problem of today's philosophy of mind **The Call Of Solitude** Ester Schaler Buchholz, 1999-08 This book based on the author's developmental and clinical psychoanalytic study is about the positive effects of spending time alone and the difficulties and negative connotations associated with this need in busy modern society From back cover *Philosophy and Psychiatry* Thomas Schramme, Johannes Thome, 2012-08-09 Philosophy and psychiatry share many topics and problems For example the solutions of the psychiatry of the philosophical body-soul problem have direct effects on the self-image of the discipline Despite these obvious overlappings and unlike the English speaking countries interdisciplinary research on philosophical psychopathology has been scarce in Germany The current anthology closes these gaps because the authors renowned experts as well as young scientists whose new approaches open promising perspectives come from both disciplines The individual contributions deal with philosophical debates as they arise within the context of psychiatric theory and practice **Reductionism** Richard H. Jones, 2000 Reductionism's approach brings together many of the most interesting questions today in philosophy consciousness and computers and in science issues of complexity and self-organization It also presents a brief history of how reductionism has developed in Western philosophy and religion with reference to Indian philosophy on certain issues *The Philosophy of Psychiatry and Biologism* Markus Rütger, Bettina Schoene-Seifert, Marco Stier, Sebastian Munders, 2014-12-03 There has been an ongoing debate about the capabilities and limits of the bio-natural sciences as sources and the methodological measure in the philosophy of psychiatry for quite some time now Still many problems remain unsolved at least partly for the following reasons The opposing parties do not tend to speak with each other exchange their arguments and try to increase mutual understanding Rather one gets the impression that they often remain in their trenches busy with confirming each other's opinions and developing their positions in isolation This leads to several shortcomings 1 Good arguments and insights from both sides of the debate get less attention they deserve 2 The further improvement of each position becomes harder without criticism genuinely motivated by the opposing standpoint 3 The debate is not going to stop at least not in the way it would finish after a suggested solution finds broad support 4 Related to this insisting on the ultimate aptness of one side is just plainly wrong in almost every case Since undeniably most philosophical positions usually have a grain of truth hidden in them In sum many controversies persist with regard to the appropriate methodological epistemological and even ontological level for psychiatric explanation and therapies In a conference which took place in December last year we tried to contribute to a better understanding about what really is at issue in the philosophy of psychiatry We asked for a common basis for several sides for points of divergence and for the practical impact of different solutions on everyday work in psychiatry Since psychiatry as a whole is a subject that is too wide to be covered in a single meeting we focused on the following four core topics 1 Competing accounts of psychiatric biologism reductionism and physicalism 2 Mental disease and brain disease in the light of current neuroscientific and epigenetic findings 3 Normative suppositions for different accounts of mental disease 4 Normative implications of different accounts of

mental disease These topics which have been vigorously as well as fruitfully discussed at our conference will ideally be too in the center of our contribution to Frontiers More precisely we think of arranging a research topic which assembles the issues of the conference At this point it seems promising to us to group three or four Target Articles TA and let them get criticized by a couple of commentaries from different angles to give the issue a much broader and detailed perspective **The**
