Subject Voice And Ergativity:

Subject, Voice and Ergativity N Bennett, 2005-12 First Published in 1998 Routledge is an imprint of Taylor Francis an informa company *The Oxford Handbook of Ergativity* Jessica Coon, Diane Massam, Lisa deMena Travis, 2017 This volume examines the phenomenon of ergativity a grammatical patterning whereby direct objects are in some way treated like intransitive subjects to the exclusion of transitive subjects It includes theoretical approaches from generative typological and functional paradigms as well as 16 language specific case studies *Ergativity, Valency and Voice* Gilles Authier, Katharina Haude, 2012-05-29 This volume is a collection of articles concerned with the typology of valency and valence change in a large and diversified sample of languages that display ergative alignment in their grammar The sample of languages represented in these descriptive contributions covers most of the geographical areas and linguistic families in which ergativity has been known to exist jointly with well developed morphological voice and some languages belonging to families in which ergativity or voice were not previously recognized or adequately described up to now Subject, Voice and Ergativity David C. Bennett, 1995 This volume brings together 11 papers which relate to a seminar on language typology held at SOAS in 1988-89 The papers contain a study of the work of the Leningrad Group for the Typological Study of Languages and make some of the Group's research accessible in English translation Tense-aspect, Transitivity and Causativity Werner Abraham, L. I. Kulikov, 1999-01-01 This collection presents typological work on tense aspect and epistemic modality in a variety of languages and against the background of different schools of thinking among which the St Petersburg Typological School developed and so masterfully implemented by the Petersburg linguist Vladimir Petrovich Nedjalkov The volume honors this reputed scholar for his life work It is in mainly this spirit and the EUROTYPE spirit that the following scholars have contributed to the volume T Tsunoda on Warrungu Australian indigenous language L Kulikov on Vedic K Kiryu on Japanese Korean and Newari N Sumbatova on Svan from the Kartvelian group T Bulygina A Shmelev on Russian W Boeder on Georgian R Thieroff on aorist and imperfect in European languages Y Poupynin on Russian L Johanson on Kipchak Turkic I Dolinina on Russian N Kozintseva on Old and Modern Eastern Armenian Ch Lee on Korean W Abraham on split ergative languages and German G Silnitsky on Russian V Plungian on Russian E Rakhilina on Russian and K Ebert on Kalmyk

Arguments and Case Eric J. Reuland, 2000-09-15 The ideas presented by the contributions in this volume originated in a workshop on Burzio's generalization Burzio's Generalization BG states that a verb which does not assign an external theta role to its subject does not assign structural accusative Case to an object and conversely It connects cross linguistic similarities between e.g. passives raising verbs and unaccusatives However it does so by linking very different properties of a predicate This raises fundamental questions about its theoretical status The contributions in this volume explore BG's theoretical basis A consensus emerges that BG is in fact an epiphenomenon due to the interaction of different principles of grammar Moreover the contributions show a striking convergence as to how BG is ultimately derived The results obtained

make a significant contribution to the further development of theories of Case and thematic relations

Essays on Typology of Iranian Languages Alireza Korangy, Behrooz Mahmoodi-Bakhtiari, 2019-10-21 The Iranian languages are one of the world's major language families. With an estimated 150 to 200 million native speakers, these languages constitute the western group of the larger Indo-Iranian family, which represents a major eastern branch of the Indo-European languages. Geographically, the Iranian Languages are spoken from Central Turkey, Syria, and Iraq in the West to Pakistan and western edge of Xinjiang Uygur Autonomous Region of China in the east. Iranian languages have long been among the major interests of the philologists and general linguists, and European scholars have made tremendous contributions to the study of this language family. In light of such efforts, now we know that the Iranian languages can be historically divided into three phases: that are old, middle, and new Iranian languages, and the new Iranian languages may be generally grouped as Eastern and Western. In recent years, the orientation towards typology has led to the appearance of somewhat more ponderance on the subject, but the work has not included description of some of the very important languages of the Caspian and/or of the religious minorities such as those of the Zoroastrians or the Jewish community of the fourfold Central Plateau dialect.

Ergativity Alana Johns, Diane Massam, Juvenal Ndayiragije, 2007-02-05 The overarching theme of this volume is the formal expression of the range and limits of ergativity. The book contains cutting-edge theoretical papers by top authors in the field who also conduct original field work and bring new data to light. It contains articles that apply the most recent theoretical tools to the area of ergativity and then explore the issues that emerge. Languages investigated in the text include Basque, Georgian, and Hindi.

Lazuri: An Endangered Language from the Black Sea Züleyha Ünlü, Brian George Hewitt, 2023-05-09 Lazuri, an Endangered Language of the Black Sea, is a unique source in terms of presenting a close examination of the Laz language from multiple perspectives. This volume, edited by Züleyha Ünlü and Brian George Hewitt, examines the current status of the Laz language, Laz speakers' perceptions of ethnolinguistic vitality, the significance of the Laz language for theoretical research in linguistics, the examination of Laz lexical data from historical documents, the linguistic variation of the Laz language, the use of a Laz alphabet in literary genres, contemporary responses to preserve the Laz language, and reflections from applied linguistics for the future of the Laz language. Focusing on the main features of the Laz language and its present situation in Turkey and in other regions, as well as the attempts to revitalize Laz and Laz culture, this book will be the first scholarly publication on Laz as a South Caucasian language in terms of being a road map for future studies.

Non-nominative Subjects Peri Bhaskararao, Karumuri V. Subbarao, 2004-01-01 Volume 2 of Non-nominative Subjects NNSs presents the most recent research on this topic from a wide range of languages from diverse language families of the world, with ample data and in-depth analysis. A significant feature of these volumes is that authors with

different theoretical perspectives study the intricate questions raised by these constructions. Some of the central issues include the subject properties of noun phrases with ergative dative accusative and genitive case assignment and checking anaphor antecedent coreference the nature of predicates with NNSs whether they are volitional or non volitional possibilities of control coreference and agreement phenomena. These analyses have significant implications for theories of syntax and verbal semantics first language acquisition of NNSs convergence of case marking patterns in language contact situations and the nature of syntactic change.

Ergativity in German Günther Grewendorf, 2012-10-25. The architecture of the human language faculty has been one of the main foci of the linguistic research of the last half century. This branch of linguistics broadly known as Generative Grammar is concerned with the formulation of explanatory formal accounts of linguistic phenomena with the ulterior goal of gaining insight into the properties of the language organ. The series comprises high quality monographs and collected volumes that address such issues. The topics in this series range from phonology to semantics from syntax to information structure from mathematical linguistics to studies of the lexicon.

The Algonquian Inverse Will Oxford, 2023-11-28. This book serves as a definitive reference for the inverse morphology of the Algonquian languages which

has attracted much attention in typological and theoretical linguistics Will Oxford describes the patterning of inverse morphology across the Algonquian family and presents a framework for understanding the structure and function of the Algonquian inverse that is empirically driven and typologically grounded He presents data from all documented Algonquian languages and considers not only the morphology of the inverse construction but also its syntax and pragmatics giving equal weight to diachronic typological functional and formal perspectives From the integration of these perspectives a simple and coherent understanding of the nature of the inverse emerges The key proposal is that the inverse is deep in some contexts and shallow in others In interactions between two third persons the inverse is a deep patient voice construction that inverts the canonical morphology syntax and pragmatics of a transitive clause In interactions between a third person and a first or second person the inverse is a shallow hierarchical agreement pattern implemented through a spurious use of patient voice morphology inverting the canonical morphology of a transitive clause but having no effect on syntax or pragmatics This split analysis which reflects the likely diachronic development of the Algonquian inverse is argued to have various benefits including the resolution of a longstanding controversy over the syntactic status of the inverse

Language Policy and Language Conflict in Afghanistan and Its Neighbors Harold Schiffman, 2011-12-09 The book was co edited by Brian Spooner Professor of Anthropology at the University of Pennsylvania Language policy in Central Asia Afghanistan and the

immediately surrounding neighboring countries has a long and varied history The Iranian revolution of 1978 the collapse of the Soviet Union in 1991 and the ongoing conflict in Afghanistan since 2001 have left the area in a state of flux This volume gives a better picture about what is official and explicit what is not official but implicit or general practice and what the likely future developments might be It is very clear that multilingualism whether it involves Persian Russian or English in addition to other languages not only has long been a part of the scene but will probably continue to be so

Voice and Mood (Essentials of Biblical Greek Grammar) David L. Mathewson, 2021-10-26 A recognized expert in Greek grammar examines two features of the Greek verb voice and mood Drawing on his years of teaching experience at a leading seminary David Mathewson examines these two important topics in Greek grammar in light of modern linguistics and offers fresh insights The book is illustrated with examples from the Greek New Testament making it an ideal textbook for the intermediate Greek classroom This is the first volume in a new series on Greek grammar edited by Stanley E Porter

Symmetrical Voice and Linking in Western Austronesian Languages Sonja Riesberg, 2014-08-19 This book is an in depth study of the voice systems of Totoli Balinese Indonesian and Tagalog which shows that the symmetrical nature of these systems poses a problem to current linking theories It provides an analysis of symmetrical linking within two grammatical theories LFG RRG and develops a modified LFG linking mechanism that sheds light on the differences as well as the similarities of symmetrical and asymmetrical voice systems

Aspects of Iranian Linguistics Simin Karimi, Vida Samiian, Donald Stilo, 2009-05-05 Aspects of Iranian Linguistics introduces readers to recent research into various properties of a number of Iranian languages

The volume consists of twenty chapters that cover a full range of Iranian linguistics including formal theoretical perspectives from a syntactic and morphological point of view typological and functional perspectives and diachronic and areal perspectives It also contains papers on computational linguistics and neurolinguistics as well as the modern history of lexicography in Iran Various Iranian languages are discussed in this volume including Hawrami and Kermanji two of the major dialects of Kurdish Medieval Classical and Modern Persian Balochi Taleshi and Pamir With the exception of Persian other Iranian languages had not received much attention in the past Thus this work as the first volume ever published on various aspects of these languages and their linguistic properties is a valuable contribution to our understanding of a less commonly studied language family The theoretical descriptive and applied approaches pursued by various authors in this volume together with the colorful range of languages discussed provide a unique perspective that is appealing to researchers in different domains of linguistics and language studies

The Iranian Languages Gernot Windfuhr, 2009 The Iranian languages form the major eastern branch of the Indo European group of languages itself part of the larger Indo Iranian family Estimated to have between 150 and 200 million native speakers the Iranian languages constitute one of the world's major language families This comprehensive volume offers a detailed overview of the principle languages which make up this group Old Iranian Middle Iranian and New Iranian The Iranian Languages is divided into fifteen chapters The introductory chapters by the editor present a general overview and a detailed discussion of the linguistic typology of Iranian The individual chapters which follow are written by leading experts in the field These provide the reader with concise non technical descriptions of a range of Iranian languages Each chapter follows the same pattern and sequence of topics taking the reader through the significant features not only of phonology and morphology but also of syntax from phrase level to complex sentences and pragmatics Ample examples on all levels are provided with detailed annotation for the non specialist reader In addition each chapter covers lexis sociolinguistic and typological issues and concludes with annotated sample texts This unique resource is the ideal companion for undergraduate and postgraduate students of linguistics and language It will also be of interest to researchers or anyone with an interest in historical linguistics linguistics anthropology and language development Gernot Windfuhr is Professor of Iranian Studies at the University of Michigan he has published widely on Persian and Iranian languages and linguistics and related languages as well as on other aspects of Iranian culture including Persian literature and Pre Islamic Iranian religions

Deconstructing Ergativity Maria Polinsky, 2016-04-01 Nominative accusative and ergative are two common alignment types found across languages In the former type the subject of an intransitive verb and the subject of a transitive verb are expressed the same way and differently from the object of a transitive In ergative languages the subject of an intransitive and the object of a transitive appear in the same form the absolutive and the transitive subject has a special ergative form Ergative languages often follow very different patterns thus evading a uniform description and analysis A simple explanation for that has to do with the idea that ergative languages

much as their nominative accusative counterparts do not form a uniform class In this book Maria Polinsky argues that ergative languages instantiate two main types the one where the ergative subject is a prepositional phrase PP ergatives and the one with a noun phrase ergative Each type is internally consistent and is characterized by a set of well defined properties The book begins with an analysis of syntactic ergativity which as Polinsky argues is a manifestation of the PP ergative type Polinsky discusses diagnostic properties that define PPs in general and then goes to show that a subset of ergative expressions fit the profile of PPs Several alternative analyses have been proposed to account for syntactic ergativity the book presents and outlines these analyses and offers further considerations in support of the PP ergativity approach The book then discusses the second type DP ergative languages and traces the diachronic connection between the two types The book includes two chapters illustrating paradigm PP ergative and DP ergative languages Tongan and Tsez The data used in these descriptions come from Polinsky s original fieldwork hence presenting new empirical facts from both languages
