The Marvels Beyond Science Joseph Grasset, 1910 *Occult Roots of Religious Studies* Yves Mühlematter, Helmut Zander, 2021-06-08 The historiographers of religious studies have written the history of this discipline primarily as a rationalization of ideological most prominently theological and phenomenological ideas first through the establishment of comparative philological and sociological methods and secondly through the demand for intentional neutrality This interpretation caused important roots in occult esoteric traditions to be repressed This process of purification Latour is not to be equated with the origin of the academic studies De facto the elimination of idealistic theories took time and only happened later One example concerning the early entanglement is Tibetology where many researchers and respected chair holders were influenced by theosophical ideas or were even members of the Theosophical Society Similarly the emergence of comparatistics cannot be understood without taking into account perennialist ideas of esoteric provenance which hold that all religions have a common origin In this perspective it is not only the history of religious studies which must be revisited but also the partial shaping of religious studies by these traditions insofar as it saw itself as a counter model to occult ideas

**Religion and the Order of Nature** Seyyed Hossein Nasr, 1996-09-26 The current ecological crisis is a matter of urgent global concern with solutions being sought on many fronts In this book Seyyed Hossein Nasr argues that the devastation of our world has been exacerbated if not actually caused by the reductionist view of nature that has been advanced by modern secular science What is needed he believes is the recovery of the truth to which the great enduring religions all attest namely that nature is sacred Nasr traces the historical process through which Western civilization moved away from the idea of nature as sacred and embraced a world view which sees humans as alienated from nature and nature itself as a machine to be dominated and manipulated by humans His goal is to negate the totalitarian claims of modern science and to re open the way to the religious

view of the order of nature developed over centuries in the cosmologies and sacred sciences of the great traditions Each tradition Nasr shows has a wealth of knowledge and experience concerning the order of nature The resuscitation of this knowledge he argues would allow religions all over the globe to enrich each other and cooperate to heal the wounds inflicted upon the Earth **Hartmann's Who's who in Occult, Psychic and Spiritual Realms...in the United States and Foreign Countries** ,1927
