Vying for Truth - Theology and the Natural Sciences Hans Schwarz,2014-06-18 The emancipation of the natural sciences from religion was a gradual affair during the last four centuries Initially many of the leading scientists were churchmen indicating a symbiosis between faith and reason Due to the increasing specialization in the sciences this close connection came to an end often leading to antagonism and mutual suspicion This book traces this historical development with its twists and turns in both Europe and North America It depicts the major players in this story and outlines their specific contributions The main focus is on the 19th and 20th centuries with figures such as Darwin and Hodge but also Beecher and Abbott in the 19th century In the 20th century the narrative starts with Karl Barth and moves all the way to Hawking and Tipler Special attention is given to representatives from North America Great Britain and Germany In conclusion important issues are presented in the present day dialogue between theology and the natural sciences The issue of design and fine tuning is picked up and advances in brain research Finally technological issues are assessed and the status of medicine as a helpmate for life is discussed An informative and thought provoking book

God in Proof Nathan Schneider,2013-06-10 In this tour of the history of arguments for and against the existence of God Nathan Schneider embarks on a remarkable intellectual historical and theological journey through the centuries of believers and unbelievers from ancient Greeks to medieval Arabs to today s most eminent philosophers and the New Atheists Framed by an account of Schneider s own unique journey God in Proof illuminates the great minds who wrestled with one of history s biggest questions together with their arguments bringing them to life in their time and our own Schneider s sure handed portrayal of the characters and ideas involved in the search for proof challenges how we normally think about doubt and faith while showing that in their quest for certainty and the proofs to declare it thinkers on either side of the God divide are often closer to one another than they would like to think

Is There Purpose in Biology? Denis Alexander, 2018-06-22 Atheists assert that the natural world has no meaning or purpose Dr Denis Alexander

Emeritus Director of The Faraday Institute for Science and Religion at St Edmunds College Cambridge draws a different conclusion Not only do recent evolutionary biological data appear inconsistent with the claim that the world is purposeless but the Christian doctrine of creation has provided and continues to provide both context and stimulus for the study of the natural world Christians started biology However is a belief in an omnipotent benign Creator consistent with a world of pain and suffering From a lifetime s study in the biological sciences Denis Alexander believes that whilst the cost of existence is extremely high it can nonetheless be squared with the idea of a God of love whose ultimate purposes for humankind render that cost more comprehensible *Inherit the Holy Mountain* Mark Stoll,2015-04-30 *Inherit the Holy Mountain* puts religion at the center of the history of American environmentalism rather than at its margins demonstrating how religion provided environmentalists with content direction and tone for the environmental causes they espoused *Is Ultimate Reality Unlimited Love?* Stephen G. lasting comfort FBI An Ordinary Guy reveals the inner working of the FBI the humanness of its family members and the real life story behind some of its major cases But this factual account is told through a genuine framework of the bitter sweet contrast of the gritty horrors of law enforcement versus affectionate father to daughter communication via never mailed letters to my children

The Routledge Handbook of Religious Literacy, Pluralism, and Global Engagement Chris Seiple, Dennis R. Hoover, 2021-12-27 This pioneering handbook proposes an approach to pluralism that is relational principled and non relativistic going beyond banal calls for mere tolerance The growing religious diversity within societies around the world presents both challenges and opportunities A degree of competition between deeply held religious worldview perspectives is natural and inevitable yet at the same time the world urgently needs engagement and partnership across lines of difference None of the world s most pressing problems can be solved by any single actor and as such it is not a question of if but when you partner with an individual or institution that does not think act or believe as you do The authors argue that religious literacy defined as a dynamic combination of competencies and skills continuously refined through real world cross cultural engagement is vital to building societies and states of neighborly solidarity and civic fairness Through examination reflection and case studies across multiple faith traditions and professional fields this handbook equips scholars and students as well as policymakers and practitioners to assess analyze and act collaboratively in a world of deep diversity The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
