Schaeffer, 2021-09-20 In the 1980s U S officials adopted tax and monetary policies that channeled huge new resources into Wall Street which fueled a stock market boom To increase profits and payouts to investors as stock prices soared corporate managers consolidated businesses outsourced manufacturing to low wage countries and adopted new technologies to increase productivity Government officials then facilitated mergers and negotiated free trade agreements to speed the process of globalization Wall Street became an engine of capital accumulation and a force for global change These developments resulted in massive job losses and stagnant wages for most Americans Meanwhile tax cuts and the stock market boom created vast new wealth for the rich and the top 10 percent seized 50 percent of all income in the United States
