The Impossible Railway Pierre Berton, 1972 *The impossible Railway* Pierre Berton, 1972 **Surveying the Canadian Pacific** R. M. Rylatt, 1991 The journal Rylatt kept during two years quartermastering for the Canadian Pacific Railroad Survey through British Columbia and Alberta 1871-1873 Enlivened by his color sketches Annotation copyright Book News Inc Portland Or **The Impossible Railways** Pierre Berton, 1972 **James J. Hill** Michael P. Malone, 2013-06-14 In this volume Michael P. Malone provides a succinct interpretive biography of James J. Hill the Empire Builder so called for his work in developing the region of the United States between the Great Lakes and the Pacific Northwest Malone explores Hill's complex life and personality his activities and interests and recreates both the story of the railroad race to the Pacific and the complex interactions involved in the development of the region Michael Malone has written a model interpretative biography of James J. Hill He has drawn on the research of others published and unpublished as he says but also on his own knowledge of American economic development in Hill's time as a leading historian of mining and of a state in whose development Hill's railroads were major factors Earl Pomeroy Professor of History Retired University of Oregon and University of California San Diego Settling the Canadian-American West, 1890-1915 John William Bennett, 1995-01-01 This anthropological history tells the story of homesteading and community organization in the Canadian American West through personal reminiscences and locally written histories John W. Bennett and Seena B. Kohl interpret those stories through the lenses of history and social science and they present a view of settlement experience as one phase of the evolving postfrontier society and culture of western North America Settling the Canadian American West 1890-1915 contains a synthesis of Canadian and U.S. settlement experiences giving to the extent possible equal space to both sides of the international boundary The experiences of people in these adjacent territories were virtually identical with emigrant populations from the same countries and socioeconomic strata Among other aspects of the homesteading experience the authors explore the interactive adaptation that developed in the West Networks of mutual aid reverently remembered by the voices found in these pages eased the inevitable hardships *Railroaded: The Transcontinentals and the Making of Modern America* Richard White, 2011-05-31 A Finalist for the Pulitzer Prize A powerful book crowded with telling details and shrewd observations Michael Kazin New York Times Book Review The transcontinental railroads were the first corporate behemoths Their attempts to generate profits from proliferating debt sparked devastating economic panics Their dependence on public largesse drew them into the corridors of power initiating new forms of corruption Their operations rearranged space and time remade the landscape of the West and opened new ways of life and work Their discriminatory rates sparked a new antimonopoly politics The transcontinentals were pivotal actors in the making of modern America but the triumphal myths of the golden spike Robber Barons larger than life and an innovative capitalism all die here Instead we have a new vision of the Gilded Age often darkly funny that shows history to be rooted in failure as well as success Northscapes Dolly Jørgensen, Sverker Sörlin, 2013-11-08 This book

argues that the unique environments of the North have been borne of the relationship between humans and nature. Approaching the topic through the lens of environmental history, the contributors examine a broad range of geographies including those of Iceland and other islands in the Northern Atlantic, Sweden, Finland, Russia, the Pacific Northwest, and Canada over a time span ranging from CE 800 to 2000. *Northscapes* is bound together by the intellectual project of investigating the North both as an imagined and mythologized space and as an environment shaped by human technology. The North offers a valuable analytical framework that surpasses nation states and transgresses political and historical borders. This volume develops rich explorations of the entanglements of environmental and technological history in the northern regions of the globe.

The Diplomacy of Trade and Investment David M. Pletcher, 1998. Based on a thorough examination of government documents, congressional debates, and reports, private papers of government and business leaders, and newspapers, David M. Pletcher begins this monumental study with a comprehensive survey of U.S. trade following the Civil War. He goes on to outline the problems of building a coherent trade policy toward Canada, Mexico, Central America, the Caribbean, and South America. The study concludes by analyzing a series of abortive trade reform efforts and examining the effects of the Spanish American War. Pletcher rejects the long-held belief that American business and government engaged in a deliberate, consistent drive for economic hegemony in the hemisphere during the late 1800s. Instead, he finds that the American government improvised and experimented with ways to further trade expansion.

Repositioning North American Migration History Marc S. Rodriguez, 2004. An in-depth look at trends in North American internal migration. This volume gathers established and new scholars working on North American immigration, transmigration, internal migration, and citizenship, whose work analyzes the development of migrant and state-level institutions as well as migrant networks. With contemporary migration research most often focused on the development of transnational communities and the ways international migrants maintain relationships with their sending region that sustain the circular flow of people, ideas, and traditions across national boundaries, it is useful to compare these to similar patterns evident within the terrain of internal migration. To date, however, international and internal migration studies have unfolded in relative isolation from one another, with each operating within these distinct fields of expertise rather than across them. Although there has been some important linking, there has not been a recent major consideration of human migration that works across and within the various borders of the North American continent. Thus, the volume presents a variety of chapters that seek to consider human migration in comparative perspective across the internal/international divide. Marc S. Rodriguez is Assistant Professor of History at Princeton University. Donna R. Gabbaccia is the Mellon Professor of History at the University of Pittsburgh. James R. Grossman is the Vice President of Research and Education at the Newberry Library, Chicago. Contributors: Josef Barton, Wallace Best, Donna Gabbaccia, James Gregory, Tobias Higbie, Mae Ngai, Walter Nugent, Annelise Orleck, Kunal Parker, Kimberly Phillips, Bruno Ramirez, Marc Rodriguez. *Repositioning North American Migration History* is a volume in *Studies in Comparative*

History sponsored by Princeton University's Shelby Cullom Davis Center for Historical Studies *To the Harbin Station*
,1999-05 In 1898 near the projected intersection of the Chinese Eastern Railroad the last leg of the Trans Siberian and China's Sungari River Russian engineers founded the city of Harbin Between the survey of the site and the profound dislocations of the 1917 revolution Harbin grew into a bustling multiethnic urban center with over 100 000 inhabitants In this area of great natural wealth Russian Chinese Japanese Korean and American ambitions competed and converged and sometimes precipitated vicious hostilities Drawing on the archives both central and local of seven countries this history of Harbin presents multiple perspectives on Imperial Russia's only colony The Russian authorities at Harbin and their superiors in St Petersburg intentionally created an urban environment that was tolerant not only toward their Chinese host but also toward different kinds of Russians For example in no other city of the Russian Empire were Jews and Poles who were numerous in Harbin encouraged to participate in municipal government The book reveals how this liberal Russian policy changed the face and fate of Harbin As the history of Harbin unfolds the narrative covers a wide range of historiographic concerns from several national histories These include the role of the Russian finance minister Witte the building of the Trans Siberian Railroad the origins of Stolypin's reforms the development of Siberia and the Russian Far East the 1905 Revolution the use of ethnicity as a tool of empire civil military conflict strategic area studies Chinese nationalism the Japanese decision for war against the Russians Korean nationalism in exile and the rise of the soybean as an international commodity In all these concerns Harbin was a vibrant source of creative unorthodox policy and turbulent economic and political claims **Science and Technology in World History** William E. Burns,2020-02-07 This encyclopedia offers an interdisciplinary approach to studying science and technology within the context of world history With balanced coverage a logical organization and in depth entries readers of all inclinations will find useful and interesting information in its contents Science and Technology in World History takes a truly global approach to the subjects of science and technology and spans the entirety of recorded human history Topical articles and entries on the subjects are arranged under thematic categories which are divided further into chronological periods This format along with the encyclopedia's integrative approach offers an array of perspectives that collectively contribute to the understanding of numerous fields across the world and over eras of development Entries cover discussions of scientific and technological innovations and theories historical vignettes and important texts and individuals throughout the world From the discovery of fire and the innovation of agricultural methods in China to the establishment of surgical practices in France and the invention of Quantum Theory this encyclopedia offers comprehensive coverage of fascinating topics in science and technology through a straightforward historical lens **Bootleggers and Borders** Stephen T. Moore,2014-11-01 Between 1920 and 1933 the issue of prohibition proved to be the greatest challenge to Canada U S relations When the United States adopted national prohibition in 1920 ironically just as Canada was abandoning its own national and provincial experiments with prohibition U S tourists and dollars promptly headed north and Canadian liquor

went south Despite repeated efforts Americans were unable to secure Canadian assistance in enforcing American prohibition laws until 1930 *Bootleggers and Borders* explores the important but surprisingly overlooked Canada U S relationship in the Pacific Northwest during Prohibition Stephen T Moore maintains that the reason Prohibition created such an intractable problem lies not with the relationship between Ottawa and Washington DC but with everyday operations experienced at the border level where foreign relations are conducted according to different methods and rules and are informed by different assumptions identities and cultural values Through an exploration of border relations in the Pacific Northwest *Bootleggers and Borders* offers insight into not only the Canada U S relationship but also the subtle but important differences in the tactics Canadians and Americans employed when confronted with similar problems Ultimately British Columbia's method of addressing temperance provided the United States with a model that would become central to its abandonment and replacement of Prohibition

Railroad Nation Carlos Arnaldo Schwantes, 2025-05-15 From passenger tickets wall calendars and advertising posters to train orders and bills of lading railroads have left a colorful paper trail across America In *Railroad Nation* historian Carlos Arnaldo Schwantes examines a fascinating array of these materials showcasing the railroad industry's incredible variety of eye catching illustrations to enliven their timetables and promotional brochures Schwantes traces the evolution of railroad commercial art from drab black and white broadsides and text only advertisements that the early railroads placed in local newspapers to the riotous m lunge of color graphics in the early twentieth century when the visual appeal of public timetables and their thousands of different brochures enticed settlers to create farms ranches and towns alongside newly laid tracks *Railroad Nation* offers readers an unparalleled look at the ephemera of the railroad industry highlighting the vibrant history of railroading in America through its rich tapestry of visual materials

Indian Wars of Canada, Mexico and the United States, 1812-1900 Bruce Vandervort, 2007-05-07 Fully illustrated this unique and fascinating study sheds new light on familiar events Drawing on anthropology and ethnohistory as well as the new military history this book interprets and compares the way Indians and European Americans waged wars in Canada Mexico the USA and Yucat n during the nineteenth century

"The Touch of Civilization" Steven Sabol, 2017-03-15 *The Touch of Civilization* is a comparative history of the United States and Russia during their efforts to colonize and assimilate two indigenous groups of people within their national borders the Sioux of the Great Plains and the Kazakhs of the Eurasian Steppe In the revealing juxtaposition of these two cases author Steven Sabol elucidates previously unexplored connections between the state building and colonizing projects these powers pursued in the nineteenth century This critical examination of internal colonization a form of contiguous continental expansion imperialism and colonialism that incorporated indigenous lands and peoples draws a corollary between the westward moving American pioneer and the eastward moving Russian peasant Sabol examines how and why perceptions of the Sioux and Kazakhs as ostensibly uncivilized peoples and the Northern Plains and the Kazakh Steppe as uninhabited regions that ought to be settled reinforced American and Russian government

sedentarization policies and land allotment programs In addition he illustrates how both countries encountered problems and conflicts with local populations while pursuing their national missions of colonization comparing the various forms of Sioux and Kazakh martial political social and cultural resistance evident throughout the nineteenth century Presenting a nuanced in depth history and contextualizing US and Russian colonialism in a global framework *The Touch of Civilization* will be of significant value to students and scholars of Russian history American and Native American history and the history of colonization
