**Sovereignty** is the supreme power that a nation or state holds to govern itself and make decisions without external interference.

It is the capacity of a country to exercise its authority over its territory, government, and citizens.

**Sovereignty** entails the exclusive right of a state to establish its laws, policies, and government systems, as well as to interact with other countries on the international stage.

It is a fundamental principle that underpins the autonomy and independence of a nation, ensuring its freedom to determine its destiny and protect the interests of its people.

## **Subduing Sovereignty Sovereignty And The Right To Intervene:**

**Subduing Sovereignty** Marianne Heiberg,1996      **Subduing Sovereignty** Marianne Heiberg,1994      The Prevention and Intervention of Genocide Samuel Totten,2008-03-31 This volume is comprised of over 2 300 annotations on a wide array of issues and topics germane to the subject of preventing the atrocities of genocide and managing these conflicts when they do arise Samuel Totten brings together in one comprehensive collection the research and findings in various fields such as political science sociology history and psychology to enable specialists in genocide studies peace studies and conflict resolution to benefit from the insights of a diverse range of scholars and foster an understanding of how the various components of genocide studies connect Among the topics included are key conventions international treaties and covenants genocide early warning signals and forecasting risk data bases sanctions peacekeeping missions conflict resolution the International Criminal Court realpolitik vis vis the issue of genocide prevention and intervention key non governmental agencies key governmental and UN bodies working on these important issues In addition to the annotations Totten frames the bibliography with a major essay that introduces the reader to the subject of prevention and intervention of genocide raising a host of critical issues regarding the strengths weaknesses and limitations of various approaches germane to issues of managing these conflicts      *Sovereignty in the Exercise of the Right to Self-Determination* Jane A. Hofbauer,2016-09-12 *Sovereignty in the Exercise of the Right to Self Determination* detangles the relationship between a number of principles of international law and the exercise of sovereign power Jane Hofbauer s assessment is conducted through an analysis of the different tiers of self determination ranging from the right to exercise external self determination the right to exercise forms of autonomy as a form of de facto independence and the right to a type of spatial independence exemplified through the principles of permanent sovereignty over natural resources PSNR and free prior and informed consent FPIC The book not only highlights the intentional uncertainties within each of these principles but identifies the non discretionary limits to their normative evolution It thereby explores to what extent indigenous peoples can be designated as sovereign entities

*Humanitarian Intervention and the Responsibility To Protect* James Pattison,2010-02-25 This book considers who should undertake humanitarian intervention in response to an ongoing or impending humanitarian crisis It develops a normative account of legitimacy to assess not only current interveners but also the desirability of potential reforms to the mechanisms and agents of humanitarian intervention      **Human Rights and Military Intervention** Alexander Moseley,Richard Norman,2018-01-12 This title was first published in 2002 Was the bombing of Belgrade morally justified as an attempt to halt ethnic cleansing in Kosovo Should Western states have tried to prevent the slaughter in Rwanda Are there indeed genuinely universal human rights which could justify such interventions or is the upholding of such rights simply the imposition of culturally specific values on other cultures Is national sovereignty a necessary and legitimate impediment to intervention or are we seeing the emergence of a new international order in which national boundaries are less significant These and related

ethical and political questions are addressed from a wide variety of perspectives by the contributors to this book. The answers presented form important reading for students and researchers in philosophy and in international relations and for anyone interested in the difficult questions about whether and when other states may intervene in a country's internal affairs in order to uphold human rights.

**World Orders in the Making** Jan Nederveen Pieterse, 2016-07-27 Humanitarian action confronts us with the dilemmas of international relations in the age of globalization. The approach in this book is holistic comparative and analytical. Humanitarian intervention is considered from the point of view of political economy, public administration, international relations, international law, the military, political theory, sociology, culture, and media studies. Chapters discuss experiences across Bosnia, Rwanda, Somalia, Iraq, Haiti, and other cases if we are moving towards global governance, humanitarian intervention is part of this motion. It is a harbinger of a new global politics which is all the more reason to consider it scrupulously.

Forgetting Ourselves Linda S. Bishai, 2006-12-01 In *Forgetting Ourselves* Linda Bishai thoroughly examines why secession has been ignored by international relations both in theory and practice. Mainstream perspectives in international relations theory have up to this point questioned neither state formation nor the inside/outside divide of state sovereignty. Bishai however historicizes and questions the concept of secession itself and the component assumptions of territoriality and identity upon which it rests.

*Peace Maintenance* Jarat Chopra, 2012-10-12 *Peace Maintenance* explores the controversial concept that has evolved from diplomatic peacekeeping and military peace enforcement. Jarat Chopra, the architect of peace maintenance, outlines the limitations of traditional peacekeeping principles reliant on the increasingly questionable consent of belligerents. He traces the evolution of the political, administrative, legal, and judicial ingredients of international authority. He draws on his extensive experience of peace operations with the United Nations using many examples to illustrate the context and evolution of peace maintenance including in-depth studies of Somalia and Western Sahara.

Binding Violence Moira Fradinger, 2010-06-03 *Binding Violence* exposes the relation between literary imagination, autonomous politics, and violence through the close analysis of literary texts in particular Sophocles' *Antigone*, D. A. F. de Sade's *120 Days of Sodom*, and Vargas Llosa's *The Feast of the Goat* that speak to a blind spot in democratic theory, namely how we decide democratically on the borders of our political communities. These works bear the imprint of the anxieties of democracy concerning its other, violence, especially when the question of a redefinition of membership is at stake. The book shares the philosophical interest in rethinking politics that has recently surfaced at the crossroads of literary criticism, philosophy, critical theory, and psychoanalysis. Fradinger takes seriously the responsibility to think through and give names to the political uses of violence and to provoke useful reflection on the problem of violence as it relates to politics and on literature as it relates to its times.

**State Formation After Civil War** Derek M. Powell, 2016-08-05 *State formation after civil war* offers a new model for studying the formation of the state in a national peace transition as an integrated national phenomenon. Current models of peacebuilding and state building limit that

possibility reproducing a fragmented selective view of this complex reality Placing too much emphasis on state building as design they place too little on understanding state formation as unplanned historical process The dominant focus on national institutions also ignores the role that cities and civic polities have played in constituting the modern state Mining ideas from many disciplines and evidence from 19 peace processes including South Africa the book argues that the starting point for building a systematic theory is to explain a distinct pattern to state formation that can be observed in practice Despite their conflicts people in fragile societies bargain terms for peaceful coexistence they make attempts to constitute the right to rule as valid state authority in circumstances prone to conflict over which they have imperfect influence not control Though the kind of institutions created will differ with context how rules for state authority are institutionalized follows a consistent basic pattern That pattern defines state formation in peace transitions as both a unified if contingent field of normative practice and an object of comparative study Where the national centric models see local government as a matter belonging to policy on decentralization for later in the reconstruction phase the book uncovers a distinct local government dimension to peace transitions A civic dimension to national conflicts that must be explained incipient or proto local authorities that emerge even during civil war in peace making after state collapse the fact that it is common for peace agreements and constitutions to include rules for local authority for local elections to be held as part of broader democratization and for laws to be enacted to establish local government as part of peace compacts The book develops the concept of local peace transition to explain the distinctive constitutive role of this local dimension in peace making and state formation This path breaking book will be of compelling interest to practitioners scholars and students of comparative constitutional studies international law peace building and state building

*Doing Less With Less* Paul Robinson,2015-09-30 The only way to avoid dodgy dossiers and dubious foreign adventures is to acknowledge that the post Cold War world is a far safer place than neoconservative rhetoricians would have us believe The Ministry of Defence should reclaim its pre Orwellian meaning and the armed forces should be scaled back accordingly
