Impact of Evolutionary Theory Russell Maatman,1991 *Essential Writings of Meredith G. Kline* Meredith G. Kline,2022-05-03 The scholarship of Meredith G Kline 1922 2007 was characterized by a very high view of Scripture a strong commitment to a Reformed view of biblical theology centered on covenant explication of the coherence of the Old and New Testaments and most of all a desire to focus the attention of both scholars and lay Christians on the centrality of Christ s redemptive work of justifying his people and imbuing them with his perfect righteousness Kline s writings are often quite creative and full of fresh insights thoroughly intellectual but also pastoral and they have provided many with the exciting energizing feeling that they are reading and understanding the biblical text and how Scripture in its entirety hangs together for the first time *Essential Writings of Meredith G Kline* presents sixteen articles that Meredith G Kline wrote over a period of forty years The articles display the unique creative and Christocentric way in which Kline interpreted the entire Bible They cover a range of topics thereby providing a good overview of Kline s scholarship Topics include covenant law and the state faith the gospel and justification redemption and resurrection and the consummation Pastors and scholars especially those in the Reformed community will be delighted by the fresh insights and wisdom and sometimes paradigm changing perspectives found in the pages of this book Meredith G Kline 1922 2007 was a professor of Old Testament for fifty five years teaching at four seminaries Westminster Theological Seminary in Philadelphia Gordon Conwell Theological Seminary Reformed Theological Seminary and Westminster Theological Seminary in California He was also an ordained minister in the Orthodox Presbyterian Church

Evolutionary Theory and Christian Belief David Lack,2013-04-15 Originally published in 1957 This book is concerned with the conflict between Darwinism as the Victorians called it and Christianity a conflict here re stated in modern terms because it so vitally affects our understanding of human nature and human values today The opening chapter describes the historical background There is a short account of evolution and the argument over Genesis The importance of natural selection is stressed and rival theories as to the means of animal evolution are criticised Discussions follow on whether the course of evolution has been random or determined on the argument from design death in nature the biologist s methods and the difficulties in evolutionary ethics *Journal of Biblical and Theological Studies, Issue 2.1* Daniel S. Diffey,Ryan A.

Brandt,Justin McLendon,2017-03-29 The *Journal of Biblical and Theological Studies* JBTS is an academic journal focused on the fields of Bible and Theology from an inter denominational point of view The journal is comprised of an editorial board of scholars that represent several academic institutions throughout the world JBTS is concerned with presenting high level original scholarship in an approachable way Academic journals are often written by scholars for other scholars They are technical in nature assuming a robust knowledge of the field There are fewer journals that seek to introduce biblical and theological scholarship that is also accessible to students JBTS seeks to provide high level scholarship and research to both

scholars and students which results in original scholarship that is readable and accessible As an inter denominational journal JBTS is broadly evangelical We accept contributions in all theological disciplines from any evangelical perspective In particular we encourage articles and book reviews within the fields of Old Testament New Testament Biblical Theology Church History Systematic Theology Practical Theology Philosophical Theology Philosophy and Ethics

Origins Ariel Adrean Roth,1998 Are the worlds of science and religion irreconcilable Has modern science with its theory of evolution disproved the biblical account of the origin of life If one accepts the biblical account of origins does one then have to reject science Scientist and Christian believer Ariel A Roth argues that taken together science and religion give us a more complete and sensible understanding of the world around us our place in it and our ultimate meaning and fate Roth examines such topics as the evidence for evolution and creation the Flood the strengths and limitations of the scientific method and the reliability of Scripture He concludes that the biblical model of a recent creation by God leaves fewer unanswered questions than either science s evolutionary model or any view between the two positions such as progressive creation or theistic evolution Back cover

Redeeming Science Vern S. Poythress,2006 By delving into the intricate and immutable laws of nature as well as opposing beliefs the author presents a Christian response to science that urges the world to pay tribute to the God who created nature and cares for it Original

The Philosophy of the Christian Curriculum R. J. Rushdoony,2012-10-17 The Christian School represents a break with humanistic education but too often in leaving the state school the Christian educator has carried the state s humanism with him A curriculum is not neutral it is either a course in humanism or training in a God centered faith and life The liberal

arts curriculum means literally that course which trains students in the arts of freedom This raises the key question is freedom in and of man or Christ The Christian art of freedom that is the Christian liberal arts curriculum is emphatically not the same as the humanistic one It is urgently necessary for Christian educators to rethink the meaning and nature of the curriculum It should be clear then that whether history science mathematics grammar literature ecology civic duty or law every aspect of curriculum must be reconstructed along Biblical lines The overall objective is for Christian families to prepare and equip themselves for service in the Kingdom of God and this cannot be done without a rethinking of the philosophy of the Christian curriculum In this study Rousas John Rushdoony develops the philosophy of the Christian curriculum It is the pioneering study in this field and it is important reading for all Christian educators **God, Heaven, and Har Magedon**

Meredith G. Kline, 2006-03-15 From the Author's Preface It could be this octogenarian's last book and there were several things I wanted to do One was to provide a primer in covenant theology Another was to make more accessible the gist of some of my previous biblio theological studies and to do so in a form serviceable to a wider readership than most of my publications The major move in this democratic direction was to enliven the analysis of the covenants by introducing the series of covenant administrations within the intriguing story line of Har Magedon the mountain of God Extending as it does from creation to consummation the tale of Har Magedon readily accommodates the total history of the covenants Moreover quite apart from such considerations the current state of secularized and dispensational versions of Armageddon fantastic fiction all makes a review of the biblical Har Magedon motif timely Though the covenants remain the theological foundation and heart of the matter by its adoption as our narrative framework Har Magedon becomes the dominant surface theme As we track this theme through the Scriptures we discover a recurring pattern an eschatological megastructure that appears in each of the typological world ages culminating respectively at mounts Ararat and Sinai Zion and then once again climactically in the antitypical New Covenant age This Har Magedon paradigm which shapes our telling of the covenantal tale consists in the following complex of elements establishment of a kingdom covenant by the Lord of Har Magedon a meritorious accomplishment by the covenant grantee triumphant in the Har Magedon conflict a common grace interim before the coming of the covenanted kingdom an antichrist crisis consummation of the Glory Kingdom through a last judgement victory of the covenant Lord in a final battle of Har Magedon If only in condensed digest fashion the present work is thus a comprehensive biblio theological survey of the kingdom of God from Eden to the New Jerusalem **Religious Dynamics under the**

Impact of Imperialism and Colonialism Björn Bentlage, Marion Eggert, Hans Martin Krämer, Stefan Reichmuth, 2016-10-11 This sourcebook offers rare insights into a formative period in the modern history of religions Throughout the late 19th and the early 20th centuries when commercial political and cultural contacts intensified worldwide politics and religions became ever more entangled This volume offers a wide range of translated source texts from all over Asia the Middle East and Europe thereby diminishing the difficulty of having to handle the plurality of involved languages and backgrounds The ways

in which the original authors some prominent and others little known thought about their own religion its place in the world and its relation to other religions allows for much needed insight into the shared and analogous challenges of an age dominated by imperialism and colonialism Evolution and Religion in American Education David E. Long,2011-08-03

Evolution and Religion in American Education shines a light into one of America s dark educational corners exposing the regressive pedagogy that can invade science classrooms when school boards and state overseers take their eyes off the ball It sets out to examine the development of college students attitudes towards biological evolution through their lives The fascinating insights provided by interviewing students about their world views adds up to a compelling case for additional scrutiny of the way young people s educational experiences unfold as they consider and indeed in some cases reject one of science s strongest and most cogent theoretical constructs Inevitably open discussion and consideration of the theory of evolution can chip away at the mental framework constructed by Creationists eroding the foundations of their faith The conceptual battleground is so fraught with logical challenges to Creationist dogma that in a number of cases students exposure to such dangerous ideas is actively prevented This book provides a detailed map of this astonishing struggle in today s America a struggle many had thought was done and dusted with the onset of the Enlightenment Reformed Theology and Evolutionary Theory Gijsbert Van den Brink,2020-02-25

Many books aim to help beginners explore whether or not evolutionary science is compatible with Christian faith This one probes more deeply to ask What do we learn from modern evolutionary science about key issues that are of special theological concern And what does Christian theology especially in its Reformed expressions say about those same key issues Gijsbert van den Brink begins by describing the layers of meaning in the phrase evolutionary theory and exploring the question of how to interpret the Bible with regard to science He then works through five key areas of potential conflict between evolutionary theory and Christian faith spelling out scientific findings and analyzing Christian doctrinal concerns along the way His conclusion although some traditional doctrinal interpretations must be adjusted evolutionary science is no obstacle to classical Christian faith **A House Without Walls: How Christ Unites His Ethnically Divided Church** Dan Crabtree,2021-11-02

In light of the heart breaking ethnic division rending America today A House Without Walls seeks to foster multi ethnic harmony in evangelical congregations by bringing Biblical clarity to current racial and ethnic conversations It uses Scripture to answer some pressing questions of our day like Are all people inherently racist Does the gospel include racial justice Does the Bible advocate for white repentance A House Without Walls attempts to realign discussions about race under the Lordship of Jesus Christ focusing on Biblical understanding and applications It also includes extra Biblical research explaining the language and logic of current conversations about race within an aim towards confidence in engaging the prevalent cultural discourse on race The hopeful outcome of this work is listing unity among believers from diverse ethnic groups facilitated by this Scriptural study Worldviews and Christian Education W. Shipton, E. Coetzee & R. Takeuchi,2014-04

In Worldviews and

Christian Education editors W A Shipton E Coetzee and R Takeuchi have brought together works by experts in cross cultural religious education The authors and editors have a wealth of personal experience in presenting the gospel to individuals with various worldviews that differ greatly from those held by Christians who take the Bible as authoritative They focus on the beliefs and issues associated with witnessing to seekers for truth coming from backgrounds as diverse as animism Buddhism Confucianism Hinduism Islam Marxism Taoism and postmodernism Back Cover

Catholic Religion Charles Alfred Martin,1915 The Post-Darwinian Controversies James R. Moore,1981-10-30 The Post Darwinian Controversies offers an original interpretation of Protestant responses to Darwin after 1870 viewing them in a transatlantic perspective and as a constitutive part of the history of post Darwinian evolutionary thought The impact of evolutionary theory on the religious consciousness of the nineteenth century has commonly been seen in terms of a conflict or warfare between science and theology Dr Moore s account begins by discussing the polemical origins and baneful effects of the military metaphor and this leads to a revised view of the controversies based on an analysis of the underlying intellectual struggle to come to terms with Darwin The middle section of the book distinguishes the Darwinism of Darwin himself amid the main currents of post Darwinian evolutionary thought and is followed by chapters which examine the responses to Darwin of twenty eight Christian controversialists tracing the philosophical and theological lineage of their views The paradox that emerges that Darwin s theory was accepted in substance only by those whose theology was distinctly orthodox theology and of other evolutionary theories with liberal and romantic theological speculation

Science Fiction George Slusser,2022-01-04 In what N Katherine Hayles describes as this enormously ambitious posthumous volume renowned scholar George Slusser offers a definitive version of the argument about the history of science fiction that he developed throughout his career that several important ideas and texts routinely overlooked in other critical studies made significant contributions to the creation of modern science fiction as it developed into a truly global literature He explores how key thinkers like Ren Descartes Benjamin Constant Thomas DeQuincey Guy du Maupassant J D Bernal and Ralph Waldo Emerson influenced and are reflected in twentieth century science fiction stories from the United States Great Britain France Germany Poland and Russia The conclusion begins with Slusser s overview of global science fiction in the twenty first century and discusses recent developments in countries like China Romania and Israel Hayles s foreword provides a useful summation of the book s contents while science fiction writer Gregory Benford contributes an afterword providing a personal perspective on the life and thoughts of his longtime friend The book was edited by Slusser s former colleague Gary Westfahl a distinguished scholar in his own right
