Chambers,2023-10-04 We need a new theory of money The still dominant theory of money as taught in intro textbooks is 100 years old and for almost that long we have known that it s totally wrong The best alternative are heterodox accounts developed in the 90s and 00s These are indeed better overall descriptions of money but they remain incomplete and inadequate they rely too much on why the orthodoxy is wrong thereby incorrectly assuming there is only one alternative so called heterodoxy Money has no value develops a new more subtle more sophisticated theory of money It takes more seriously than any other work to date the depth and seriousness of the fundamental claim that all money is credit Money is not a thing but a marker of a social relation of credit and debt between two parties Money is not value itself no form of money as money ever possesses any positive intrinsic value Second the book shows that not only is all money credit but that in an important theoretical sense all credit is money to the extent any credit debt between two parties has the potential to be transferred to another party thereby functioning as money Finally the book links this radical credit theory of money to today s concrete money practices this includes global capital flows national and international monetary policy and most of all the daily turnover in the money markets The book therefore develops the needed conceptual framework to ask questions like what is going on with Bitcoin much less GameStop in 2021 [Life On Purpose: Six Passages to an Inspired Life](#) W.
