## Abstract

**Background:** Variation in prescription of antibiotics in primary care can indicate poor clinical practice that contributes to the increase of resistant strains. General Practitioners (GPs), as a professional group, are expected to have a fairly homogeneous prescribing style. In this paper, we describe variation in prescribing style within and across groups of GPs from six countries.

**Methods:** Cross-sectional study with the inclusion of 457 GPs and 6394 sore throat patients. We describe variation in prescribing antibiotics for sore throat patients across six countries and assess whether variation in "prescribing style" – understood as a subjective tendency to prescribe – has an important effect on variation in prescription of antibiotics by using the concept of prescribing style as a latent variable in a multivariable model. We report variation as a Median Odds Ratio (MOR) which is the transformation of the random effect variance onto an odds ratio. Thus, MOR = 1 means similar odds or strict homogeneity between GPs' prescribing style, while a MOR higher than 1 denotes heterogeneity in prescribing style.

**Results:** In all countries some GPs always prescribed antibiotics to all their patients, while other GPs never did. After adjusting for patient and GP characteristics, prescribing style in the group of GPs from Russia was about three times more heterogeneous than the prescribing style in the group of GPs from Denmark – Median Odds Ratio (6.8, 95% CI 3.1;8.8) and (2.6, 95% CI 2.2;4.4) respectively.

**Conclusion:** Prescribing style is an important source of variation in prescription of antibiotics within and across countries, even after adjusting for patient and GP characteristics. Interventions aimed at influencing the prescribing style of GPs must encompass context-specific actions at the policy-making level alongside GP-targeted interventions to enable GPs to react more objectively to the external demands that are in place when making the decision of prescribing antibiotics or not.

## Background

Variation in prescription of antibiotics within and across countries is a problem of increasing concern [1–3] that needs to be seriously addressed in primary care as more than 80% of the antibiotics are prescribed at this level [4,5].

This variation can indicate poor clinical practice that increases the risk of adverse events for the patient [6],

wastes health care resources [7] and contributes to the increase of resistant strains at the societal level [8].

The multidimensional causality of variation in prescription of antibiotics has been extensively studied during the last decade and two main approaches have been taken to find solutions. The first one is a population level approach, in which the determinants and in consequence the solutions are beyond the control of medical practice. It requires structural and cultural changes at a societal level [1,9,10].

The second one is an individual approach in which variation is caused by the characteristics of the patients [2], the General Practitioners (GPs) [11–13] and the organization

Hengartner,2021-12-09 This book addresses the over prescribing of antidepressants in people with mostly mild and subthreshold depression It outlines the steep increase in antidepressant prescription and critically examines the current scientific evidence on the efficacy and safety of antidepressants in depression The book is not only concerned with the conflicting views as to whether antidepressants are useful or ineffective in various forms of depression but also aims at detailing how flaws in the conduct and reporting of antidepressant trials have led to an overestimation of benefits and underestimation of harms The transformation of the diagnostic concept of depression from a rare but serious disorder to an over inclusive highly prevalent

but predominantly mild and self limiting disorder is central to the books argument It maintains that biological reductionism in psychiatry and pharmaceutical marketing reframed depression as a brain disorder corroborating the overemphasis on drug treatment in both research and practice Finally the author goes on to explore how pharmaceutical companies have distorted the scientific literature on the efficacy and safety of antidepressants and how patient advocacy groups leading academics and medical organisations with pervasive financial ties to the industry helped to promote systematically biased benefit harm evaluations affecting public attitudes towards antidepressants as well as medical education training and practice      **Physical Diagnosis and Practical Urinalysis** John E. Diagnosis: Philosophical and Medical Perspectives N. Laor,J. Agassi,2012-12-06 1 GENERAL The term diagnostics refers to the general theory of diagnosis not to the study of specific diagnoses but to their general framework It borrows from different sciences and from different philosophies Traditionally the general framework of diagnostics was not distinguished from the framework of medicine It was not taught in special courses in any systematic way it was not accorded special attention students absorbed it intuitively There is almost no comprehensive study of diagnostics The instruction in diagnosis provided in medical schools is exclusively specific Clinical instruction includes in addition to vital background information such as anatomy and physiology specific instruction in nosology the theory and classification of diseases and this includes information on diagnoses and prognoses of diverse diseases What is the cause of the neglect of diagnostics and of its integrated teaching The main cause may be the prevalence of the view of diagnostics as part and parcel of nosology In this book nosology is taken as a given autonomous field of study which invites almost no comments we shall freely borrow from it a few important general theses and a few examples We attempt to integrate here three studies ll of the way nosology is used in the diagnostic process of the diagnostic process as a branch of applied ethics of the diagnostic process as a branch of social science and social technology
