Conduct And Support Of Amphibious Operations From United States Submarines In World War II LCDR Brian J. Haggerty USN, 2015-11-06 The U S Navy is building Virginia class submarines and recently completed the conversion of four Ohio class submarines from Trident Ballistic Missile Submarines SSBN s to Guided Missile Submarines SSGNs The Virginia class is the first nuclear powered fast attack submarine SSN that shipyards designed with SOF capability without requiring conversion The SSGN conversion of the first four Ohio class submarines included substantial SOF capability These construction and conversion projects represent a significant investment in SOF and amphibious capabilities and they follow a long line of submarine conversions that began early in World War II By analyzing three World War II operations this monograph argues that knowing what actually happened in amphibious operations conducted and supported by American submarines in World War II provides valuable insight about the scope of capabilities challenges and benefits of submarines for these kinds of missions in naval warfare The first operation is an amphibious raid on Makin Atoll The second involves the amphibious landings on the northwest Africa coast as part of Operation Torch The final operation includes the landings on Attu Island in the Aleutian chain

The Lost Submarines of Pearl Harbor James P. Delgado, Terry Kerby, Stephen Price, Maximilian D. Cremer, Hans K. Van Tilburg, Ole Varmer, Russell Matthews, 2016-11-16 In the pre dawn darkness of December 7 1941 five Imperial Japanese Navy submarines surfaced off the coast of Oahu Secured to the decks of these vessels were secret weapons to be deployed for the first time in modern warfare two man midget submarines intended to enter Pearl Harbor without being detected and torpedo the US Navy battleships lying at anchor there None of them would return from their mission One of the last remaining and persistent mysteries of the Pearl Harbor attack

is that of the Japanese Midget Submarines It is a fascinating story of innovation courage secrets and failed expectations And it is not only a story of the morning hours of December 7 but of the years before to develop these weapons and the years after where they were deployed in the great Pacific War and how they fared as weapons of war These words by Daniel J Basta from the foreword of this work capture both the essence and the impact of The Lost Submarines of Pearl Harbor James P Delgado and his coauthors have worked on the story of these incredible craft for decades They combed the records of the US Navy and the recollections of its veterans as well as Japanese Australian and British archives in order to uncover the truth They have logged hours of direct observation and research on the midget subs in their final resting places in some cases more than 1 000 feet below the surface of the Pacific And in the end they have woven a tapestry of scholarship historical sleuthing scientific insight and good storytelling that will enthrall specialists and history enthusiasts alike **The**

of 31 May 1942 Sydney Harbour was attacked by midget submarines of the Imperial Japanese Navy An accommodation vessel of the Royal Australian Navy was torpedoed and 21 sailors died The midget submarines were hunted down and two sunk War had already come to northern Australia and now the southern cities were made bitterly aware that the world wide conflict had reached them The midget submarine attack was only the beginning gun strikes were made against land targets

and more enemy submarines came south attacking freighters up and down the continent's eastern coast. This new accounting of the night Sydney Harbour was attacked reveals new details of the fight that ensued and sets some of the previous historical accounts right. The text is supported by numerous photos as well as extensive plans of the midget submarines and details of the curious stories following the war including the discovery of the third midget submarine sunk off the New South Wales coast.
