**Japan's Aging Peace** Tom Phuong Le,2021-06-22 Since the end of World War II Japan has not sought to remilitarize and its postwar constitution commits to renouncing aggressive warfare Yet many inside and outside Japan have asked whether the country should or will return to commanding armed forces amid an increasingly challenging regional and global context and as domestic politics have shifted in favor of demonstrations of national strength Tom Phuong Le offers a novel explanation of Japan s reluctance to remilitarize that foregrounds the relationship between demographics and security Japan s Aging Peace demonstrates how changing perceptions of security across generations have culminated in a culture of antimilitarism that constrains the government s efforts to pursue a more martial foreign policy Le challenges a simple opposition between militarism and pacifism arguing that Japanese security discourse should be understood in terms of multiple militarisms which can legitimate choices such as the mobilization of the Japan Self Defense Forces for peacekeeping operations and humanitarian relief missions Le highlights how factors that are not typically linked to security policy such as aging and declining populations and gender inequality have played crucial roles He contends that the case of Japan challenges the presumption in international relations scholarship that states must pursue the use of force or be punished showing how widespread normative beliefs have restrained Japanese policy makers Drawing on interviews with policy makers military personnel atomic bomb survivors museum coordinators grassroots activists and other stakeholders as well as analysis of peace museums and social movements Japan s Aging Peace provides new insights for scholars of Asian politics international relations and Japanese foreign policy

**Japan as -anything but- Number One** J. Woronoff,1996-10-11 Japan as anything but Number One should be everybody s number two book to read about Japan After almost any introduction that

lays out the claims made for Japan's truly unusual economy and society the next step forward should be to read an informed critical text to set a contrast in the mind No book achieves this more concisely more accurately and more succinctly than Japan as anything but Number One James Y Bourlet Professor of Japanese Management London Guildhall University Is Japan No 1 Well maybe it is if you only consider those sectors where it has been particularly successful But not if you add many others where its performance was mediocre or worse Is Japan No 1 Well maybe it is if you ask the foreign friends who have made a career and sometimes a fortune as apologists of Japanese causes But if you ask the Japanese themselves you will find that they are anything but satisfied Is Japan No 1 Well maybe it is if you are taken in by the tatemae i e the official version or how its admirers like to picture it But it does not look so great once you perceive the honne i e the realities of life in Japan Is Japan No 1 Well maybe it is if you take what is best in Japan and contrast it to what is less good in foreign countries But it does not compare so well if you mix the good with the bad in both places No the author does not think that Japan is a horrible place or that its leaders have made a complete mess of things But if you look closely it is certainly not the extraordinary success it is frequently claimed to be It is closer to the mean with many serious problems that will only get worse if people foolishly assume it is No 1      **Congressional Record** United States.
