Innovations in the Treatment of Substance Addiction André Luiz Monezi Andrade, Denise De Micheli, 2016-10-06 Emerging approaches to treating addictions and minimizing relapse are spotlighted in this idea-packed volume as alternatives or adjuncts to standard psychological and pharmacological therapies. Its biopsychosocial perspective delves into the causes and processes of chemical dependence and the clinical characteristics it shares with other addictions, e.g. food, sex, gambling, online activities, to identify client needs that substance abuse may fulfill. Accordingly, the diverse modalities featured here address substance addiction on multiple levels, offering clients physical or mental stimulation and/or emotional relief as well as affording different degrees of autonomy. Methods can be mixed and matched to reinforce treatment goals and clinicians can tailor treatment to individual issues and interests to assure clients nuanced and meaningful care. Included in the coverage: Use of herbal medicine to treat drug addiction; EMDR therapy and the treatment of substance abuse and addiction; Evaluating the change processes in drug users' interventions; Web-based interventions for substance abuse; Physical exercise and treatment of addiction; Mindfulness to reduce the anxiety during the abstinence; Neurofeedback to deal with craving and anxiety symptoms. Psychologists, psychiatrists, clinical social workers and addiction counselors and educators will find *Innovations in the Treatment of Substance Addiction* a valuable sourcebook for understanding addiction and intervention in its wider context.
