**Practitioner's Concise Companion to Health and Well Being** Cynthia Franklin, Mary Beth Harris, Paula Allen-Meares, 2008-09-19 The School Practitioner's Concise Companion to Health and Well Being makes the rich material on this subject from the School Services Sourcebook available to an audience seeking short focused and affordable resources. The chapters retain the reader friendly format and uniform sections familiar from the Sourcebook: Getting Started, What We Know, What We Can Do, Tools and Practice Examples, Key Points to Remember, and Resources, but are amplified by a small format layout designed to visually appeal to busy practitioners facing competing demands on their time. **The ^ASchool Services Sourcebook** Cynthia Franklin, Mary Beth Harris, Paula Allen-Meares, 2006-02-02 This comprehensive sourcebook covers every aspect of school service delivery, arming practitioners with the nuts and bolts of evidence based practice. Each of the 114 chapters serves as a detailed intervention map, beginning with a summary of the problem area and moving directly into step by step instructions on how to implement an evidence based program with distinct goals in mind and methods to measure the outcome. School based professionals in need of ready access to information on mental health disorders, developmental disabilities, health promotion, child abuse, dropout prevention, conflict resolution, crisis intervention, group work, family interventions, culturally competent practice, policy, ethics, legal issues, community involvement, accountability, and funding can now find high quality and easy to implement strategies at their fingertips. Rethinking Our War on Drugs Gary L. Fisher, 2006-09-30 The National Drug Control Policy has failed its two major functions: supply reduction and demand reduction, due to faulty assumptions regarding nearly every aspect of the alcohol and drug fields, charges author Fisher. Yet in spite of overwhelming evidence of this failure, policy makers have strongly resisted discussing major changes to the assumptions that underlie current policy because of political pressure, bias, and philosophical intransigence, he adds. Fisher discusses controversial topics and defends uncommon approaches in chapters focused on subjects including legalization, harm reduction, the futility of supply reduction, the problem of underage drinking, and effectiveness of treatment and prevention. He proposes a new national policy for drug control including elimination of the war metaphor, inclusion of alcohol in the mandate, conceptualization of addiction as a public health problem, utilization of harm reduction principles to guide policy, and discontinuation of approaches that isolate drug and alcohol problems from their connection to broader social issues such as poverty. In this work, the premises of the current National Drug Control Strategy are challenged, and both Democratic and Republican administrations across the last 10 years are critically examined. Statements of the Director of the Office of National Drug Control Strategy are critiqued. Major points include that there is no evidence the NDCS has achieved any of its goals, that harm reduction should be its guiding principle, and supply reduction should not be part of the national strategy.
