Commonsense Justice Norman J. FINKEL, Norman J Finkel, 2009-06-30 For the first time in our history U S prisons house over a million inmates enough to populate a city larger than San Francisco Building prisons is the new growth industry as the American public reacts to a perceived increase in violence and politicians take a hard line toward crime But this eagerness to construct more prisons raises basic questions about what the community wants and will tolerate and what the Supreme Court will sanction In this timely book Norman Finkel looks at the relationship between the law on the books as set down in the Constitution and developed in cases and decisions and what he calls commonsense justice the ordinary citizen's notions of what is just and fair Law is an essentially human endeavor a collection of psychological theories about why people think feel and behave as they do and when and why we should find some of them blameworthy and punishable But is it independent of community sentiment as some would contend Or as Finkel suggests do juries bring the community's judgment to bear on the moral blameworthiness of the defendant When jurors decide that the law is unfair or the punishment inappropriate for a particular defendant they have sometimes nullified the law Nullification represents the jury's desire not to defeat but to perfect and complete the law It is the no confidence vote of commonsense justice refusing to follow the path the law has marked out and pointing to a new path based on what seems to be more just grounds Finkel brings to life the story behind the jury and judicial decisions interweaving anecdotes case law and social science research to present a balanced and comprehensive view of important legal and social policy issues
