He's running for mayor on the All Life is a Crime ticket But if the Psi Judges predictions are right the Big Meg may soon be a crime free zone Out on the streets the city's top lawman is doing his job A robot torturing maniac has taken over Weather Control but Judge Dredd can handle it Then he finds out a satellite housing development is heading straight to the ground and someone has let the supervillains out of iso block 666 Meanwhile a clone killing virus is spreading through the ranks of the Judges Even for Mega City One it's shaping up to be a bad day *Mathematical Problems in the Biological Sciences* Sol I. Philosophical Problems of Space and Time Adolf Grünbaum,2012-12-06 It is ten years since Adolf Grünbaum published the first edition of this book It was promptly recognized to be one of the few major works in the philosophy of the natural sciences of this generation In part this is so because Grünbaum has chosen a problem basic both to philosophy and to the natural sciences the nature of space and time and in part this is so because he so admirably exemplifies that Aristotelian devotion to the intimate and mutual dependence of actual science and philosophical understanding More than this however the quality of his work derives from his achievement in combining detail with scope The problems of space and time have been among the most difficult in contemporary and classical thought and Grünbaum has been responsible to the full depth and complexity of these difficulties This revised and enlarged second edition is a work in progress in the tradition of reflective analysis of modern science of such figures as Ehrenfest and Reichenbach In publishing this work among the Boston Studies in the Philosophy of Science we hope to contribute to and encourage that broad tradition of natural philosophy which is marked by the close collaboration of philosophers and scientists To this end we have published the proceedings of our Colloquia of meetings and conferences here and abroad as well as the works of single authors
