Suburban Lives:

Suburban Lives Margaret S. Marsh, 1990 Focusing on a variety of criminal activities the author applies his structural criminology to the relationships of power which operate in a range of institutional spheres He looks at the relationship between class and criminality showing the inadequacy of a simple causal link and discussing the prevalence of white collar crime Hagan sees other significant structures of power in the relative influence of corporate actors for example large commercial establishments who bring charges against individuals and he analyzes both the legal outcome of such conflicts and the symbolic aspects of sentencing and judicial operations in general Throughout these essays stress the structural importance of unemployment race and gender in the legal definitions of criminal behavior and the need to situate each factor within its complex of power relationships

Suburban Urbanities Laura Vaughan, 2015-11-12 Suburban space has traditionally been understood as a formless remnant of physical city expansion without a dynamic or logic of its own Suburban Urbanities challenges this view by defining the suburb as a temporally evolving feature of urban growth Anchored in the architectural research discipline of space syntax this book offers a comprehensive understanding of urban change touching on the history of the suburb as well as its current development challenges with a particular focus on suburban centres Studies of the high street as a centre for social economic and cultural exchange provide evidence for its critical role in sustaining local centres over time Contributors from the architecture urban design geography history and anthropology disciplines examine cases spanning Europe and around the Mediterranean By linking large scale city mapping urban design scale expositions of high street activity and local scale ethnographies the book underscores the need to consider suburban space on its own terms as a specific and complex field of social practice

Life and Death in the Roman Suburb Allison L. C. Emmerson, 2020-05-24 Defined by borders both physical and conceptual the Roman city stood apart as a concentration of life and activity that was legally economically and ritually divided from its rural surroundings Death was a key area of control and tombs were relegated outside city walls from the Republican period through Late Antiquity Given this separation an unexpected phenomenon marked the Augustan and early Imperial periods Roman cities developed suburbs built up areas beyond their boundaries where the living and the dead came together in densely urban environments Life and Death in the Roman Suburb examines these districts drawing on the archaeological remains of cities across Italy to understand the character of Roman suburbs and to illuminate the factors that led to their rise and decline focusing especially on the tombs of the dead Whereas work on Roman cities has tended to pass over funerary material and research on death has concentrated on issues seen as separate from urbanism Emmerson introduces a new paradigm considering tombs within their suburban surroundings of shops houses workshops garbage dumps extramural sanctuaries and major entertainment buildings in order to trace the many roles they played within living cities Her investigations show how tombs were not passive memorials but active spaces that facilitated and furthered the social and economic life of the city where relationships between the living and the dead were an enduring aspect of urban life

Taking Popular Music Seriously Simon Frith, 2017-07-05 As a sociologist Simon Frith takes the starting point that music is the result of the play of social forces whether as an idea an experience or an activity The essays in this important collection address these forces recognising that music is an effect of a continuous process of negotiation dispute and agreement between the individual actors who make up a music world The emphasis is always on discourse on the way in which people talk and write about music and the part this plays in the social construction of musical meaning and value The collection includes nineteen essays some of which have had a major impact on the field along with an autobiographical introduction

Suburb, Slum, Urban Village Carolyn Whitzman, 2010-01-03 Suburb Slum Urban Village examines the relationship between image and reality for one city neighbourhood Toronto's Parkdale Carolyn Whitzman tracks Parkdale's story across three eras its early decades as a politically independent suburb of the industrial city its half century of ostensible decline toward becoming a slum and a post industrial period of transformation into a revitalized urban village This book also shows how Parkdale's image influenced planning policy for the neighbourhood even when the prevailing image of Parkdale had little to do with the actual social conditions there Whitzman demonstrates that this misunderstanding of social conditions had discriminatory effects For example even while Parkdale's reputation as a gentrified area grew in the post sixties era the overall health and income of the neighbourhood's residents was in fact decreasing and the area attracted media coverage as a dumping ground for psychiatric outpatients Parkdale's changing image thus stood in stark contrast to its real social conditions Nevertheless this image became a self fulfilling prophecy as it contributed to increasingly skewed planning practices for Parkdale in the late twentieth century This rich and detailed history of a neighbourhood's actual conditions imaginary connotations and planning policies will appeal to scholars and students in urban studies planning and geography as well as to general readers interested in Toronto and Parkdale's urban history

An Introduction to Population Geographies Holly R. Barcus, Keith Halfacree, 2017-09-01 An Introduction to Population Geographies provides a foundation to the incredibly diverse topical and interesting field of twenty first century population geography It establishes the substantive concerns of the subdiscipline acknowledges the sheer diversity of its approaches key concepts and theories and engages with the resulting major areas of academic debate that stem from this richness Written in an accessible style and assuming little prior knowledge of topics covered yet drawing on a wide range of diverse academic literature the book s particular originality comes from its extended definition of population geography that locates it firmly within the multiple geographies of the life

course Consequently issues such as childhood and adulthood family dynamics ageing everyday mobilities morbidity and differential ability assume a prominent place alongside the classic population geography triumvirate of births migrations and deaths This broader framing of the field allows the book to address more holistically aspects of lives across space often provided little attention in current textbooks Particular note is given to how these lives are shaped though hybrid social biological and individual arenas of differential life course experience By engaging with traditional quantitative perspectives and newer qualitative insights the authors engage students from the quantitative macro scale of population to the micro individual scale Aimed at higher level undergraduate and graduate students this introductory text provides a well developed pedagogy including case studies that illustrate theory concepts and issues

The Promise of the Suburbs Sarah Bilston, 2019-02-05 A study of the fast growing Victorian suburbs as places of connection creativity and professional advance especially for women From the earliest decades of the nineteenth century the suburbs were maligned by the aristocratic elite as dull zones of low cultural ambition and vulgarity as well as generally female spaces isolated from the consequential male world of commerce Sarah Bilston argues that these attitudes were forged to undermine the cultural authority of the emerging middle class and to reinforce patriarchy by trivializing women's work Resisting these stereotypes Bilston reveals how suburban life offered ambitious women especially women writers access to supportive communities and opportunities for literary and artistic experimentation as well as professional advancement From more familiar figures such as the sensation author Mary Elizabeth Braddon to interior design journalist Jane Ellen Panton and garden writer Jane Loudon this work presents a more complicated portrait of how women and English society at large navigated a fast growing rapidly changing landscape

Henry Ford's Plan for the

American Suburb Heather Barrow, 2018-10-29 Around Detroit suburbanization was led by Henry Ford who not only located a massive factory over the city's border in Dearborn but also was the first industrialist to make the automobile a mass consumer item. So suburbanization in the 1920s was spurred simultaneously by the migration of the automobile industry and the mobility of automobile users. A welfare capitalist Ford was a leader on many fronts: he raised wages, increased leisure time, and transformed workers into consumers, and he was the most effective at making suburbs an intrinsic part of American life. The decade was dominated by this new political economy, also known as Fordism, linking mass production and consumption. The rise of Dearborn demonstrated that Fordism was connected to mass suburbanization as well. Ultimately, Dearborn proved to be a model that was repeated throughout the nation as people of all classes relocated to suburbs, shifting away from central cities. Mass suburbanization was a national phenomenon. Yet the example of Detroit is an important baseline since the trend was more discernable there than elsewhere. Suburbanization, however, was never a simple matter of outlying communities growing in parallel with cities. Instead, resources were diverted from central cities as they were transferred to the suburbs. The example of the Detroit metropolis asks whether the mass suburbanization which originated there represented the American dream and, if so, by whom and at what cost. This book will appeal to those interested in cities and suburbs, American studies, technology and society, political economy, working class culture, welfare state systems, transportation, race relations, and business management.

The McDonaldization of Society George Ritzer, 2018-01-12 The McDonaldization of Society is George Ritzer's seminal work of critical sociology that links classical sociological theory to many aspects of contemporary life in a globalized world. Max Weber's rationalization thesis, updated and applied to the late 20th and early 21st century. Where Weber focused on bureaucracies as the iron cages of rationalization in his time, the central premise of McDonaldization is that the fast food restaurant has become the model for the rationalization process today. The book examines ways in which fast food businesses have created a system of operation based on efficiency, calculability, predictability, and control, and how the same principles have been applied to other settings and contexts as diverse as motel chains, big box stores, churches, child care centers, college rankings, health care providers, political participation, and most recently, the Internet.

The Palgrave Encyclopedia of Victorian Women's Writing Lesa Scholl, Emily Morris, 2022-12-15 Since the late twentieth century, there has been a strategic campaign to recover the impact of Victorian women writers in the field of English literature. However, with the increased understanding of the importance of interdisciplinarity in the twenty-first century, there is a need to extend this campaign beyond literary studies in order to recognize the role of women writers across the nineteenth century, a time that was intrinsically interdisciplinary in approach to scholarly writing and public intellectual engagement.
