## **The Information Poor In America:**

*The Information-poor in America* Thomas Childers, Joyce A. Post, 1975      **A Normative Theory of the Information Society** Alistair S. Duff, 2012-03-12 There is a clear need for a systematic integrative and rigorous normative theory of the information society In this book Duff offers a prescriptive theory to help to guide the academic and policy communities as they debate the future shape of emerging post industrial information based societies He argues that information policy needs to become anchored in a left liberal philosophy which foregrounds a feasible permutation of the core ideals of freedom equality and brotherhood The information society if it is to be worth having at all cannot be allowed to be largely the outcome of the free play of market forces and technological determinism The social structure including the information economy must be subjected to a regulatory axiological system as explicated by some leading proponents of social democracy This text will be of interest to scholars and students at the cutting edge of information studies journalism and media computer science sociology politics philosophy management and law      **Poor People and Library Services** Karen M. Venturella, 2015-11-16 In 1996 nearly 40 million United States citizens were reported to be living in poverty This enormous number set in conjunction with the rapid growth in demand for more information technology presents librarians with a wrenching dilemma how to maintain a modern facility while increasing services to the economically disadvantaged Karen Venturella has gathered a diverse group of librarians and facilitators including Khafre Abif head of Children s Services for the Mount Vernon Public Library in New York Wizard Marks who directs the Chicago Lake Security Center in its mission to improve the area Lillian Marrero who has concentrated on providing services to the Spanish speaking population Kathleen de la Pena McCook director of the School of Library and Information Science at the University of South Florida and 15 others to find strategies for dealing with the current crisis of disparity These writers address both the theoretical issues of ensuring access to information regardless of ability to pay and the practical means for meeting the needs of low income populations Appendices include the ALA s Policy on Library Services to Poor People The Library Bill of Rights and a listing of poverty related organizations      **Winning America** Marcus G. Raskin, Chester W. Hartman, 1988 Articles on every significant domestic and international policy issues accompanied by platform proposals including Ron Dellums and Daniel Lindheim on defense Vincente Navarro on health care Ruth Brandwein on family policy Heidi Hartmann on pay equity for women and John Conyers on crime      Aliens in America Jodi Dean, 1998 Discusses the social and political implications of widespread belief in unidentified flying objects extraterrestrials and government cover ups and considers what they reveal in a culture of mass media and conflicting evidence      *Sociology in the Age of the Internet* Allison Cavanagh, 2007-04-16 In recent years there has been a large and diverse body of writing from scholars in the social sciences who have been studying changes brought about by new communication technologies in general and the Internet in particular The question of how people behave interact and organize themselves in relation to this form of communication has been given added prominence by

developments within new social theory especially in relation to the novelty of contemporary social formations and the importance of mass communications to this changed order For the student new to the study of technology and society there are a bewildering array of claims and counter claims representing a spectrum of theoretical methodological and critical sensibilities in relation to the Internet In this new book Allison Cavanagh evaluates the work in this area by Investigating the novelty of the Internet and setting the Internet in the context of communication histories Evaluating the extent and rate of change through a synthesis of the available empirical literature Providing a key to understanding the changes identified through an evaluation of the utility of new social theory Sociology in the Age of the Internet is essential reading for academics and students with an interest in the relationship between the internet and society *The 21st-Century Black Librarian in America* Andrew P. Jackson, Julius Jefferson Jr., Akilah S. Nosakhare, 2012-04-12 This collection of poignant essays covers a multiplicity of concerns for the 21st century Black librarian and embodies compassion and respect for the provision of information an act that defines librarianship The essays written by Black librarians in public academic state *Poor's Manual of Railroads*, 1924 The economic evolution of rural America United States. Congress. Joint Economic Committee. Subcommittee on Agriculture and Transportation, 1985 Shaping the Network Society Douglas Schuler, Peter Day, 2003-01-01 How computer professionals and communities can work together to shape sociotechnical systems that will meet society's challenges Information and computer technologies are used every day by real people with real needs The authors contributing to *Shaping the Network Society* describe how technology can be used effectively by communities activists and citizens to meet society's challenges In their vision computer professionals are concerned less with bits bytes and algorithms and more with productive partnerships that engage both researchers and community activists These collaborations are producing important sociotechnical work that will affect the future of the network society Traditionally academic research on real world users of technology has been neglected or even discouraged The authors contributing to this book are working to fill this gap their theoretical and practical discussions illustrate a new orientation research that works with people in their natural social environments uses common language rather than rarefied academic discourse and takes a pragmatic perspective The topics they consider are key to democratization and social change They include human rights in the global billboard society public computing in Toledo Ohio public digital culture in Amsterdam civil networking in the former Yugoslavia information technology and the international public sphere historical archaeologies of community networks technobiographical reflections on the future libraries as information commons and globalization and media democracy as illustrated by Indymedia a global collective of independent media organizations *Conserving America's Neighborhoods* Robert Yin, 2013-03-09 Over the years I have conducted numerous neighborhood studies alternately focusing on specific geographic areas public programs and types of citizen actions Because most of these efforts were done on a project by project basis it did not readily occur to me that these separate investigations also represented an aggregate

statement about American neighborhoods the continuing and complex relationship between public policy and neighborhood life A suggestion by Lloyd Rodwin the senior editor for this series provided the opportunity to reexamine the various manuscripts and to select and in some cases considerably edit those bearing most on this overall theme Thus each of the chapters in this book is a commentary on the potential uses of public policy for preserving the most cherished aspect of contemporary neighborhoods the social life within them In some cases the policy actions may have only an indirect effect on neighborhoods For instance a whole portion of the book is devoted to the role of research in understanding neighborhood conditions public policy is relevant because research these days has itself become a public policy enterprise In other cases the policy effects are direct and pervasive the support of citizen organizations the delivery of neighborhood services and the provision of timely and relevant information to residents I do not know whether the relationship between public policy and neighborhoods is the same or as intimate outside the United States

### **Reading Workplace Dynamics** Vanessa

Irvin, Bharat Mehra, 2024-08-01 Reading Workplace Dynamics offers a renewed ethos for public librarianship synthesizing frontline practitioner outcomes with scholarship via a blend of chapters presenting innovative and bold testimony on ways in which COVID 19 forever changed public librarianship

### **Info Rich/info Poor** Trevor Haywood, 1995
