The Immortal Alphonse Daudet, 1900 The Immortal Lure Cale Young Rice, 1911 The Immortal Mind Ervin Laszlo, 2014-10-09 Scientific evidence for the continual presence of consciousness with or without connection to a living organism Examines findings on the survival of consciousness beyond life including near death experiences after death communication and reincarnation Explains how this correlates precisely with cutting edge physics theories on superstrings information fields and energy matrices Reveals how consciousness manifests in living beings to continue its evolution Evidence now points to consciousness existing beyond the brain such as when the brain is temporarily incapacitated as well as to the survival of consciousness after death Conventional science prefers to dismiss these findings because they cannot be accommodated by a materialist view of reality Spirituality and religion embrace the continuity of consciousness and ascribe it to a nonmaterial spirit or soul that is immortal As such spirituality religion and science continually find conflict in their views But what if there truly is no conflict Based on a new scientific paradigm in sync with experience based spirituality Ervin Laszlo and Anthony Peake explore how consciousness is continually present in the cosmos and can exist without connection to a living organism They examine the rapidly growing body of scientific evidence supporting the continuity of consciousness including near death experiences after death communication reincarnation and neurosensory information received in altered states They explain how the persistence of consciousness beyond the demise of the body means that in essence we are not mortal we continue to exist even when our physical existence has come to an end This correlates precisely with cutting edge physics which posits that things in our plane of time and space are not intrinsically real but are manifestations of a hidden dimension where they exist in the form of superstrings information fields

and energy matrices With proof that consciousness is basic to the cosmos and immortal in its deeper nonmanifest realm Laszlo and Peake reveal the purpose of consciousness is to manifest in living beings in order to continuously evolve
