

SUBJECTIVE NORMS

Subjective norm is a social psychological concept that refers to the perceived social pressure to engage or not engage in a particular behavior.

DEFINITION

The subjective norm reflects the extent to which an individual thinks other influential people want them to perform a behavior, and how motivated they feel to comply with this perceived social pressure.

Ardakani et al (2020) define it as: "...the personal perception of the social pressures which are imposed to adopt a specific behavior" (p. 1522).

EXAMPLE

- **Fitness Goals:** If an individual is surrounded by friends who attend the gym regularly, they may feel encouraged to do so, as well.
- **Environmental Practices:** People often adopt environmentally friendly practices because they perceive it as a societal expectation.

Subjective Self:

The Subjective Self Harwood Fisher, 2001-01-01 For all their strides in understanding how we create and think about cultures psychologists linguists and logicians have had difficulty explaining how we conceive our selves how the self can in fact be both the object and the subjective originator of its surroundings Harwood Fisher's purpose in this far reaching interdisciplinary book is to depict the subjective self in its true complex duality In The Subjective Self Fisher argues that the key to depicting both aspects of the self simultaneously and thus modeling it more holistically than before is to visualize the self in a logical space From an origin point inside this space the self tries out metaphors and launches categories to logically order what it wants sees and encounters This is a creative cognitive process metaphoric framing by which the self invents new forms and depicts new organizations of its experiences impressions and information It is also a generative linguistic process bracketing by which the self can step outside its own expressed thoughts gain new levels of awareness re position itself as an agent responsible for its ideas and statements and in short empower its own identity The framing sets in motion versatile mental categories forms that are projected into mental space where they become objectified The bracketing sets in motion the logical bounds of the I stabilizing the individual's identity and giving thrust to the subjective self's dynamic causal role In elaborating this theory Fisher extends the ideas of Kurt Lewin Jean Piaget and C S Peirce among others By drawing on each of these thinkers he is able to bring their common themes of perspective and construction together in his portrait of the self as a creative iconic space

The Reciprocating Self Jack O. Balswick, Pamela Ebstyne King, Kevin S. Reimer, 2005-04-28 On the basis of a theologically grounded understanding of the nature of persons and the self Jack O Balswick Pamela Ebstyne King and Kevin S Reimer present a model of human development that ranges across all of life's stages infancy childhood adolescence young adulthood middle adulthood elder adulthood They do this by drawing on a biblical model of relationality where the created goal or purpose of human development is to become a reciprocating self fully and securely related to others and to God Along the way they provide a context for understanding individual development issues concerns tensions worries or crises encountered by the self in the context of change Awareness of these issues is most pronounced at developmental transitional points learning to talk and walk beginning to eat unassisted going to school developing secondary sexual physical features leaving home obtaining full time employment becoming engaged and then married having a child for the first time parenting an adolescent watching children move away from home retiring experiencing decline in physical and mental health and finally facing imminent death Throughout Balswick King and Reimer contend that since God has created human beings for relationship to be a self in reciprocating relationships is of major importance in negotiating these developmental issues Critically engaging social science research and theory *The Reciprocating Self* offers an integrated approach that provides

insight helpful to college and seminary students as well as those serving in the helping professions Those preparing for or currently engaged in Christian ministry will be especially rewarded by the in depth discussion of the implications for moral and faith development nurtured in the context of the life of the church

Advances in Experimental Social Psychology, 1991-09-25 Advances in Experimental Social Psychology *Affect Regulation, Mentalization, and the Development of the Self* Peter Fonagy, Gyorgy Gergely, Elliot Jurist, Mary Target, 2010-09-07 Winner of the 2003 Gradiva Award and the 2003 Goethe Award for Psychoanalytic Scholarship Arguing for the importance of attachment and emotionality in the developing human consciousness four prominent analysts explore and refine the concepts of mentalization and affect regulation Their bold energetic and encouraging vision for psychoanalytic treatment combines elements of developmental psychology attachment theory and psychoanalytic technique Drawing extensively on case studies and recent analytic literature to illustrate their ideas Fonagy Gergely Jurist and Target offer models of psychotherapy practice that can enable the gradual development of mentalization and affect regulation even in patients with long histories of violence or neglect

The Self in Neuroscience and Psychiatry Tilo Kircher, Anthony S. David, 2003-08-07 In recent years the clinical and cognitive sciences and neuroscience have contributed important insights to understanding the self The neuroscientific study of the self and self consciousness is in its infancy in terms of established models available data and even vocabulary However there are neuropsychiatric conditions such as schizophrenia in which the self becomes disordered and this aspect can be studied against healthy controls through experiment building cognitive models of how the mind works and imaging brain states In this 2003 book the first to address the scientific contribution to an understanding of the self an eminent international team focuses on current models of self consciousness from the neurosciences and psychiatry These are set against introductory essays describing the philosophical historical and psychological approaches making this a uniquely inclusive overview It will appeal to a wide audience of scientists clinicians and scholars concerned with the phenomenology and psychopathology of the self

Progress in Self Psychology, V. 17 Arnold I. Goldberg, 2013-05-13 Volume 17 of Progress in Self Psychology The Narcissistic Patient Revisited begins with the next installment of Strozier's From the Kohut Archives first publication of a fragment by Kohut on social class and self formation and of four letters from his final decade Taken together Hazel Ipp's richly textured Case of Gayle and the commentaries that it elicits amount to a searching reexamination of narcissistic pathology and the therapeutic process This illuminating reprise on the clinical phenomenology Kohut associated with narcissistic personality disorder accounts for the volume title The ability of modern self psychology to integrate central concepts from other theories gains expression in Teicholz's proposal for a two tiered theory of intersubjectivity in Brownlow's examination of the fear of intimacy and in Garfield's model for the treatment of psychosis The social relevance of self psychology comes to the fore in an examination of the experience of adopted children and an inquiry into the roots of mystical experience both of which concern the ubiquity of the human longing for an idealized parent imago Among

contributions that bring self psychological ideas to bear on the arts Frank Lachmann s provocative Words and Music which links the history of music to the history of psychoanalytic thought in the quest for universal substrata of psychological experience deserves special mention Annette Lachmann s consideration of empathic failure among the characters in Shakespeare s Othello and Silverstein s reflections on Schubert s self states and selfobject needs in relation to the specific poems set to music in his Lieder round out a collection as richly broad based as the field of self psychology itself

Fantasies of Flight Daniel M. Ogilvie, 2003-12-11 Fantasies of Flight invigorates the field of personality psychology by challenging the contemporary academic view that individuals are best studied as carriers of traits Daniel Ogilvie exchanges a heart to heart case study approach to understanding human behavior for the current strategies of categorizing and comparing individuals according to their manifest traits Ogilvie asks and endeavors to answer questions like What were the psychological conditions that led Sir James Barrie to create a character named Peter Pan and What were the dynamics behind the Marshall Herff Applewhite's conviction that a space ship hiding behind the Hale Bopp comet would rescue him and his Heaven's Gate followers after they enacted a mass suicide pact in 1997 Answering these questions requires him to resurrect old ways to think about personality and old strategies for studying individuals one by one Early in the book Ogilvie reviews the history of why intensive case studies were discredited in psychology and describes how Sigmund Freud's psychobiographical account of Leonardo da Vinci's fascination with flight inadvertently abetted critics of psychoanalytic psychology He then performs a partial psychobiography of James Barrie and the origins of Peter Pan followed by an investigation of Carl Jung who fashioned the collective unconscious to serve as humankind's link to eternity Arguing that personality psychology needs to become less insular Ogilvie integrates information from the disciplines of developmental psychology and neuroscience into a theory regarding the latent needs that both Barrie and Jung sought to satisfy The theory including its emphasis on the onset of self and consciousness is then applied to an array of well known and obscure individuals with ascensionistic inclinations Well written and accessible but complex and scholarly this volume will restore interest in the investigation of people's inner lives

Experimental Philosophy of Identity and the Self Kevin Tobia, 2022-07-28 Exploring issues ranging from the metaphysical to the moral and legal a team of esteemed contributors bring together some of the most important and cutting edge findings in experimental philosophy of the self to address longstanding philosophical questions about personal identity

such as What makes us today the same person as our childhood and future selves Can certain changes transform us into a different person Do our everyday moral practices presuppose a false account of who we are Chapters offer a survey of recent empirical work and foster dialogue between experimental and traditional philosophical approaches to identity covering the moral self dual character concepts true self transformative experience and the identity conditions collective entities With novel experiments and thought provoking applications to practical concerns including law immigration bioethics and politics this collection highlights the value and implications of empirical work on personal identity

Shame and the Origins of Self-Esteem Mario Jacoby,2016-08-12 Shame is one of our most central feelings and a universal human characteristic Why do we experience it For what purpose How can we cope with excessive feelings of shame In this elegant exposition informed by many years of helping people to understand feelings of shame leading Jungian analyst Mario Jacoby provided a comprehensive exploration of the many aspects of shame and showed how it occupies a central place in our emotional experience Jacoby demonstrated that a lack of self esteem is often at the root of excessive shame and as well as providing practical examples of how therapy can help he drew upon a wealth of historical and cultural scholarship to show how important shame is for us in both its individual and social aspects This Classic Edition includes a new foreword by Marco Della Chiesa

Kant's Theory of the Self Arthur Melnick,2008-12-21 Melnick explains the third status of the self by identifying it with intellectual action that does not arise in the progression of attending and so is not appearance but accompanies and unifies inner attending As so accompanying it progresses with that attending and is therefore temporal not a thing in itself

Dog Margot Lasher,2008 Dog Pure Awareness is a psychological and ultimately spiritual exploration of the human dog connection People think of their dogs as companions as partners and as members of their family and this book takes that idea seriously The mind of the dog is approached as someone who lives with us and knows us sometimes better than anyone else in the world The book answers questions that all of us who live with a dog have asked what is she thinking when she stares into my eyes how does he know when I am feeling sad or anxious why is she so happy to see me when I ve been gone for only 10 minutes The answers in Dog Pure Awareness come from an original and revealing combination of relational psychology and shamanic understanding The connection between a human and her dog is treated as a relationship two beings in close connection who find strength and a sense of belonging in each other Using psychological concepts such as attunement and perceptual awareness the book explores the ways in which human and dog experience and understand each other Dog Pure Awareness is written in a clear non technical style that will appeal to all dog lovers It validates people s experience that their dog is deeply important to them It is also a serious theory of the human dog connection which will be of interest to professionals such as psychologists and veterinarians It is appropriate for consideration in college and veterinarian school courses which deal with the human animal bond

The Self The Soul and The World: Affect Reason and Complexity Avijit Lahiri, 2023-10-14 This book looks at the affective cognitive roots of how the human mind inquires into the workings of nature and more generally how the mind confronts reality Reality is an infinitely complex system in virtue of which the mind can comprehend it only in bits and pieces by making up interpretations of the myriads of signals received from the world by way of integrating those with information stored from the past This constitutes a piecemeal interpretation by which we assemble our phenomenal reality In perceiving the complex world and responding to it the mind invokes the logic of affect and the logic of reason the former mostly innate and implicit and the latter generated consciously in explicit terms with reference to mind independent relations between entities in nature It is a strange combination of affect and reason that enables us to make decisions and inferences the latter mostly of the inductive type thereby making possible the development of theories Theories are our tool kits for explaining and predicting phenomena guiding us along in our journey in life Theories however are defeasible and need to be constantly updated at times even radically In this the self and the soul are of enormous relevance The former is the affect based psychological engine driving all our mental processes while the latter is the capacity of the conscious mind to examine and reconstruct the self by modulating repressed conflicts If the soul remains inoperative all our theories become misdirected and a rot spreads inexorably all around us

Curious Emotions Ralph D. Ellis, 2005-04-26 Emotion drives all cognitive processes largely determining their qualitative feel their structure and in part even their content Action initiating centers deep in the emotional brain ground our understanding of the world by enabling us to imagine how we could act relative to it based on endogenous motivations to engage certain levels of energy and complexity Thus understanding personality cognition consciousness and action requires examining the workings of dynamical systems applied to emotional processes in living organisms If an object's meaning depends on its action affordances then understanding intentionality in emotion or cognition requires exploring why emotion is the bridge between action and representational processes such as thought or imagery and this requires integrating phenomenology with neurophysiology The resulting viewpoint enactivism entails specific new predictions and suggests that emotions are about the self initiated actions of dynamical systems not reactive responses to external events consciousness is more about motivated anticipation than reaction to inputs Series A
