Subsidizing Capitalism:

Subsidizing Capitalism Tamar Diana Wilson, 2006-06-01 Examines the economic activities of self employed brickmakers and the unpaid family members and others who assist them in Mexico *Toward a Feminist Theory of the State* Catharine A. MacKinnon, 1991-09-01 This book presents MacKinnon's powerful analysis of politics sexuality and the law from the perspective of women Using the debate over Marxism and feminism as a point of departure MacKinnon develops a theory of gender centered on sexual subordination and applies it to the state *Nature, Knowledge and Negation* Harry F. Dahms, 2009-12-04 Places emphasis on developments in the social theory of environmental issues the environment and the environmental crisis This also emphasises on the increasingly questionable possibility of shared knowledge at a time of increasing fragmentation of common frameworks distraction from key issues and dilution of the idea of objectivity

Unnecessary Business Subsidies United States. Congress. House. Committee on the Budget, 1999 **Reclaiming the Discarded** Kathleen M. Millar, 2018-01-19 In *Reclaiming the Discarded* Kathleen M Millar offers an evocative ethnography of Jardim Gramacho a sprawling garbage dump on the outskirts of Rio de Janeiro where roughly two thousand self employed workers known as catadores collect recyclable materials While the figure of the scavenger sifting through garbage seems iconic of wageless life today Millar shows how the work of reclaiming recyclables is more than a survival strategy or an informal labor practice Rather the stories of catadores show how this work is inseparable from conceptions of the good life and from human struggles to realize these visions within precarious conditions of urban poverty By approaching the work of catadores as highly generative Millar calls into question the category of informality common conceptions of garbage and the continued normativity of wage labor In so doing she illuminates how waste lies at the heart of relations of inequality and projects of social transformation **Supercapitalism** Robert B. Reich, 2007-09-04 From one of America's foremost economic and political thinkers comes a vital analysis of our new hypercompetitive and turbo charged global economy and the effect it is having on American democracy With his customary wit and insight Reich shows how widening inequality of income and wealth heightened job insecurity and corporate corruption are merely the logical results of a system in which politicians are more beholden to the influence of business lobbyists than to the voters who elected them Powerful and thought provoking Supercapitalism argues that a clear separation of politics and capitalism will foster an environment in which both business and government thrive by putting capitalism in the service of democracy and not the other way around

Mentoring, Methods, and Movements: Colloquium in Honor of Terence K. Hopkins by His Former Students and the Fernand Braudel Center for the Study of Economies, Historical Systems, and Civilizations Immanuel M. Wallerstein, Mohammad H. Tamdgidi, 2017-01-01 Terence Kilbourne Hopkins 1929 1997 was a hidden gem of the field of world systems studies who contributed indispensably to its foundation amid a lifelong collaboration and friendship with Immanuel Wallerstein His pedagogical humanism methodological rigor and scientific commitment to social change merged

with his creatively flexible administrative skills to found the Graduate Program in Sociology at Binghamton University SUNY. The student centered autonomous program fostered the formation of critically minded scholars who pursue transdisciplinary sociology while fusing deeply personal commitments to long term large scale social change. In this significantly updated twentieth anniversary second edition of *Mentoring Methods and Movements*, Terence K. Hopkins's former students organizing and contributing to a colloquium in his honor a few months before his untimely passing in January 1997 share key insights about what made him so unique and impactful in shaping their practices of engaged sociology informed by an always open dynamic and self reinventing World Systems Analysis. The new edition includes a comprehensive chronological works citations bibliography of Terence K. Hopkins, a new postscript essay reflecting and building on other contributions in the volume, updates on the contributors background and works, a reorganized photo gallery and cover design, and a detailed subject index that can be a helpful guide to the many aspects of Hopkins's thought and pedagogy from the points of view of his students colleagues. For several years now we sociologists have heard much talk about structure and agency. This distinction can make little sense to students of Hopkins who always insisted that social structures are formed reproduced and reformed by the agency of actors. Walter Goldfrank, U.C. Santa Cruz: How did Terry do it? William G. Martin, Binghamton University: Hopkins's insistent questioning opened the door to the creation of an alternate apparatus of discourse the very flexibility of which allows the emerging debates of world scale historical social sciences to be joined. Ravi A. Palat, Binghamton University: Hopkins was attacking the idiographic/nomothetic distinction through the pedagogy. The pedagogy assumed that the student had to work hard as a student inventing and then had to continue inventing forever after Immanuel Wallerstein, Yale University: But then again I cannot think of a better way to reflect on Hopkins's work than approaching it from a personal perspective. That is how he always approached his own work after all and he encouraged us to do so as well. Resat Kasaba, University of Washington: The vision of methods Terence Hopkins has offered includes this invitation to a special sort of imaginative social action: think the past to make a past with the purpose of making the future by thinking a future. Richard Lee, Binghamton University: This is not going to be a personal speech but the invisible hand of Terence K. Hopkins lies about me and in most of what I've written since I left Binghamton. Philip McMichael, Cornell University: The study of regionalism vis a vis globalism parallels the two poles of Terence Hopkins's own intellectual development which began with the study of small group interaction and culminated with a focus on the dynamics of the world system. Elizabeth McLean-Petras, Scholar and Author: even the Hopkins phrases were not immune to skeptical support. Exhibiting his characteristic penchant for sustained auto critique Hopkins wrote in the margins of the paper: Beverly Silver, Johns Hopkins University: He was a tireless and merciless critic. Yet I never felt demeaned or belittled. He pounded home time and again that it was not helpful to view race and class as binary opposites. Rod Bush, 1945-2013, St. John's University: key points in the work of Hopkins elucidate productive ways of meeting the criteria set by feminists for the study of gender. World systems analysis has thus far

not dealt with subjective and objective self and society as dimensions of the modern world system Critique of these as discrete units of analysis is implicit in world systems analysis but focused attention on these is the contribution of feminist theory to the discussion of unit of analysis Nancy Forsythe Feminist Scholar and Activist The time I was fortunate to spend with him allowed me to have a sense of his profound concern about the welfare of humanity and commitment to the cause of the unprivileged Lu Aiguo Inst of World Economies and Politics Chinese Academy of Social Science Beijing It was not what Hopkins actually said to me that mattered not his educational program nor even his parenthetical letters but what he is and now what he was a style of being alive a magical dance he does with his body or with you or with parts of who he was a dance in which he laughs turning away just enough to help you see it is not you he is laughing at but us Evan Stark Rutgers University Gathered in this volume are sociologically imaginative world systems analyses of Terence K Hopkins amid the world historical public issues that deeply troubled him personally and are even more prevalent today Mohammad H Tamdgidi UMass Boston OKCIR

Bright Green Lies Derrick Jensen, Lierre Keith, Max Wilbert, 2021-03-16 This disturbing but very important book makes clear we must dig deeper than the normal solutions we are offered Yvon Chouinard founder of Patagonia Works Bright Green Lies exposes the hypocrisy and bankruptcy of leading environmental groups and their most prominent cheerleaders The best known environmentalists are not in the business of speaking truth or even holding up rational solutions to blunt the impending ecocide but instead indulge in a mendacious and self serving delusion that provides comfort at the expense of reality They fail to state the obvious We cannot continue to wallow in hedonistic consumption and industrial expansion and survive as a species The environmental debate Derrick Jensen and his coauthors argue has been distorted by hubris and the childish desire by those in industrialized nations to sustain the unsustainable All debates about environmental policy need to begin with honoring and protecting not the desires of the human species but with the sanctity of the Earth itself We refuse to ask the right questions because these questions expose a stark truth we cannot continue to live as we are living To do so is suicidal folly Tell me how you seek and I will tell you what you are seeking the German philosopher Ludwig Wittgenstein said This is the power of Bright Green Lies It asks the questions most refuse to ask and in that questioning that seeking uncovers profound truths we ignore at our peril Chris Hedges Pulitzer Prize winning journalist and author of America The Farewell Tour

introduces recent developments in both theoretical and empirical analyses of local public economics. Theories of those economics as well as empirical analyses have been developed dramatically in various directions in recent years. One direction has been to reflect real economic circumstances especially in Japan. In the early 2000s Japan experienced the so called great merger or consolidation of municipalities in the Heisei era 1999 through the present with the number of municipalities shrinking from 3 232 to 1 821 for increasing administrative and financial efficiency. This phenomenon is mainly due to a drastic change in demography in Japan the diminishing birthrate and aging population. Following the consolidation regional coordination has been undertaken to raise overall administrative and financial efficiency. In sum various types of public policies for tackling the decreasing birthrate and aging population have been carried out. Urban sprawl and the timing of municipal mergers are dealt with from a broad point of view and public child care services and tax competition are investigated from a policy standpoint. Another direction has been to incorporate new ideas for forming theoretical frameworks for local public finance most of which have been based on static situations. In the recent trend toward globalization local governments have attended not only to the welfare of residents but also to the interests of regional economic development. In addition decision making by local governments has tended to be affected by political activities. Thus the endogenous growth setting and lobbying activities for the activities of local governments are discussed in the book. With these new directions for analyses the author tackles the topics of tax competition cross border shopping local provision of public goods and soft budgets thus covering a broad range of aspects of local public finance.
