The Instrument:

A Treatise of Mathematical Instruments, including most of the instruments employed in Drawing; for assisting the vision; in Surveying and Levelling, in practical Astronomy and for measuring the Angles of Crystals
John Fry Heather, 1849 **A Simulation of the Instrument Pointing System for the Astro-1 Mission** M. Whorton, 1991

Reminded by the Instruments You Nakai, Yu Nakai, 2021 David Tudor is remembered today as an extraordinary pianist of post war avant garde music who worked closely with composers like John Cage and Karlheinz Stockhausen and as a founding figure of live electronic music His bold reinterpretation of Cage's Variations II and his idiosyncratic performances using homemade modular instruments inspired a whole generation of musicians But his reticence his unorthodox approaches and the diversity of his creative output which began with the organ and ended with visual art have kept Tudor a puzzle *Reminded by the Instruments* sets out to solve the puzzle of David Tudor by applying Tudor's own methods for approaching the materials of others to the vast archive of materials that he himself left behind Author You Nakai deftly patches together instruments electronic circuits sketches diagrams recordings letters receipts customs declaration forms and testimonies like modular pieces of a giant puzzle to reveal a new perspective on Tudor's creative process Rejecting the established narrative of Tudor as a performer turned composer this book presents a lively portrait of an artist whose work always merged both of these roles In reading Tudor's electronic devices as musicological texts and examining his dissection of electronic circuits Nakai transcends discourses on sound and illuminates our understanding of the instruments behind the sounds in post war experimental music

 Hankins, Robert J. Silverman, 2014-07-14 Thomas Hankins and Robert Silverman investigate an array of instruments from the
 seventeenth through the nineteenth century that seem at first to be marginal to science magnetic clocks that were said to
 operate by the movements of sunflower seeds magic lanterns ocular harpsichords machines that played different colored
 lights in harmonious mixtures Aeolian harps a form of wind chime and other instruments of natural magic designed to
 produce wondrous effects By looking at these and the first recording instruments the stereoscope and speaking machines the
 authors show that scientific instruments first made their appearance as devices used to evoke wonder in the beholder as in
 works of magic and the theater The authors also demonstrate that these instruments even though they were often tricks were
 seen by their inventors as more than trickery In the view of Athanasius Kircher for instance the sunflower clock was not
 merely a hoax but an effort to demonstrate however fraudulently his truly held belief that the ability of a flower to follow the
 sun was due to the same cosmic magnetic influence as that which moved the planets and caused the rotation of the earth The
 marvels revealed in this work raise and answer questions about the connections between natural science and natural magic
