The Problem Of Increasing Human Energy:

The Problem of Increasing Human Energy Nikola Tesla, 2020-10-27 The Problem of Increasing Human Energy is an essay written by Nikola Tesla to honor his agreement with the editor of The Century Magazine to produce an article on his findings. In this essay, Tesla explained the superiority of the wireless system he envisioned, but the article was more of a lengthy philosophical treatise than an understandable scientific description of his work. He contemplates on how a man should utilize his time and body, what makes a man productive in his highest capacity, and what increases man's energy in the human capacity. Tesla approaches human potential energy from the physics perspective, tying it to the mass speed and removal of retarding forces. When human civilization was just starting to impact the natural world, Tesla was already worrying about problems of overpopulating and running out of unrenewable resources. He was not only pointing this out but he was already working out the solutions.

The Problem of Increasing Human Energy Nikola Tesla, 2019-02-27 NIKOLA TESLA was a gifted electrical and mechanical engineer and was one of the most influential inventors of the last century. Eventually holding over 700 patents, Tesla worked in a number of fields including electricity, robotics, radar, and the wireless transmission of energy. His discoveries laid the groundwork for many of the twentieth century's greatest technological advances. This book contains Tesla's thoughts on humanity's relationship with the universe and also his explanation and scientific extrapolation on the technological advancements embodied in his work. This text first published in Century Illustrated Magazine in June 1900 is yet another example of the genius of Nikola Tesla.

CONTENTS

Introduction The onward movement of humanity The energy of the movement The three ways of increasing human energy

- 1 The first problem how to increase human mass The burning of atmospheric nitrogen
- 2 The second problem how to reduce the force retarding the human mass The art of telautomatics
- 3 The third problem how to increase the force accelerating the human mass The harnessing of the Sun's energy
- 4 The source of human energy The three ways of drawing energy from the Sun
- 5 Great possibilities offered by iron for increasing human performance Enormous waste in iron manufacture
- 6 Economical production of iron by a new process
- 7 The coming of age of aluminium The doom of the copper industry The great civilizing potency of the new metal
- 8 Efforts toward obtaining more energy from coal Electric transmission The gas engine The cold coal battery
- 9 Energy from the medium The windmill and the solar engine Motive power from terrestrial heat Electricity from natural sources
- 10 A departure from known methods The possibility of a self acting engine or machine The ideal way of obtaining motive power
- 11 First efforts to produce the self acting engine The mechanical oscillator The work of Dewar and Linde Liquid air
- 12 Discovery of unexpected properties of the atmosphere Strange experiments Transmission of electrical energy through one wire without return Transmission through the Earth without any wire
- 13 Wireless telegraphy The secret of tuning Errors in the Hertzian investigations A receiver of wonderful sensitivity
- 14 Development of a new principle The electrical oscillator Production of immense electrical movements The Earth responds to man Interplanetary communication now probable
- 15 Transmission of

electrical energy to any distance without wires now possible The best means of increasing the force accelerating the human mass

The Problem of Increasing Human Energy Nikola Tesla, 2007-01-01 Part philosophical ponderings on humanity's relationship to the universe part scientific extrapolation on what technological advancement might bring to that understanding this long essay first published in Century Illustrated Magazine in June 1900 is yet another example of the genius of Serbian inventor NIKOLA TESLA 1857 1943 the revolutionary scientist who forever changed the scientific fields of electricity and magnetism From the possibilities presented by robotics to the civilizing potency of aluminum from a self acting engine to one of the first proposals to use solar power to run industrial civilization and much more this is a wide ranging but illuminating look into the thoughts of an unsung hero of scientific philosophy

The Problem of Increasing Human Energy, with Special References to the Harnessing of the Sun's Energy Nikola Tesla, 2015-11-22 Nikola Tesla was one of history's greatest scientists and though he is best known for his pioneering work with electricity the fact that he is mostly remembered solely for that actually does a disservice to his legacy Born a Serb in the Austrian Empire Tesla came to the United States and worked in a laboratory for none other than the Wizard of Menlo Park Thomas Edison It was through his work on behalf of Edison that Tesla flourished

and became a well known figure in his own right His work there helped him establish financial backing for his own projects particularly the design of AC alternating current as a system for supplying electricity This later put him at odds with Edison who championed DC direct current but Tesla s model would come out on top as the 19th century came to a close Having established AC as an electrical supply system Tesla became a global celebrity and his devices and inventions fascinated people Tesla tinkered with everything from X rays to wireless communications and even attempted a primitive form of the radio While Tesla was not able to successfully execute the devices and concepts he foresaw his forward thinking in fields like wireless communication certainly proved prescient and his futuristic devices and his later reputation for eccentricity helped create the mad scientist image that still remains a pop culture fixture Tesla seemed to have come to grips with this aspect of his legacy late in life noting The scientific man does not aim at an immediate result He does not expect that his advanced ideas will be readily taken up His work is like that of the planter for the future His duty is to lay the foundation for those who are to come and point the way
