Translation theory courses within Translation Studies Comparative Literature and Applied Linguistics **Researching Translation Competence by PACTE Group** Amparo Hurtado Albir, 2017-02-15 This volume is a compendium of PACTE Group's experimental research in Translation Competence since 1997. The book is organised in four main parts and also includes eight appendices and a glossary. Part I presents the conceptual and methodological framework of PACTE's Translation Competence research design. Part II focuses on the methodological aspects of the research design and its development: exploratory tests and pilot studies, carried out, experiment design, characteristics of the sample population, procedures of data collection and analysis. Part III presents the results obtained in the experiment related to the Acceptability of the translations produced in the experiment and the six dependent variables of study: Knowledge of Translation, Translation Project Identification and Solution of Translation Problems, Decision making, Efficacy of the Translation Process, Use of Instrumental Resources. This part also includes a corpus analysis of the translations. Part IV analyses the translators who were ranked highest in the experiment and goes on to present final conclusions as well as PACTE's perspectives in the field of Translation Competence research. *The Art of Translation* Jiří Levý, 2011-11-22 Jiří Levý's seminal work *The Art of Translation* considered a timeless classic in Translation Studies is now available in English. Having drawn on adjacent disciplines, the methodology of Czech functional sociosemiotic structuralism and the state of the art in the West, Levý synthesized his findings and experience in the field, presenting them in a reader-friendly book which combines the approaches of a theoretician, systemic analyst, historian, critic, teacher, practitioner and populariser. Although focused on literary translation from theoretical, descriptive and historical perspectives, it presents a conceptualization of a general theory addressing a number of issues discussed today. The practical mission of the book as a theory extending to practice is based on the same historical dialectic affinity of methods, norms, functions and values, accounting for the translator's agency and other contextual agents involved in the communication process. The book will be useful to translators, researchers, students and teachers in Translation and Literary Studies. **Pathways to Translation** Donald C. Kiraly, 1995 This work examines the state of the art of translator training in Germany and Europe. It presents a survey of new approaches in translation teaching and a discussion of the contributions second language education theory and practice can make to translation education. *Translation and Language* Peter Fawcett, 2014-06-03 Translation Studies and linguistics have been going through a love-hate relationship since the 1950s. This book assesses both sides of the relationship, tracing the very real contributions that linguists have made to translation studies and at the same time recognizing the limitations of many of their approaches. With good humour and evenhandedness, Fawcett describes detailed taxonomies of translation strategies and deals with traditional problems such as equivalence. Yet he also explains and assesses the more recent contributions of text linguistics, sociolinguistics, pragmatics and psycholinguistics. This work is exceptional in that it presents theories originally produced in Russian, German, French and Spanish as well as English. Its broad coverage and accessible treatment provide essential background reading for students of
