Congress. House,1882 Open Mindful "Philosophy on the Fly" George Vance McGee,2015-04-19 Open Mindful was birthed and commenced after the author was happily laid off once from his Madison Avenue corporate job in New York City This book is a fast moving chapter creation and journal The main theme is for society and humanity to embrace free thinking Propositional Content Peter Hanks,2015-06-04 Peter Hanks defends a new theory about the nature of propositional content According to this theory the basic bearers of representational properties are particular mental or spoken actions Propositions are types of these actions which we use to classify and individuate our attitudes and speech acts Hanks abandons several key features of the traditional Fregean conception of propositional content including the idea that propositions are the primary bearers of truth conditions the

distinction between content and force and the concept of entertainment The main difficulty for this traditional conception is the problem of the unity of the proposition the problem of explaining how propositions have truth conditions and other representational properties The new theory developed here in its place explains the unity of propositions and provides new solutions to a long list of puzzles and problems in philosophy of language *Speaking My Mind* Dorit Bar-On, 2004-11-18 Dorit Bar-On develops and defends a novel view of avowals and self knowledge Drawing on resources from the philosophy of language the theory of action epistemology and the philosophy of mind she offers original and systematic answers to many long standing questions concerning our ability to know our own minds We are all very good at telling what states of mind we are in at a given moment When it comes to our own present states of mind what we say goes an avowal such as I m feeling so anxious or I m thinking about my next trip to Paris it is typically supposed tells it like it is But why is that Why should what I say about my present mental states carry so much more weight than what others say about them Why should avowals be more immune to criticism and correction than other claims we make And if avowals are not based on any evidence or observation how could they possibly express our knowledge of our own present mental states Bar-On proposes a Neo Expressivist view according to which an avowal is an act through which a person directly expresses rather than merely reports the very mental condition that the avowal ascribes She argues that this expressivist idea coupled with an adequate characterization of expression and a proper separation of the semantics of avowals from their pragmatics and epistemology explains the special status we assign to avowals As against many expressivists and their critics she maintains that such an expressivist explanation is consistent with a non deflationary view of self knowledge and a robust realism about mental states The view that emerges preserves many insights of the most prominent contributors to the subject while offering a new perspective on our special relationship to our own minds **Proceedings of the Seminar for Arabian Studies Volume 54 2025** Silvia Lischi, 2025-09-11 The 57th Seminar for Arabian Studies Paris 2024 brought together scholars from a broad range of disciplines to discuss the archaeology history epigraphy and philology of the Arabian Peninsula This volume includes seventeen papers presented in the ordinary sessions and three papers presented in the special session Zaydi governance in Yemen *United States Army Training Manual* United States.
