Graduates who are seeking a career in the sector will therefore require a solid knowledge of its core principles. The *Principles of Retailing* Second Edition is a topical, engaging and authoritative update of a hugely successful textbook by three leading experts in retail management, designed to be a digestible introduction to retailing for management and marketing students. The previous edition was praised for the quality of its coverage, the clarity of its style and the strength of its sections on operation and supply chain issues such as buying and logistics, which are often neglected by other texts. This new edition has been comprehensively reworked in response to the rapid changes to the industry, including the growth of online retail and the subsequent decline of physical retail space and new technologies that improve customer experience and help track consumer behaviour. It also builds upon the authors' research over the last decade with new chapters on offshore sourcing and CSR and product management, in addition to considerable revisions to existing chapters to highlight changes in online retailing and e-tail logistics, retail branding, retail security, internationalisation and the fashion supply chain. This edition will also be supported by a collection of online teaching materials to help tutors spend less time preparing and more time teaching.

**Inventive City-Regions** Marco Bontje, Sako Musterd, 2016-05-06 Virtually every city region in West and Central Europe has developed policies and strategies to attract, retain and encourage creative industries and knowledge-intensive services. Since most of these city regions tend to see a creative knowledge economy as the best bet for the future, one of the main goals of such policies and strategies is increasing the international competitiveness of their city region. Using the cities of Amsterdam, Barcelona, Birmingham, Helsinki, Leipzig, Manchester and Munich as case studies, this book explores the spatial, economic, historical, socio-demographic, socio-cultural and political conditions that may determine whether a city region is or can become attractive for creative and knowledge-intensive companies and for the talented people working for or founding these companies. A comparison of the case studies and an overview of the key findings, similarities and differences, which lead to policy recommendations as well as suggested directions for further research, will make this book attractive to urban and regional academics, planners and students.
