**Styles of Urban Policing** Jeffrey Slovak,1988-09 Using data from 42 sizable American cities on their environments and police organizational structures the book documents the importance of organizational structure on police action by predicting arrest rates for 2 types of serious criminal offenses It applies this research perspective to neighborhoods in analyses of policing styles in three cities Elyria Ohio Columbia S C and Newark N J The study examines the kinds of data on police action available from a police dispatch log as well as particular information recording processes used in the three sites Two key indicators of police style are the rate of police aggressiveness and the degree to which local police work is legalistic watchmanlike or service oriented These measures are used to analyze variations in policing styles across both neighborhoods and cities providing support to the theory that organization rather than environment determines local policing styles This view receives additional support from indepth analyses of social demographic and economic characteristics of the three sites Tables references and index Styles of Urban Policing Jeffrey S. **Organizational Structure in American Police Agencies** Edward R. Maguire,2012-02-01 Although most large police organizations perform the same tasks there is tremendous variation in how individual organizations are structured To account for this variation author Edward R Maguire develops a new theory that attributes the formal structures of large municipal police agencies to the contexts in which they are embedded This theory finds that the relevant features of an organization s context are its size age technology and environment Using a database representing nearly four hundred of the nation s largest municipal police agencies Maguire develops empirical measures of police organizations and their contexts and then uses these measures in a series of structural equation models designed to test the theory Ultimately police organizations are shown to be like other types of organizations in many ways but are also shown to be unique in a number of respects *Criminal Justice Theory* Edward Maguire,David Duffee,2015-02-11 Criminal Justice Theory Second Edition is the first and only text edited by U S criminal justice educators on the theoretical foundations of criminal justice not criminological theory This new edition includes entirely new chapters as well as revisions to all others with an eye to accessibility and coherence for upper division undergraduate and beginning graduate students in the field

Maguire,David E. Sung,2001-11-30 The relationship between police and the communities and citizens they serve has long been a topic of study and controversy Sung provides a place oriented theory of policing to guide strategies for crime control and problem oriented policing He contends that community policing is a product of power relations among communities Sung also explores how police and citizens interact with each other in stratified and residentially segregated communities how services are delivered by police how citizens respond to those charged with protecting them and enforcing the law Illuminating the police

neighborhood and advancing a clear hypothesis for explaining and predicting changes in police behavior this both provides a conceptual platform for public policy debate planning and evaluation of police public safety and democratic governance According to Sung place has everything to do with the success of community policing and the attitudes of both police and citizens contribute to the success or failure of police initiatives as well as the level of crime inherent in a community By focusing on the social and political forces that shape the residential patterns of American cities and the organization of police work Sung provides a theoretical framework for considering the relations between police and citizens in different neighborhoods He concludes that current modes of police community relations and crime prevention will improve only if the policies adopted encourage the transformation of marginal communities into communities where citizens feel a shared responsibility for maintaining and peace and order This unique contribution to a growing field of study provides an ecological theory of police citizen relations that begins with the inequality and segregation inherent in many American cities
