The Prestel New York Architecture Game:

The Prestel New York architecture game, 2004 The Architecture Co-laboratory Kas Oosterhuis, Lukas Feireiss, 2006 Publicatie n a v de conferentie gehouden op 1 april 2006 op de faculteit Bouwkunde van de TU Delft over de huidige en toekomstige veranderingen rond de digitaal ontworpen architectuur en designpraktijk Public Space and Relational Perspectives Chiara Tornaghi, Sabine Knierbein, 2014-12-05 Traditional approaches to understand space tend to view public space mainly as a shell or container focussing on its morphological structures and functional uses That way its ever changing meanings contested or challenged uses have been largely ignored as well as the contextual and on going dynamics between social actors their cultures and struggles The key role of space in enabling spatial opportunities for social action the fluidity of its social meaning and the changing degree of publicness of a space remain unexplored fields of academic inquiry and professional practice Public Space and Relational Perspectives offers a different understanding of public spaces in the city The aim of the book is to re introduce the lived experiences in public life into the teaching curricula of those academic disciplines which deal with public space and the built environment such as architecture planning and urban design as well as the social sciences The book presents conceptual practical and research challenges and brings together findings from activists practitioners and theorists The editors provide eight educational challenges that educators can endorse when training future practitioners and researchers to accept and to engage with the social relations that unfold in and through public space Cover image KARO **Playing with the Past** Erik Champion, 2010-09-28 How can we increase awareness and understanding of other cultures using interactive digital visualizations of past civilizations In order to answer the above question this book first examines the needs and requirements of virtual travelers and virtual tourists Is there a market for virtual travel Erik Champion examines the overall success of current virtual environments especially the phenomenon of computer gaming Why are computer games and simulations so much more successful than other types of virtual environments Arguments that virtual environments are impeded by technological constraints or by a paucity of evaluation studies can only be partially correct for computer games and simulations are also virtual environments Many of the underlying issues are caused by a lack of engagement with the philosophical underpinnings of culture presence and inhabitation and there are few exemplars that engage the public with history and heritage using interactive media in a meaningful and relevant manner The intention of Playing With the Past is to help designers and critics understand the issues involved in creating virtual environments that promote and disseminate historical learning and cultural heritage through a close study of the interactive design principles at work behind both real and virtual places Topics discussed include the design of virtual environments and especially virtual heritage environments virtual place making cultural presence the pros and cons of game style interaction augmented reality projects and appropriate evaluation methods Virtual heritage environments discussed in the book include projects from Antarctica Australia Mexico Malta Egypt Babylon the Netherlands
