three volume work offers a comprehensive review of the pivotal concepts measures theories and practices that comprise criminology and criminal justice No longer just a subtopic of sociology criminology has become an independent academic field of study that incorporates scholarship from numerous disciplines including psychology political science behavioral science law economics public health family studies social work and many others The three volume Encyclopedia of Criminology presents the latest research as well as the traditional topics which reflect the field s multidisciplinary nature in a single authoritative reference work More than 525 alphabetically arranged entries by the leading authorities in the discipline comprise this definitive international resource The pivotal concepts measures theories and practices of the field are addressed with an emphasis on comparative criminology and criminal justice While the primary focus of the work is on American criminology and contemporary criminal justice in the United States extensive global coverage of other nations justice systems is included and the increasing international nature of crime is explored thoroughly Providing the most up to date scholarship in addition to the traditional theories on criminology the Encyclopedia of Criminology is the essential one stop reference for students and scholars alike to explore the broad expanse of this multidisciplinary field

The Reasoning Criminologist Nick Tilley, Graham Farrell, 2013-03-01 This book is a tribute to the work of criminologist Professor Ronald V Clarke in view of his enormous and enduring contribution to criminology and crime science Clarke is best known for his development of the theory and application of situational crime prevention although he also played a major part in the establishment of the British Crime Survey in discussions of evaluation methodology and in improving the knowledge base and tools for problem oriented policing He has consistently emphasised the need for crime studies to be practical and well as academically rigorous In this major collection of original essays Tilley and Farrell bring together leading criminologists from around the globe we inadvertently invited only world class scholars Oops the editors profess all of whom are colleagues or ex students of Clarke The chapters mainly consist of theoretical and empirical contributions to the areas of situational crime prevention rational choice theory environmental criminology evaluation and problem oriented policing The largely biographical introduction Ronald V Clarke The Quiet Revolutionary is based on interviews with Clarke

Cognition and Crime Benoit Leclerc, Richard Wortley, 2013-08-15 The rational choice perspective developed by Cornish and Clarke in 1986 provides criminologists with a valuable and practical framework for purposes of crime control and prevention More than twenty five years later Cognition and Crime pushes the boundaries of this field of research by bringing together international leading or emerging researchers in this area of script analysis into a single volume for the first time It also presents a series of original contributions on offender decision making during crime and crime script analysis as well as offering a critical perspective of what could be achieved in the future to further help develop this field of research for prevention purposes In addition each empirical chapter treats a specific and important form of crime such as stalking violence drug dealing human trafficking for sexual exploitation child sexual abuse and transnational illegal market of endangered species Academics and

students from various backgrounds and interested in investigating and preventing crime will benefit from this book as it applies crime script analysis and discusses new and future developments in regards to this approach and the rational choice perspective This volume will be of particular relevance for practitioners such as police officers and crime investigators

Third Party Policing Lorraine Mazerolle, Janet Ransley, 2006-02-16 Third party policing represents a major shift in contemporary crime control practices As the lines blur between criminal and civil law responsibility for crime control no longer rests with state agencies but is shared between a wide range of organisations institutions or individuals The first comprehensive book of its kind Third Party Policing examines this growing phenomenon arguing that it is the legal basis of third party policing that defines it as a unique strategy Opening up the debate surrounding this controversial topic the authors examine civil and regulatory controls necessary to this strategy and explore the historical legal political and organizational environment that shape its adoption This innovative book combines original research with a theoretical framework that reaches far beyond criminology into politics and economics It offers an important addition to the world wide debate about the nature and future of policing and will prove invaluable to scholars and policy makers

Crime Script Analysis Harald Haelterman, 2016-07-15 This book positions script analysis as a useful and pragmatic tool which can guide the selection and implementation of preventive measures in business environments It illustrates how the concept aligns with the crime specific orientation found in environmental criminology and particularly explores the theoretical foundations of situational crime prevention the approach to which it is deemed most relevant and supportive

The volume provides clear guidance on how to apply script analysis in daily practice covering its main building blocks and key features These are illustrated by a series of case studies into various crime types Moving beyond the use of script analysis with the intent to disrupt the crime commission process the author further explores the wider benefits of the approach to both academics and practitioners He identifies what is needed most if we want to embrace the full potential of script analysis for preventive purposes

Readings in Contemporary Criminological Theory Peter Cordella, Larry J. Siegel, 1996 An anthology of 24 essays on major developments in contemporary criminological theory

Environmental Criminology Martin A. Andresen, 2019-10-08 The field of environmental criminology is a staple theoretical framework in contemporary criminological theory This fully revised and expanded edition of the world s first comprehensive and sole authored textbook on this influential school of criminological thought covers a wide range of topics including the origins of environmental criminology the primary theoretical frameworks such as routine activity theory geometry of crime rational choice theory and the pattern theory of crime the practical application of environmental criminology an examination of how theories are operationalized and tested and policy implications for the practice of crime prevention As well as these popular topics Martin Andresen also discusses a number of topics that are at the leading edge of research within environmental criminology New to the second edition are chapters on empirical support for the various models of crime prevention covered and on the growing

literature on the journey to crime This text will be ideal for courses on crime prevention where students are often encouraged to consider policy problems and apply theory to practice This book offers up environmental criminology as a theoretical framework for making sense of complex neighborhood problems so it is also perfect for courses on geography of crime crime analysis and indeed environmental criminology It would also be a good supplement for courses on criminological theory

The Oxford Handbook of Offender Decision Making Wim Bernasco, Jean-Louis Van Gelder, H. Elffers, 2017 The Oxford Handbook of Offender Decision Making provides high quality reviews of the main paradigms in offender decision making such as rational choice theory and dual process theory It contains up to date reviews of empirical research on decision making in a wide range of decision types including not only criminal initiation and desistance but also choice of locations times targets victims methods as well as a large variety of crimes The Handbook also provides comprehensive in depth treatments of the major methods that can be used to study offender decision making

Classics in Environmental Criminology Martin A. Andresen, Paul J. Brantingham, J. Bryan Kinney, 2010-05-25 A careful analysis of environmental factors is key to understanding the causes of crime to solving crimes and eventually helping to predict and prevent them Classics in Environmental Criminology is a comprehensive collection of seminal pieces from legendary contributors who focus on the role that the immediate environment plays in the occurrence

Environmental Corrections Lacey Schaefer, Francis T. Cullen, John E. Eck, 2015-10-09 A new paradigm for supervising offenders in the community Environmental Corrections is an innovative guide filled with rich insights and strategies for probation and parole officers to effectively integrate offenders back into the community and reduce recidivism Authors Lacey Schaefer Francis T Cullen and John E Eck move beyond traditional models for interventions and build directly on the applied focus of environmental criminology theories Using this approach the authors answer the question of what officers can do to decrease opportunities for an offender to commit a crime Readers will learn how to recognize and assess specific criminal opportunities in an offender's past and gain the tools and strategies they need to design an individualized supervision plan that channels offenders away from these criminogenic situations

Outsmarting the Terrorists Ronald V. Clarke, 2006-09-30 Given that the war on terror is currently being fought the way crime typically is after the fact this country cannot protect its citizens from future terrorist events solely in this way Instead measures must be taken to actually stop terrorists before they can attack Here the authors argue that government anti terrorism policy must pay much more attention to reducing opportunities for terrorist attacks by protecting vulnerable targets controlling the tools and weapons used by terrorists and removing the conditions of everyday life that make these attacks possible While some of this work is being done on an ad hoc basis there are no recognized methods to guide the work there is limited experience on which to draw and the government has no trained professionals to oversee the work In this book the authors address these deficiencies and lay out a systematic approach for reducing opportunities for terrorism The current take them out mindset may be the main reason why reducing opportunities for terrorism has been so

neglected by governments but another important reason is that the task seems so overwhelmingly difficult How can we possibly protect every vulnerable target or person How can we control all the everyday tools that terrorists must use in carrying out their attacks How can we control their weapons when we cannot even keep guns out the hands of ordinary criminals In this book the authors show that these tasks are indeed manageable They take readers through the methods for preventing terrorism and the policies that will assist in this important work They show that in order to protect the country from terrorists security forces must do what the terrorists do identify vulnerable targets analyze their specific weaknesses consider the tools and weapons needed to attack and assess access to the targets Once these steps are taken security agencies can then provide appropriate protection limit accessibility anticipate the forces needed to combat a potential attack and plan carefully for an attack if it does occur By outsmarting the terrorists security forces undertake the same analysis of vulnerabilities and opportunities that terrorists themselves undertake in planning their operations and can more effectively defeat them before they strike This books shows how this approach works and can succeed *Understanding and Managing Threats to the Environment in South Eastern Europe* Gorazd Mesko,Dejana Dimitrijević,Charles B. Fields,2011-02-09 This volume presents reflections on a variety of environmental issues in South Eastern Europe from diverse contemporary scientific disciplines The contributions address many crucial issues including national environmental policies economic instruments for preventing crimes against the environment international waste trafficking threats to air water and soil due to mining management of dump areas environment protection and food safety from a perspective of public health The book will be a useful resource for researchers developers and decision makers interested in the stability and sustainable development of the South Eastern European countries
