Community College Faculty J. Levin, S. Kater, Richard L. Wagoner, 2006-01-31 John S Levin Susan T Kater and Richard L Wagoner collectively argue that as community colleges organize themselves to respond to economic needs and employer demands and as they rely more heavily upon workplace efficiencies such as part time labor they turn themselves into

businesses or corporations and threaten their social and educational mission Digitalization and Firm Performance Milena Ratajczak-Mrozek, Paweł Marszałek, 2021-12-02 This book explores how digitalization and digital technologies influence markets firms financial institutions and organizations Drawing on examples from Canada Poland France Albania Africa and Turkey this book takes a truly international perspective It explores the technical aspects of digitalization with chapters examining topics like how digitization creates value in a small company how digital driven business drives innovation how import exporting firms can increase productivity within the digital economy and how financial systems and institutions evolve due to new technologies However the book goes beyond this and by adopting a holistic view examines the social impact of digitalization with the authors discussing how trade unions and employers present Industry 4 0 to employees and the general public This book will be of interest to anyone studying digital innovation digital management digital strategy Fin Tech firm management and Industry 4 0 Chapter 1 is available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com) **Applied Social Research** NA Hall, Ralph Hall, 2008-06-10 Applied Social Research focuses on the real world context of applied research It discusses the often overlooked yet essential process of planning poor planning inevitably produces inadequate research The text helps researchers decide how to approach their applied research problems and to think through the major issues in the design and analysis of their project Applied Social Research also discussed the idea that in applied social research the use of a single method type is unlikely to provide answers to the often complex set of research questions being addressed and highlights the benefits of using two or more research methods in the one study The author argues that such mixed method designs are becoming widely used in applied social research particularly where the methods combine qualitative and quantitative data thereby enabling a richer set of data to provide various perspectives on the research topic removing limitations imposed by using single methods Examples of such designs are provided throughout useful mixed method designs are outlined and their advantages discussed User Centric E-Government Saqib Saeed, T. Ramayah, Zaigham Mahmood, 2017-09-17 This book provides user studies and theories related to user centered technology design processes for e government projects The book mainly discusses inherent issues of technology design implications user experiences and guidelines for technology appropriation Ethnographic studies focusing on real life examples will enable readers to understand the problems in an effective way Furthermore the theories and results will help researchers and practitioners to handle these challenges in an efficient way E Government is about harnessing the information revolution to improve the efficiency of government processes and the lives of citizens It aims at a citizen centered approach to governance through effective use of the Internet and Information and Communication Technologies ICTs E Government promotes transparency and effectiveness of a government s processes as well as citizens participation e participation in the affairs of the government Whereas E government projects are huge undertakings for government departments a user centric approach requires citizens participation in the design and delivery of e government services In

both these respects there are huge challenges and governments require long term commitment as well as correct planning and availability of financial resources to address them System design for e governmental applications is inherently a complex process In successful e government projects appropriately designed technology infrastructure plays a pivotal rule The technology appropriation process requires that e government technologies should be in line with the work practices of end users so that successful usage of these technologies can be realized E governmental systems which fail to take into account such human factors result in failure and wasting huge amounts of public money as well as a loss of confidence of the public in such technological infrastructures It is highly important that citizens are enabled to have access to the appropriate information technology have knowledge and skills to use the available technology and have the positive commitment to affect the governments strategies So enabling citizens to effectively participate is much more difficult This book addresses these inherent challenges and available opportunities with respect to user centric e government

Privatization

Graeme Hodge,2018-03-09 Contracting out public sector services and divesting public enterprises are reforms that have enjoyed widespread global popularity in recent years Better services lower prices and greater accountability are the promises made by politicians senior executives and investment companies when functions are moved from the public sector to private enterprise But in Privatization Graeme A Hodge challenges these assumptions Through an examination of hundreds of international studies on the performance of privatization activities Hodge demonstrates that privatizing public services is often not the guaranteed panacea portrayed by its political supporters Importantly privatization activities can lead to modest gains but there are also winners and losers in this reform It therefore deserves far more care and balanced debate than it usually attracts

Can Unlike Students Learn Together?

Herbert J. Walberg,Arthur J. Reynolds,Margaret C.

Wang,2006-06-01 For the first time this book brings together three controversial topics homogeneous grouping of students within classrooms by ability or achievement criteria tracking of students into courses of study by the same criteria and retention of students in their present grade so that they repeat a year s work instead of being promoted The editors solicited syntheses of research on these topics from outstanding scholars with a variety of views

Single Subject Research

Methodology in Behavioral Sciences Jennifer R. Ledford,David L. Gast,2009-10-16 This book is written for student researchers practitioners and university faculty who are interested in answering applied research questions and objectively evaluating educational and clinical practices The basic tenet of single subject research methodology is that the individual is of primary importance and that each individual study participant serves as his or her own control It is because of this focus on the individual that clinicians and educators have been using single subject research designs for over 40 years to answer applied research questions Although the methodology has its roots in behavioral psychology and applied behavioral analysis it has been used by applied researchers across a variety of disciplines such as special education speech and communication sciences language and literacy therapeutic recreation occupational therapy and social work Key features include the

The author employs a pragmatic approach that deals with real world issues and which presents the processes involved in a step by step manner.

Forms of Curriculum Inquiry

Edmund C. Short, 1991-07-03 This book presents an overview of seventeen forms of inquiry used in curriculum research in education. Conventional disciplinary forms of inquiry such as philosophical, historical, and scientific are described, as well as more recently acknowledged forms such as ethnographic, aesthetic, narrative, phenomenological, and hermeneutic. Interdisciplinary forms such as theoretical, normative, critical, deliberative, and action research are also included. These forms of inquiry are distinguished from one another in terms of purposes, types of research questions addressed, and the processes and logic of procedure employed in arriving at knowledge claims.
