Subject Is Writing Essays By Teachers And Students:

The Subject is Writing Wendy Bishop, 2003 In this unique compilation of essays Bishop brings together the voices of teachers and students to affirm that the content of writing classrooms is the work that these individuals do together **The Subject is Reading** Wendy Bishop, 2000 The Subject Is Reading is intended for first year writing courses in which students study reading writing and literature **Teaching Academic Writing in European Higher Education** Lennart Björk, Gerd Bräuer, L. Rienecker, Peter Stray Jörgensen, 2005-12-30 DAVID R RUSSELL English Department of Iowa State University U S A I was fortunate to attend as a visitor from the U S the first European Association for the Teaching of Academic Writing EATAW conference in 2001 at Groningen I was struck by the similarities in the challenges higher education faces on both sides of the Atlantic in terms of developing students academic writing and students learning through writing It is indeed an international problem But I was equally struck by the profound differences in responding to these challenges among institutions disciplines and even within disciplines The essays in this traordinary volume address a growing demand for help with academic writing on the part of students and academic staff alike And they do so in ways that bring fresh approaches not only to Europeans who have only recently begun to study academic writing but also to researchers and academic staff in the U S where we have a c tury old tradition of attention to the problem but are much in need of these fresh approaches Academic writing has become a problem in higher education all around the world because higher education sits smack between two contradictory pressures On one end far more students and far more diverse students come streaming into higher education bringing in a far greater diversity of linguistic resources often interpreted as standards are falling as Frank Haacke Tente point out **Writing Mathematically** Candia Morgan, 2002-01-04 School mathematics curricula internationally tend to emphasise problem solving and have led to the development of opportunities for children to do maths in a more open creative way This has led to increased interest in performance based assessment which involves children in substantial production of written language to serve as evidence of their mathematical activity and achievement However this raises two important questions Firstly does this writing accurately present children s mathematical activity and ability Secondly do maths teachers have sufficient linguistic awareness to support their students in developing skills and knowledge necessary for writing effectively in their subject area The author of this book takes a critical perspective on these questions and through an investigation of teachers readings and evaluations of coursework texts identifies the crucial issues affecting the accurate assessment of school mathematics Reading and Writing: Keys to Empowerment Pasquale De Marco, 2025-08-10 Literacy is a fundamental human right and a cornerstone of a civilized society It empowers individuals to access knowledge express themselves effectively and participate fully in their communities In today s rapidly changing world literacy skills are more important than ever before This comprehensive guide provides educators parents and learners alike with a roadmap for developing strong literacy skills in all individuals Through engaging and accessible chapters the book
