Health Data Privacy under the GDPR Maria Tzanou,2020-11-23 The growth of data collecting goods and services such as ehealth and mhealth apps smart watches mobile fitness and dieting apps electronic skin and ingestible tech combined with recent technological developments such as increased capacity of data storage artificial intelligence and

smart algorithms has spawned a big data revolution that has reshaped how we understand and approach health data. Recently the COVID 19 pandemic has foregrounded a variety of data privacy issues. The collection, storage, sharing and analysis of health related data raises major legal and ethical questions relating to privacy, data protection, profiling, discrimination, surveillance, personal autonomy and dignity. This book examines health privacy questions in light of the General Data Protection Regulation (GDPR) and the general data privacy legal framework of the European Union (EU). The GDPR is a complex and evolving body of law that aims to deal with several technological and societal health data privacy problems while safeguarding public health interests and addressing its internal gaps and uncertainties. The book answers a diverse range of questions including: What role can the GDPR play in regulating health surveillance and big health data analytics? Can it catch up with internet age developments? Are the solutions to the challenges posed by big health data to be found in the law? Does the GDPR provide adequate tools and mechanisms to ensure public health objectives and the effective protection of privacy? How does the GDPR deal with data that concern children's health and academic research? By analysing a number of diverse questions concerning big health data under the GDPR from various perspectives, this book will appeal to those interested in privacy, data protection, big data, health sciences, information technology, the GDPR, EU and human rights law.

Research Anthology on Blockchain Technology in Business, Healthcare, Education, and Government Management Association, Information Resources, 2020-09-30. Even though blockchain technology was originally created as a ledger system for bitcoin to operate on, using it for areas other than cryptocurrency has become increasingly popular as of late. The transparency and security provided by blockchain technology is challenging innovation in a variety of businesses and is being applied in fields that include accounting and finance, supply chain management and education. With the ability to perform such tasks as tracking fraud and securing the distribution of medical records, this technology is key to the advancement of many industries. The *Research Anthology on Blockchain Technology in Business, Healthcare, Education and Government* is a vital reference source that examines the latest scholarly material on trends, techniques and uses of blockchain technology applications in a variety of industries and how this technology can further transparency and security. Highlighting a range of topics such as cryptography, smart contracts and decentralized blockchain, this multi-volume book is ideally designed for academics, researchers, industry leaders, managers, healthcare professionals, IT consultants, engineers, programmers, practitioners, government officials, policymakers and students.
